The products and systems described in this catalog are manufactured/distributed under application of a certified quality management system in accordance with DIN EN ISO 9001 (Certified Registration No.1323-QM).
The certificate is recognized by all IQNet countries.

SIEMENS

Welcome to Automation and Drives

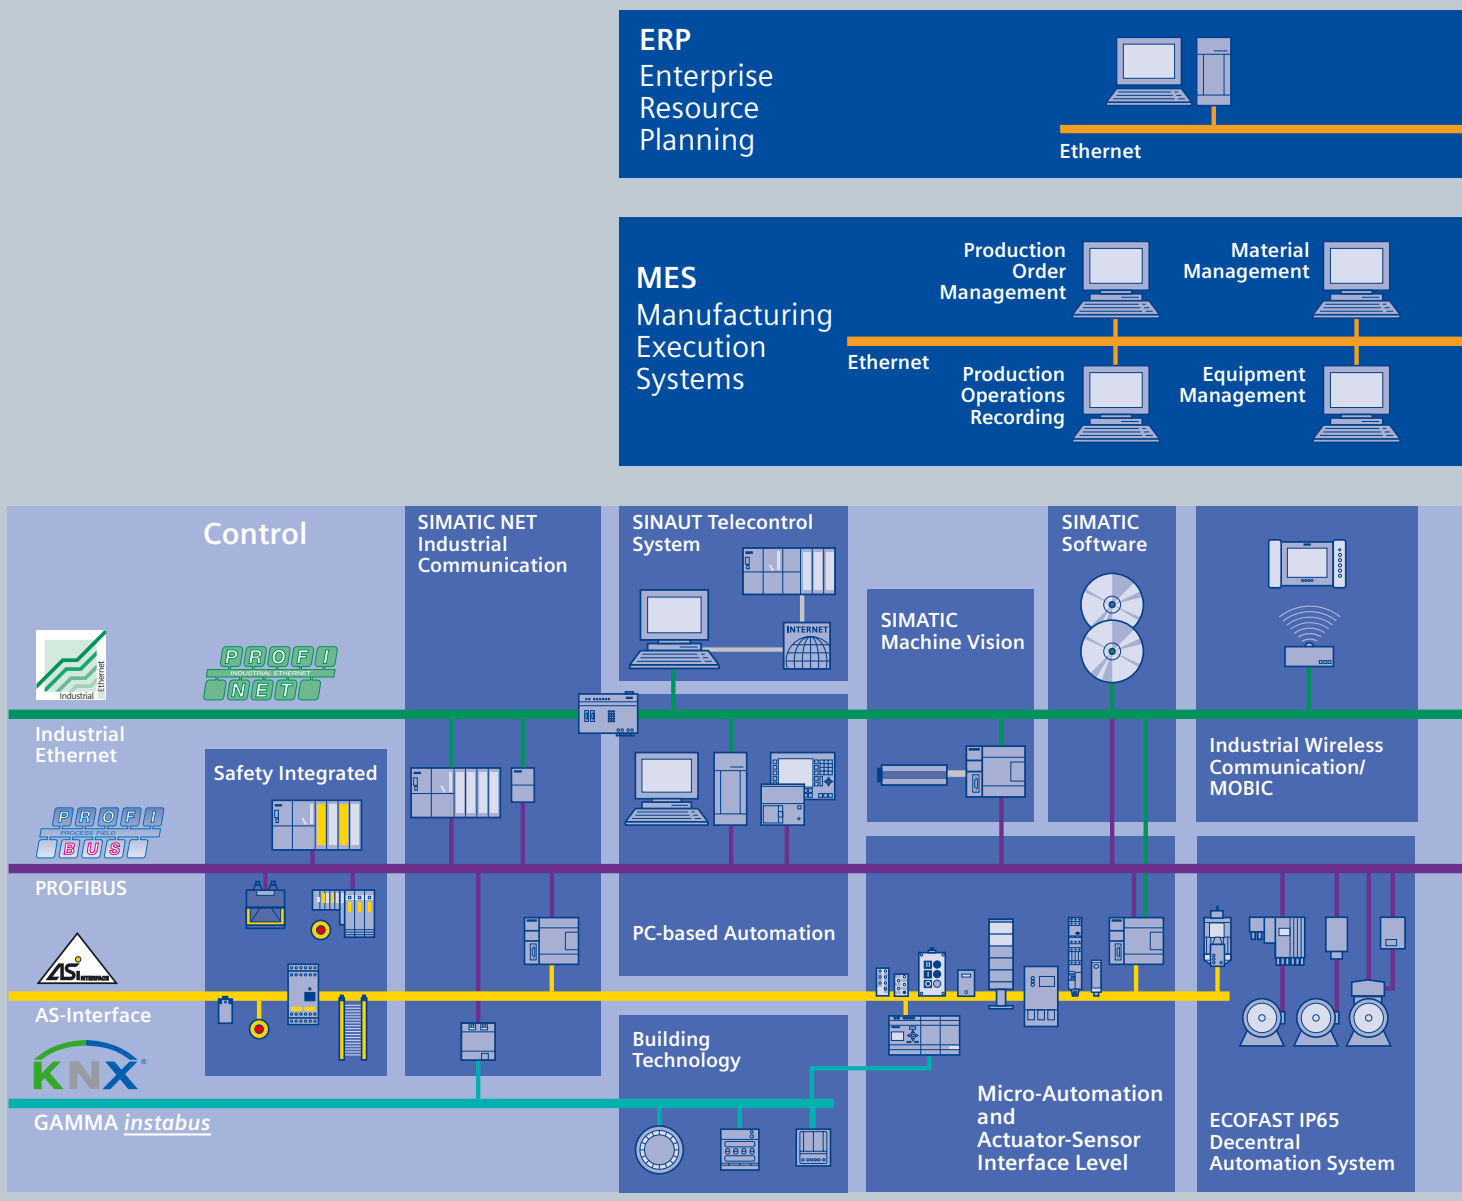
We would like to welcome you to Automation and Drives and our comprehensive range of products, systems, solutions and services for production and process automation and building technology worldwide.

With Totally Integrated Automation and Totally Integrated Power, we deliver solution platforms based on standards that offer you a considerable savings potential.

