LoadoutCase™ GETS LIGHTER AND TOUGHER

Boom, thunk, crash, smash. Ever watch your expensive case full of valuable equipment come careering down the luggage carousel, and anxiously hoping it doesn't self destruct on impact? Buy a UK LoadoutCase and worry no more.

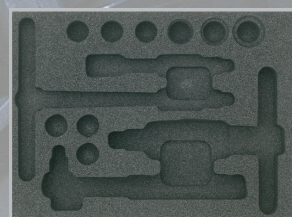

UK International, known to many as Underwater Kinetics, has developed a new line of 12 extra large injection molded cases under the brand name LoadoutCase™.

The design is based on a new proprietary polypropylene resin blend, UKtekmat 2.0™, which brings up to a 20% reduction in weight from the previous line (Transit Cases made of ABS) and a significant increase in impact resistance over its competitors. The UKtekmat 2.0 resin was formulated to have a higher Izod impact strength than any of UK's competitors cases.

Characteristic features:

- Waterproof up to 1 m
- Rib reinforced walls
- Stainless-steel twist-lock latches, hinge pins
- Spring-loaded steel handles
- A hollow core silicone rubber O-ring is used for the main seal against humidity, water and dust as well as corrosive gasses such as ozone and carbon monoxide
- Loops for padlocks or security seals

The LoadoutCases will be supplied empty or with foam. Customised foam fillings are available upon special request.

Model	Internal Dimensions (mm)			External Dimensions (mm)			Weight (kg)*
	Length	Width	Depth	Length	Width	Depth	
822	553	452	208	604	510	246	10
827	680	452	208	731	510	246	10
1022	553	452	274	604	510	309	10
1027	680	452	274	731	510	309	12
1122	553	452	274	604	510	309	10