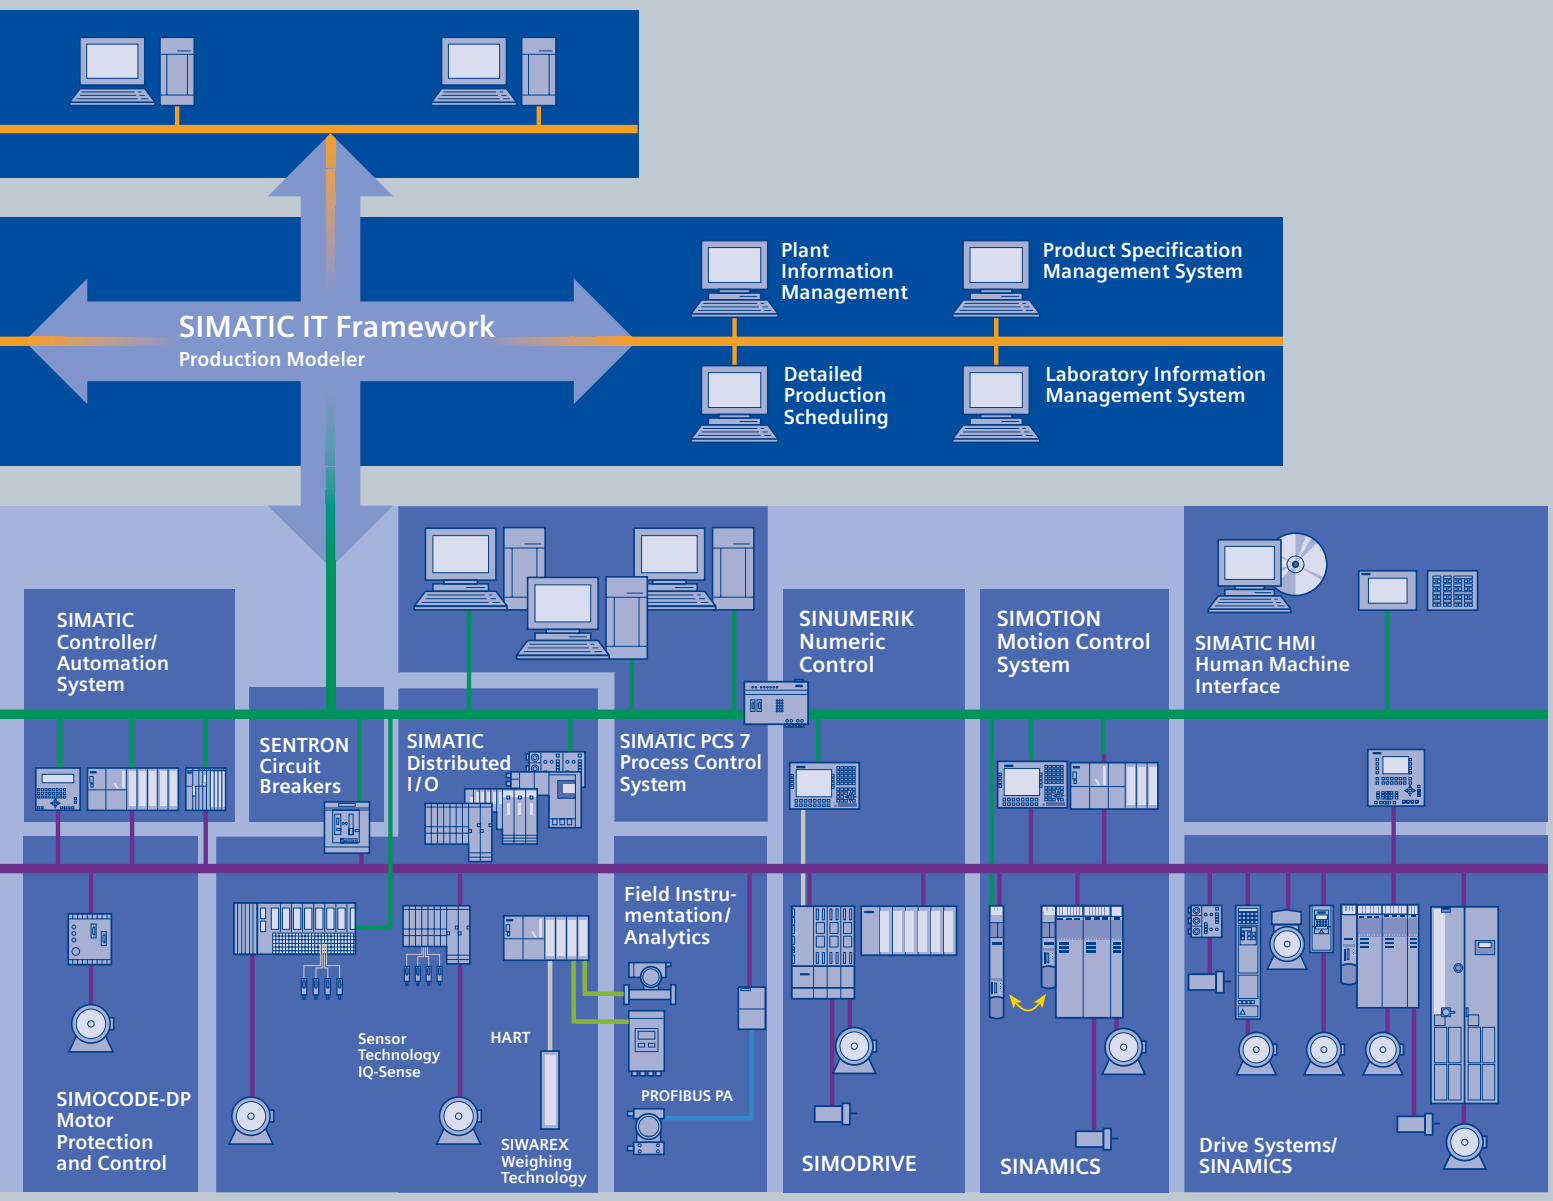
Discover the world of our technology now. If you need more detailed information, please contact one of your regional Siemens partners.
They will be glad to assist you.

Totally Integrated Automation – innovations for more productivity

With the launch of Totally Integrated Automation, we were the first ones on the market to consistently implement the trend from equipment to an integrated automation solution, and have continuously improved the system ever since. Whether your industry is process- and production-oriented or a hybrid, Totally Integrated Automation is a unique "common solution" platform that covers all the sectors.
Totally Integrated Automation is an integrated platform for the entire production line - from receiving to technical processing



and production areas to shipping. Thanks to the system-oriented engineering environment, integrated, open communications as well as intelligent diagnostics options, your plant now benefits in every phase of the life cycle.
In fact, to this day we are the only company worldwide that can offer a control system based on an integrated platform for both the production and process industry.



Totally Integrated Power – energy distribution and management from one source

Totally Integrated Power™ by Siemens offers integrated solutions for energy distribution in functional and industrial buildings covering everything from medium-high voltage to power outlets.

Totally Integrated Power™ is based on integration in planning and configuration as well as coordinated products and systems. In addition, it features communications and software modules for connecting power distribution systems to industrial automation and building automation, thereby offering a substantial savings potential.

Introduction
Micro Automation

LOGO!:
Technology with a future which simplifies many things

LOGO! Logic Module

The compact, user-friendly and low-cost solution for simple control tasks.
For universal applications in the industry, non-residential buildings or residential buildings.
No wiring is necessary since functions are linked.
Operates in a similar manner as a PLC.
With integrated operator control and display unit for input of alarm message texts / variables direct at the device.

Easy operation:

- Linking of functions at the click of the mouse at the PC or by pressing a key on the device

Minimum expenditure of time:

- Only the inputs and outputs need to be wired
- Simultaneous wiring diagram generation and control cabinet installation

Reduced costs:

- Many switchgear technology functions are integrated

High flexibility:

- Functions are simply modified at the push of a button
- Variants for different operating voltages
- Modular design, can be expanded at any time

Further information can be found at:

SIMATIC S7-200: Control technology that is a class of its own

SIMATIC S7-200

The Micro PLC SIMATIC S7-200 is truly in a class of its own: it is both compact and highly powerful (e.g. in relation to its real-time response), it is fast, features great communications capabilities and comes with very user-friendly software and hardware.

- Graduated range of CPUs with many basic PLC functions.
- Modular expansion capability for individual adaptations to the respective tasks.
- Can be easily networked over point-to-point interfaces (PPI) with the functions programming, communication, operator control and monitoring.
- Programming with STEP 7-Micro/WIN - a software especially optimized for the performance range of the S7-200.
- Wizards for particularly easy and user-friendly operation.

Introduction
SIMATIC Controller

SIMATIC S7-300:
For system solutions with focus on the manufacturing industry

SIMATIC S7-300

PLC with modular expansion capability, mainly for applications in the manufacturing industry.

Complete integration in Totally Integrated Automation:

- Efficient configuring and programming with STEP 7 - also with the engineering tools.
- Networking via MPI and SIMATIC NET - now also with PROFINET.

The graduated CPU range, from entry-level CPUs right up to high-performance CPUs, permits short machine cycle times thanks to efficient processing speeds.

The following CPUs are available:

- Standard CPUs, also with integrated PROFINET interface.
- Failsafe CPUs for implementing failsafe applications with the PROFIsafe profile and failsafe signal modules.
- Compact CPUs with integrated I/O, integrated technological functions and integrated communications interfaces for special tasks.
- Technology CPUs with integrated technology and motion control functionality.

1) Depends on the programming, e.g. 36 KB F-instructions possible.
2) Depends on the programming, e.g. 100 KB F-instructions possible.

SIMATIC S7-300:
For system solutions with focus on the manufacturing industry

The Micro Memory Card (MMC) as data and program memory renders buffer batteries superfluous. An entire project incl. symbols can be stored on the MMC, enabling simple program updates. Thanks to write and read access in RUN, measured values can be archived and recipes can be processed as well.

Modular expansion capability and up to 3 expansion units.

Modular system with hardware and software components for implementing technological functions.

Thanks to its compact design it is perfectly suited to limited space conditions and distributed configurations.

Easy installation with DIN rail and modules with integrated backplane bus, no need to adhere to slot rules.

Maintenance-free operation without fans.

Powerful diagnostics functionality to achieve a higher availability of the control.

Introduction
SIMATIC Controller

SIMATIC S7-400:
For system solutions in production technology and process engineering

SIMATIC S7-400

PLC with excellent dynamics for system solutions in the manufacturing and process technology.

Completely integrated in Totally Integrated Automation:

- Efficient configuring and programming with STEP 7 and the engineering tools.
- Networking via MPI and SIMATIC NET.

Extremely high level of performance with very short command processing times and deterministic response times.
Well suited for executing programs involving many computing tasks.
Fast communication via Ethernet and efficient connection down to the field level via PROFIBUS.
Versatile module range:

- Graded CPU performance, additionally multi-computing
- Function and communication modules for technological tasks, networking and connection to the IT world

Hot swapping of the signal modules.
Efficient configuring with high-level languages, e.g. SCL, and graphical engineering tools.
Powerful diagnostics functions to achieve a higher availability of the control.
Storage of all project data (e.g. program sources) direct on the CPU to support with service jobs.
Special variants - based on the standard PLC - for applications with demands on the high availability and fail-safety as well as PC-based solutions.

SIMATIC C7: PLC and OP in one compact unit

SIMATIC C7

Compact unit for implementing complete machine control systems incl. visualization where space is at a premium, e.g. for the manufacturing industry or simple process engineering tasks.

Low-cost solution consisting of an S7-300 CPU and a line-oriented or pixel-graphics operator panel, i.e. PLC and OP basic functionality in one device.

Compact housing that is easily installed, with permanent wiring, rugged membrane keyboard, and backlit display.

Supports Cyrillic and various Asian character sets (Chinese, Korean, Japanese).

Customized design for optimum adaptation to the machine.

Low engineering overhead with STEP 7 programming. ProTool/WinCC flexible configuration and use of the shared data management system.
Product variants with regard to communication interfaces (MPI, DP), onboard I/O and S7-300 modules can be added, e.g. also for technological tasks.

Introduction
SIMATIC PG

SIMATIC PG:
Complete programming tools and fully-fledged PC

Completely equipped programming tools for the SIMATIC Controllers and other automation components
- Programming software installed ready for operation
- All required interfaces and connecting cables are included

With the Windows operating system installed it is also a fully-fledged PC for all types of office applications.
Rugged, industry-standard design with high resistance to shock and vibration and immunity to interference.

SIMATIC Field PG®

Mobile and industry-standard PG in notebook computer format.
Designed mainly for commissioning, service and maintenance of automation systems.
Thanks to its compact dimensions and weight of less than 4 kg, it can be optimally used at locations where space is at a premium.
With high-performance lithium ion battery for several hours of off-mains operation.

SIMATIC Power PG®

Flexible programming workstation with powerful components from the Desktop PC segment.
Designed mainly for configuring and programming as well as simulations and tests.
With wireless full PC keyboard that can be placed anywhere on your desk.
Further information can be found at:

http://www.siemens.com/simatic-pg

Introduction
SIMATIC PC

SIMATIC PC: Always the right industrial PC

Professional automation solutions place varying, high demands on the industrial PCs used - vibration, low temperatures, heat, steam - year after year and around the clock. SIMATIC PCs are the ideal industry-standard PC platforms for this environment. SIMATIC PCs can offer

- high system availability,
- high investment protection,
- excellent industrial functionality.

A wide range of different designs is available for different applications:

SIMATIC Box PC
Compact and rugged industrial PC for installation direct at the machine.

SIMATIC Rack PC
Flexible industrial PC for installation in 19" cabinets.

SIMATIC Panel PC
Compact industrial PC for operator control and monitoring direct on site. SIMATIC PCs can be individu-a-lly configured. Special customer requests, for example regarding design, and hardware expansions can be implemented project-specifically. For individually expanding the system availability, there are add-on components that are perfectly matched to each other. SIMATIC PCs are the ideal platform for PC-based automation and can be used in the manufacturing and process industry as well as in semi-industrial applications, such as transport systems, building management systems and warehouse systems.

Further information can be found at:

http://www.siemens.com/simatic-pc

Box PC	Rack PC	Panel PC
SIMATIC Microbox PC 420	**SIMATIC Rack PC Industrial Lite 40 S**	**SIMATIC Panel PC Industrial Lite 70 and 77**
Ultra-compact for use directly at the machine	High performance and scaleability	Low-cost entry-level version for basic industrial requirements
Maintenance-free thanks to operation without fan and hard disk	PCI- and AGP-Slots	Basic industrial capability: vibration load 0.25 g, shock 1.0 g (in operation)
PC components from the Intel Embedded line with long-term availability	CE marking for industry and office	High electromagnetic compatibility: CE marking for industrial applications
Scalable and expandable with up to 3 PC/104/*Plus* modules	Dust protection	Latest PC technology
High system availability by rugged, EMC-suitable design	Service-friendly	PCI slots

Maximum compactness and performance	**SIMATIC Rack PC 840**	High electromagnetic compatibility: CE marking for industrial applications
Can be operated at high temp. levels	Protection against vibration/shock during operation	High industrial functionality: PROFIBUS/MPI integrated, Ethernet on board ISA and PCI slots Low mounting depth (Panel PC 670), Maximum expandability (Panel PC 870) Optional direct control key module Distributed configuration (optional)
Powerful diagnostics	Can be operated at high temp. levels	
Integrated PROFIBUS/MPI interface (optional)	Efficient self-diagnostics	PC diagnostics/signaling software
ISA- and PCI-Slots	Integrated PROFIBUS/MPI interface (optional)	Second hard disk (optional)
High flexibility and expandability with the components	ISA- and PCI-Slots	
Long-term availability of spare parts	High flexibility and expandability with the components	
	Long-term availability of spare parts	

Introduction
SIMATIC Industrial Software

The future-oriented software basis

SIMATIC Industrial Software is one of the main components of Totally Integrated Automation and offers the perfect tool for any automation task and project phase. Whether in manufacturing or process technology, in mechanical or plant engineering, with SIMATIC Industrial Software you can tap the full engineering workflow potential.

- Fewer interfaces thanks to the integrated engineering environment for logic modules, HMI, motion control and process technology.
- Fast implementation of the process design in the automation structure thanks to system-wide engineering from a central control point.
- Shorter design and implementation times thanks to structured, process-oriented programming methodology.
- Reduced overhead for follow-up projects thanks to modules that can be easily re-used.
- Less overhead for entering data and no inconsistencies thanks to a shared database.
- Less overhead thanks to user-friendly configuring instead of programming.
- Shorter training periods for the programming and maintenance personnel thanks to intuitive operation and the use of standard languages.
- Application software can be transferred thanks to the shared engineering environment for PLC- and PC-based solutions.
- Increased plant availability thanks to efficient process diagnostics.

Standard Tools

- STEP 7,
  the basic engineering platform for all SIMATIC Controllers.
- STEP 7 Professional,
  the comprehensive Engineering Suite for all SIMATIC Controllers.
- STEP 7 Lite,
  the low-cost, entry-level software.

Engineering Tools

- SIMATIC iMap,
  software for Component based Automation.
- S7-HiGraph,
  state diagrams.
- CFC,
  function charts.
- Distributed Safety Software,
  configuring of failsafe applications
- DOCPRO,
  generation of plant documentation.
- S7-PDIAG,
  process diagnostics.
- TeleService,
  remote maintenance and remote interfacing.
- D7-SYS,
  configuring of closed-loop control tasks.

Further information can be found at:
http://www.siemens.com/simatic-software

Introduction
SIMATIC PC-based Control and Embedded Control

WinAC – The SIMATIC S7 in the PC

PC-based Control

SIMATIC WinAC supplements SIMATIC S7 with PC-based controls. It is used when different tasks, such as data processing, communication, visualization and technology, are to be integrated on one PC.

SIMATIC WinAC is available in two basic versions:

- **SIMATIC WinAC Software PLCs** for tasks that require high flexibility and openness.
- **SIMATIC WinAC Slot PLCs** if the focus is on PC-independent operation, availability and high operational reliability.

With the open and powerful interfaces, SIMATIC WinAC is the ideal **platform for tailor-made automation solutions**.

SIMATIC WinAC hardware and software can be used on SIMATIC PCs and most commercially available PCs with the Professional versions of Windows 2000/XP.

SIMATIC WinAC can be easily combined with components from other manufacturers and can be integrated into the Office world over the standard interface OPC (OLE for Process Control).

Furthermore, SIMATIC WinAC permits easy horizontal integration of technological applications. For this purpose, the ODK (Open Development Kit) permits the integration of C++ programs into the WinAC control program and thus access to all hardware and software components of the PC.

Programming of WinAC is implemented with the standard SIMATIC programming tools - with STEP 7 or, if required, with the tried and tested engineering tools. SIMATIC WinAC is code-compatible with SIMATIC S7-400, i.e. program sections generated for SIMATIC S7-300 and S7-400 can continue to be used in WinAC and vice versa.

SIMATIC WinCC and ProTool/Pro can be connected via a SIMATIC interface to be able to use the comprehensive diagnostics functionality and the shared database, for example. The PG/OP communication permits the connection of SIMATIC programming devices and operator panels.

Embedded Control

With WinAC Embedded Control, a new class of devices for control and visualization at the machine level on one platform is added to the SIMATIC product range.

SIMATIC WinAC MP is the soft PLC under Windows CE and runs on the MP370 multi-functional platform. WinAC MP is the most economical solution for deterministic processes in connection with a rugged hardware platform. It is also ideal for data-intensive tasks.

The SIMATIC MP370 provides the cost-optimized, rugged hardware platform and the visualization software for this purpose. The operator panels and programmable logic controllers are designed without a hard disk and fan and are thus real-time capable and deterministic.

Introduction
SIMATIC DP

The fast fieldbus as system bus

Distributed I/O

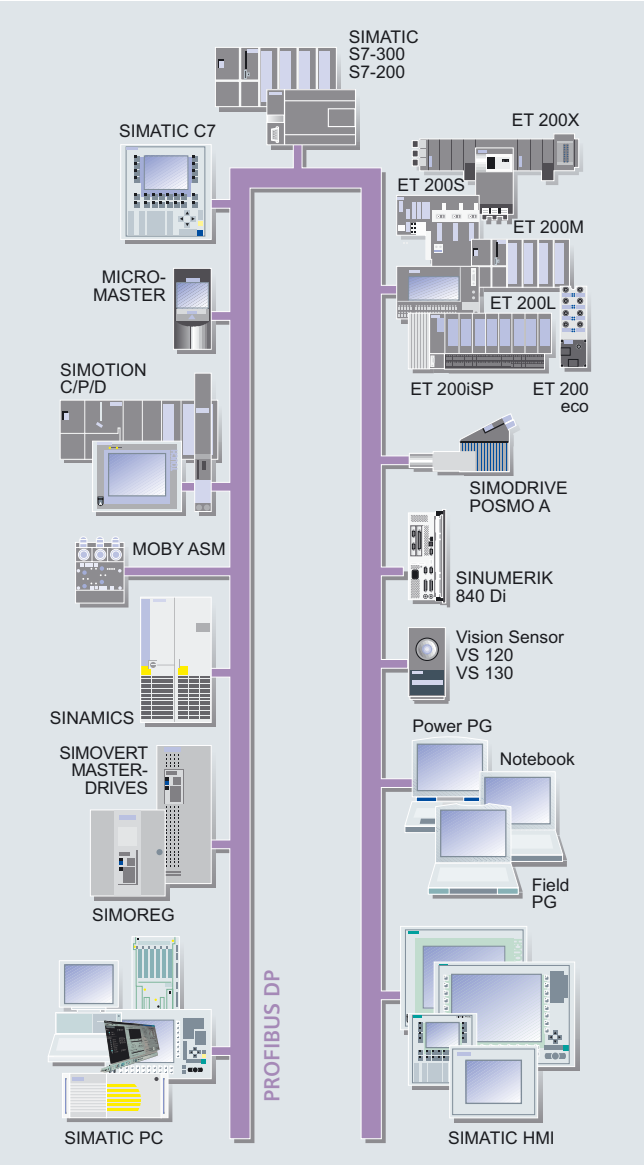
Decentralized structures are widely accepted because they are more flexible, easier, and many times more cost-effective.
In this context, an integrated concept has been implemen-ted with SIMATIC in connection with the PROFIBUS fieldbus which permits extremely high system performance.
Furthermore, PROFIBUS offers trend-setting innovations:

- PROFIsafe for transmitting safety-relevant signals over the fieldbus
- With PROFIdrive for Motion Control, the fieldbus becomes a drive bus as well
- PROFINET - the innovative and open Industrial Ethernet standard for industrial automation from the field level right up to the management level.

The system is integrated: SSIMATIC does not differentiate any longer between centralized and distributed I/O. One software package suffices for implementing hardware configuration, parameterization, tests, commissioning and documentation of all components. You can program and diagnose online from any location in the plant. Drives are also perfectly integrated into this concept.
The system is powerful: The interfaces have been integrated into a number of controller CPUs. This type of connection avoids the execution times at the interface and the backplane bus and saves space and costs while retaining full performance and speed.
I/O devices with distributed intelligence accept CPU tasks on site and off-load the central control even more.
In addition to I/O devices with distributed intelligence, drives communicate as slaves over PROFIBUS DP.
The Drive Engineering System (Drive ES) is totally integrated in the SIMATIC Manager and permits easy and fast integration of drives in the SIMATIC environment.
Thanks to the new functions of PROFIBUS DP - operation in isochrone mode for open-loop control and synchronization of drives via the bus, and internode communication for direct communication between drives and I/O - Motion Control tasks can be implemented on different hardware platforms (e.g. PC, PLC, or drive).
Different converter series are available depending on the drive task:

- SIMOTION C/P/D
- SINAMICS
- MICROMASTER/COMBIMASTER
- SIMODRIVE 611 universal
- SIMODRIVE POSMO
- Intelligent drives SIMOVERT MASTERDRIVES

The System is flexible:
Additional bus systems can be connected using couplers, e.g. the binary networking system AS-Interface, the bus system PROFIBUS PA for applications in hazardous areas or, of course, Industrial Ethernet/PROFINET.



A comprehensive range of distributed I/O devices is available. SIMATIC ET 200 can offer the right device for any application:

- ET 200M, ET 200S, ET 200L for the control cabinet with IP20 degree of protection.
- ET 200iSP for hazardous areas (IP30)
- ET 200X. ET 200R,ET 200eco for cabinet-less distributed configurations with IP65/67 degree of protection.
- ET 200 also integrate pneumatic connection, CPU perfor-mances, technology functions, motor starters, frequency converters, or even safety technology.

Introduction
SIMATIC HMI

Maintaining the overview easily

To maintain the overview, operator control and monitoring systems are becoming increasingly important - also in the lower performance range.

In this context SIMATIC is relying heavily, within the framework of Totally Integrated Automation, on the SIMATIC HMI system family - from Panels over PC-based single-user systems right up to networked Client-Server structures.

The HMI systems request the process data required for their configured sequence diagrams from the SIMATIC controller. The transfer is then implemented fully automatically and does not need to be included in the user program.

The configuration of the operator panels at machine level from the smallest Micro Panel to the PC, is executed with **WinCC flexible** (or ProTool). WinCC flexible considerably increases the efficiency of configuration in this case.

WinCC flexible is based on the latest software technologies and supports the project engineer with its user-friendly operator interface, libraries with pre-generated objects and picture blocks and intelligent tools. Text export/import and automatic translation permit the generation of multi-language configurations.

Additional options permit that new innovative automation concepts and additional service and maintenance functions are added to the application range of the SIMATIC operator panels and PC-based single-user systems.

TCP/IP communication permits that each operator panel can access the other to obtain variables and pictures. Thus operator panels with plant-wide access to process values and pictures, distributed operator panels on large, geographically separated machines, or simple local control station solutions can be implemented.

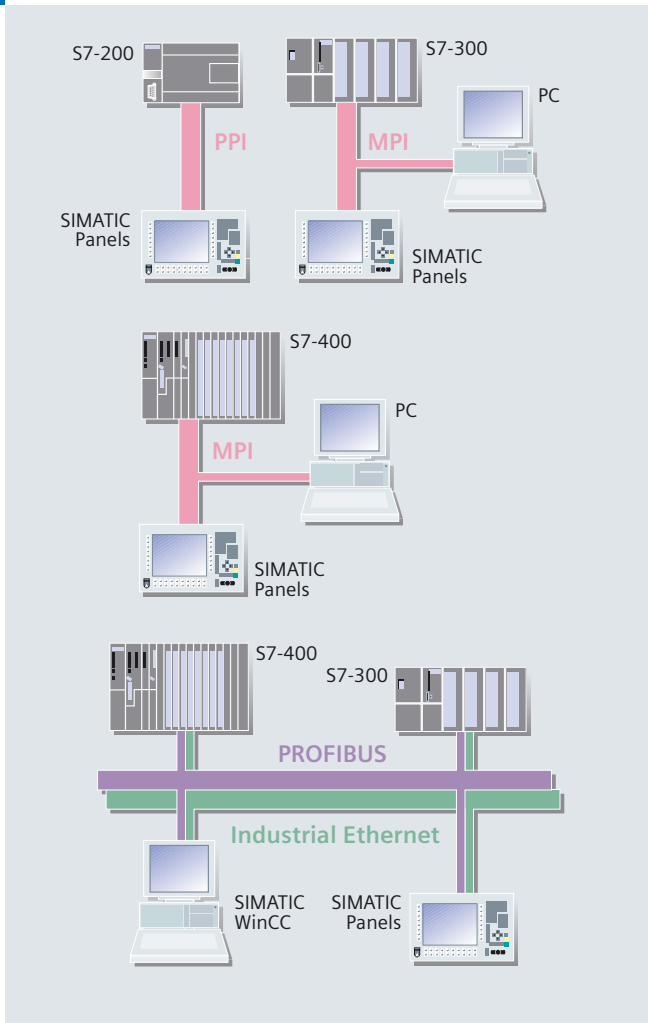
Event-triggered forwarding of emails, diagnostic functions, remote operation of local control stations over the intranet/Internet, as well as service and maintenance functions accelerate the entire process sequence from the disturbance to fault clearance.

Existing ProTool projects can be integrated or converted without a problem and ensure continued investment protection of prior engineering services.

The Runtime software **WinCC flexible Runtime** is used for PC-based single-user solutions at the machine level under Windows 2000/XP. It includes the visualization and signaling components and can be expanded as required using option packages.

SIMATIC WinCC from the SIMATIC HMI product range is available as PC-based process visualization system.

SIMATIC WinCC can be used as single-user system or in networked Client-Server configurations as multi-user system under Windows 2000/XP. Software packages, graded according to the number of variables, and option packages



offer individual connection options in case of increasing quantity structures and functional expansions.

Archive data are stored in a relational database (MS SQL Server 2000) and can be read from there, e.g. over OLE-DB. Applications executing parallel with WinCC, e.g. MS Excel, can request process data via open standard interfaces. Furthermore, commercially available OCX (OLE Custom Controls) can be integrated.
Thanks to the Windows-compliant operator interface, fast and easy configuring is possible, e.g. integration of existing standard and application programs. Online configuring permits modifications on site without interrupting the ongoing operator control and monitoring process.

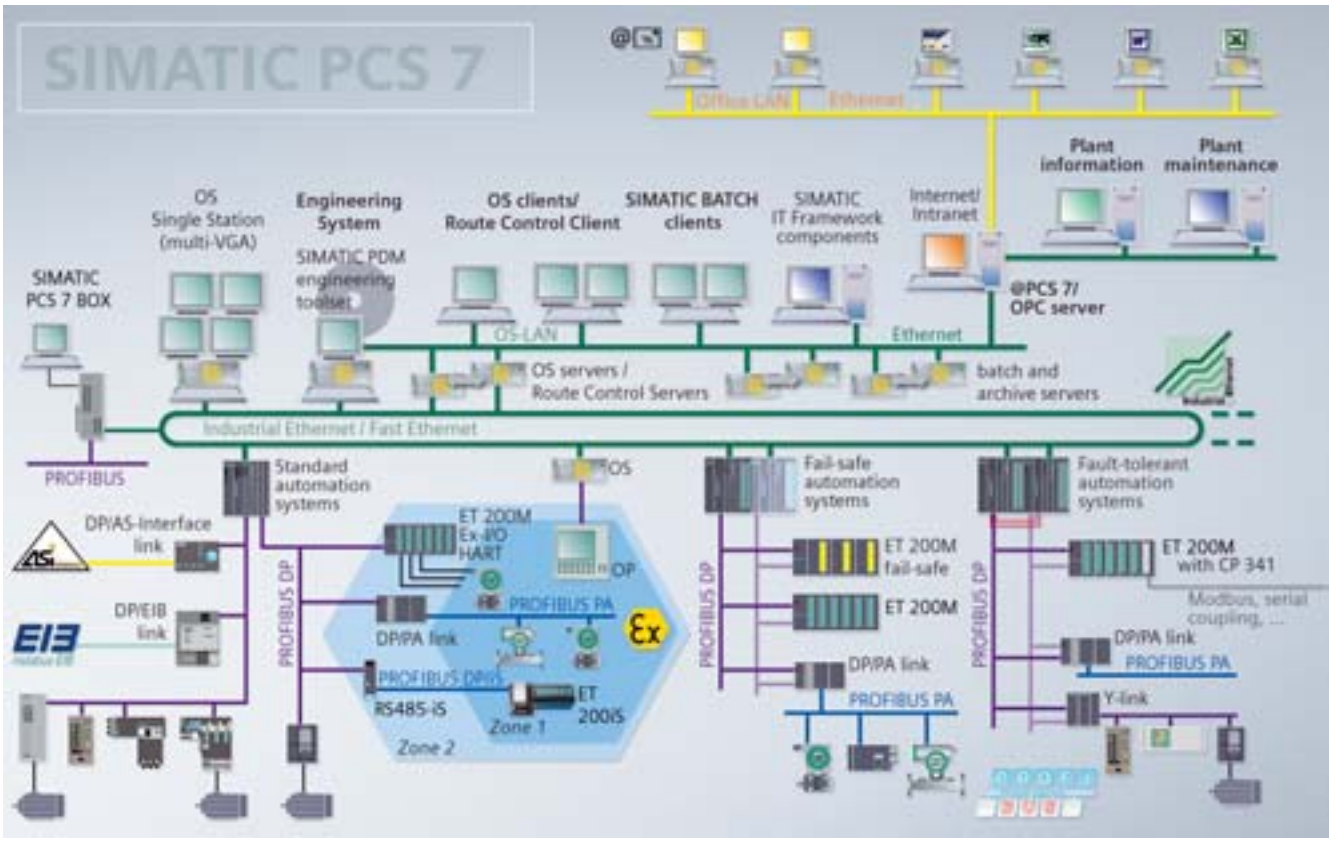
Introduction
SIMATIC PCS 7



SIMATIC PCS 7 –
The process control system from Totally Integrated Automation

With Totally Integrated Automation (TIA), Siemens offers integrated automation technology for the entire process sequence based on one single platform, from incoming goods to production and primary processes and downstream processes (secondary processes) all the way to outgoing goods. This integrated automation technology has the purpose of optimizing all operating procedures within a company, from the Enterprise Resource Planning (ERP) level over the Management Execution System (MES) level and Control level right down to the field level.

Horizontal integration

Horizontal integration means that uniform standard hardware and software components from the SIMATIC product range are used for the entire production process - from incoming goods to primary processes and downstream processes (secondary processes) all the way to outgoing goods.

As the process control system in the enterprise-wide automation network Totally Integrated Automation, SIMATIC PCS 7 utilizes selected standard hardware and software components from the TIA modular system. With its integrated data management, communication and configuration, it also provides an open platform for modern, future-oriented and economic automation solutions in all sectors of the process industry, manufacturing industry and hybrid industry (combination of continuous/batch processes and discrete manufacturing, e.g. in the glass or pharmaceutical industries).

While secondary and logistics processes in the process and hybrid industry are frequently automated by Motion Control and SIMATIC components, the SIMATIC PCS 7 process control system takes over when it comes to primary processes.

In the TIA network, SIMATIC PCS 7 does not only handle the usual process control tasks, but it can also automate secondary processes (e.g. filling, packaging) or incoming goods and outgoing goods logistics (e.g. material supply, storage) for a production site.

Vertical integration

A characteristic of vertical integration is the integrated and transparent data communication from the ERP level over the MES level and control level right down to the field level. It is characterized by the increasing amalgamation of automation technology and information technology and their standards in the course of establishing company-wide information networks. This permits the modularization and standardization of entire subprocesses and thus a considerable increase in production flexibility.

The vertical integration of SIMATIC PCS 7 into the company environment comprises two aspects:

- Integration into the company-wide information network and
- Integration of field technology.

By linking the automation level with the IT world, process data are made available company-wide for evaluation, planning, coordination, and optimization of operating procedures as well as production and business processes. At the same time the requirements of international and distributed companies are considered.

SIMATIC PCS 7 relies on PROFIBUS technology for integrating distributed field systems. The PROFIBUS is simple, rugged and reliable and is used worldwide in all sectors of the process, manufacturing and hybrid industry - for incoming and outgoing goods logistics as well as for primary and secondary processes. It supports redundancy and fail-safety as well as online extendibility and can be used in standard environments as well as in hazardous areas, whereby it does not matter whether the plant is equipped with classical signal inputs and outputs at the remote I/O ET 200 or with the state-of-the-art field devices.

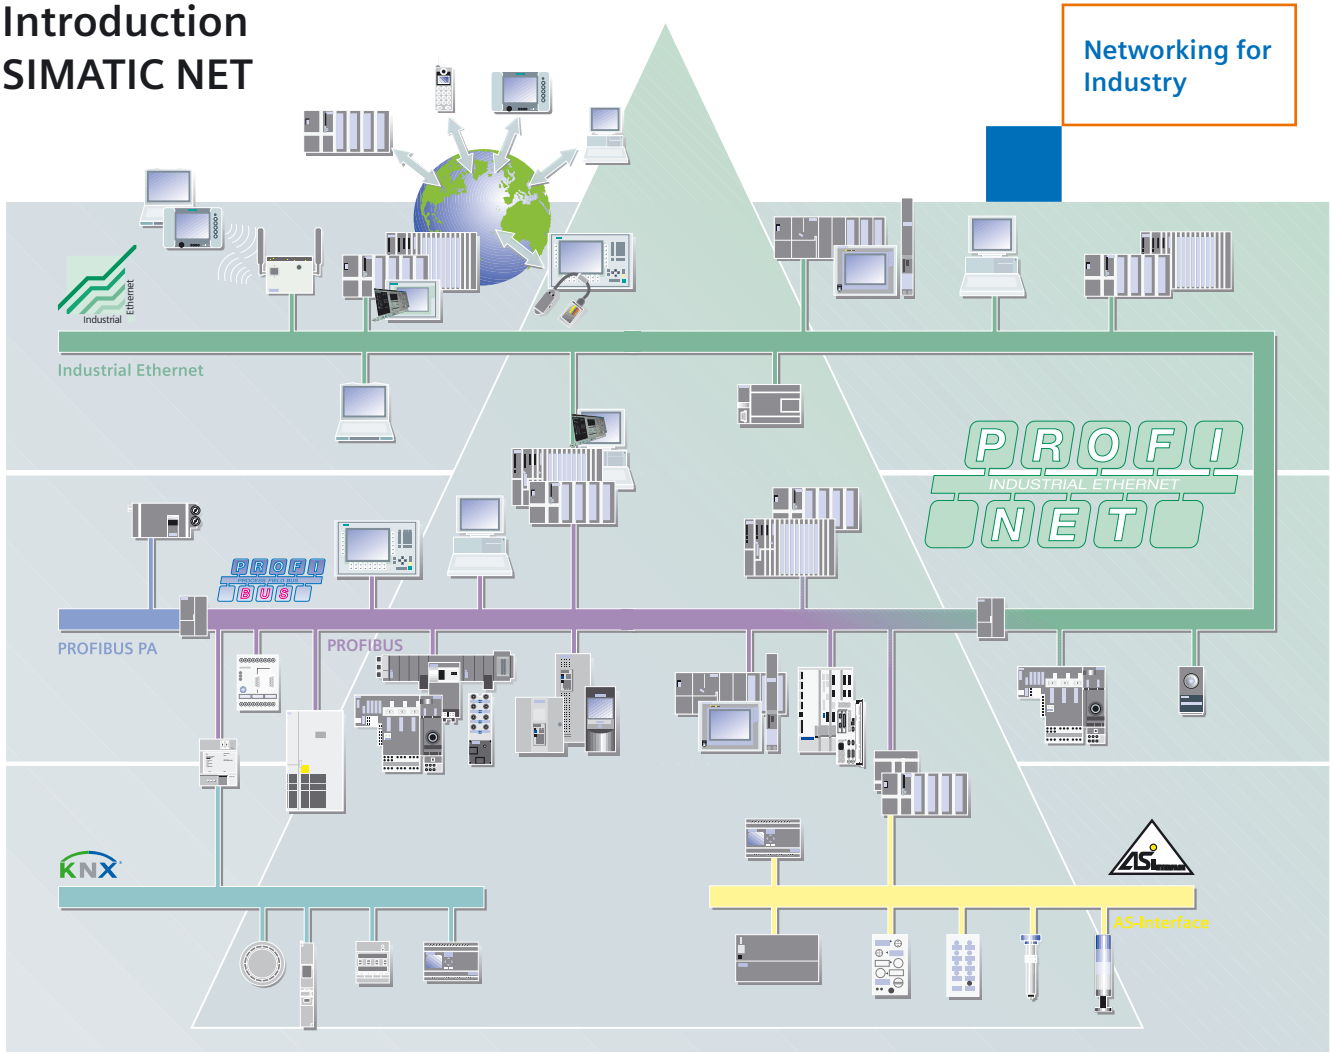
Further information can be found at:

http://www.siemens.com/simatic-pcs7

and in the ST PCS 7 Catalog.

Introduction
SIMATIC NET

Networking for Industry



Communication

Communications networks are an important component of automation solutions. SIMATIC NET Networking for Industry offers a wide range of modular components - designed for industry - to solve your communications tasks efficiently:

- For the different automation tasks
- Throughout the entire workflow.
- Throughout the plant's entire life cycle.
- For all sectors.

SIMATIC NET offers solutions that not only utilize the benefits of Ethernet, but also easily integrate fieldbus systems.

Some prominent examples are:

- Making the field level available for Industrial Ethernet applications.
- Uniformity from the field level right up to the corporate management level.
- Pushing ahead with mobile communication.
- Integration of IT technologies.

SIMATIC NET supports the following bus systems:

Industrial Ethernet (IEEE 802.3 and 802.11) –
today the international standard for area networking is the global No. 1 network in the LAN sector with a share of over 80 %.

High-performance communications networks spanning large distances can be created over Industrial Ethernet.

The international **PROFINET** standard uses Industrial Ethernet and permits real-time communication down to the field level. If existing IT standards are completely utilized, PROFINET also permits Motion Control applications on Industrial Ethernet in isochrone mode.

PROFIBUS (IEC 61158/EN 50170) –
the international standard for the field level is the global market leader in the fieldbus area. As only fieldbus it permits communication both in production- and process-oriented applications.

AS-Interface (IEC 62026-2/EN 50295) –
as low-cost alternative to the cable harness, AS-Interface links sensors and actuators over a two-wire line.

KNX (EN 50090, ANSI EIA 776) –
the global standard KNX is the basis for building automation. Network transitions are implemented via controls or links.

LOGO! logic module

2

LOGO! logic module

Overview

LOGO! logic module

- The compact, easy-to-use and lo w-cost solution for simple control tasks
- Compact, easy to operate, univ ersally applicable without accessories
- "All in one": Integrated display and operator panel
- 34 different functions can be lin ked by pressing a key or with PC software; up to a total of 130 times
- Functions can be changed easily at the touch of a button. No need for complex and time-consuming rewiring

SIPLUS LOGO! logic module

- The PLC for use in the harshest environmental conditions
- With extended temperature range from -25 to +70°C
- Suitable for extraordinary medial load (pollution gas atmosphere)
- Occasional short-term condensation and increased mechanical loading permissible
- With the proven PLC technology of the S7-200
- Convenient handling, programmi ng, maintenance and service
- Ideal for use in the automotive industry, environmental technology, mining, chemical plants, production technology, food industry etc.
- The alternative to expensive custom solutions

More Information you can find at:

http://www.siemens.com/siplus

General technical specifications SIPLUS LOGO!

Ambient temperature	
Temperature	Horizontal mounting: -25 °C to 70 °C Vertical mounting: -25 °C to 50 °C
Relative humidity	5 to 95%; transient condensation permissible, corresponding to relative humidity (RH-) stress grade 2 according to IEC 1131-2 and IEC 721 3-3 Cl. 3K5
Transient icing	-25 °C to 0 °C IEC 721 3-3 Cl. 3K5
Atmospheric pressure	1080 to 795 hPa corresponding to a height of -1000 to 2000 m
Pollutant concentration	SO2: < 0,5 ppm; relative humidity <60% Test: 10 ppm, 4 days H2S: < 0,1 ppm; relative humidity <60% Test: 1 ppm, 4 days (according to IEC 721 3-3; Class 3C3)
Mechanical environmental conditions	
Vibrations	Type of vibration: frequency progressions changing at 1 octave per minute. 2 Hz ≤ f ≤ 9 Hz, constant amplitude 3,0 mm 9 Hz ≤ f ≤150 Hz, constant acceleration 1 g; Duration of vibration: 10 frequency progressions per axis in each direction of the three mutually perpendicular axes; Vibration testing according to IEC 68 section 2-6 (Sinus) and IEC 721 3-3, Class 3M4
Shock	Type of shock: semisinusoidal shock strength: 15 g peak value, duration shock direction 11 ms: 3 shocks each in +/- direction on each of the mutually perpendicular axes Shock testing according to IEC 68 section 2-27
Conformity	EN 50155 (railroad applications - electronical device on rail vehicles)

LOGO! CM EIB/KNX communication module

Overview

- Expansion module fo r LOGO! basic versions
- For communication between the LOGO! master and external *EIB* components through *EIB*

Technical specifications

CM EIB/KNX	
Supply voltage	24 V AC/DC
Inputs, max.	16 DE/12 DA/8 AE/2 AA
Outputs, max.	16 digital
Continuous current	25 mA
Short-circuit protection	External fuse protection is required
Integrated time switches/power reserve	–
Ambient temperature	0 to +55 °C
RI specification	To EN 55 011 (limit class B)
Degree of protection	IP20
Certification	to VDE 0631, IEC61131-2, cULus, FM
Mounting	On DIN rail 35 mm, 2 module widths wide
Dimensions (W x H x D) in mm	36 (2 TE) × 90 × 55

Overview

Each LOGO! can now be connected to the AS-Interface system

An intelligent slave can be integrated into the AS-Interface system with the AS-Interface for LOGO! The modular interface allows the different basic units to be integrated into the system depending on the required functionality. In addition, the functionality can be quickly and simply adapted to changed requirements by replacing the basic unit.

The interface provides four inputs and four outputs for the system. These I/Os, however, are not implemented in hardware, but are only virtually available via the interface.

Technical specifications

Supply voltage in V	24 V DC	
Inputs/outputs	4 / 4 (virtual inputs/outputs)	
Bus connection	AS-Interface according to specification	
Ambient temperature in ℃	0 ... +55	
Degree of protection	IP20	
Mounting	onto standard mounting rail	
Dimensions (W x H x D) in mm	36 x 90 x 58	
LED displays	*LED*	*Status*
	Green	OK
	Red	No data traffic
	Flashes red/yellow	Zero address

AS-Interface connection for LOGO!	**3RK1 400-0CE10-0AA2**

LOGO!Power, LOGO!Power 12 V

Application

LOGO!Power supplies are primary switched-mode power supplies that are optimized to the LOGO! logic modules in terms of functionality and design.

In accordance with the required performance, the LOGO!Power supplies are available in two sizes, whereby the new generation is now even more compact despite the extended functionality. The width of the smaller type is only 54 mm now instead of the previous 72 mm and the larger type has been reduced in size from 126 mm to 72 mm. An extremely compact 4 A type with only 90 mm width completes the LOGO!Power family. An LED indicates whether the output voltage level is correct and, in the event of an overload or short-circuit, the primary switched-mode regulator delivers a constant current, i.e. without restart attempts.

LOGO!Power naturally supplies the small LOGO! control modules. They can, however, also be used elsewhere. Apart from their function as system power supplies, LOGO!Power is also suitable for supplying other consumers in the low-end performance range. With the wide input range of 85 V to 264 V AC and radio interference level B, they can be used universally in a diverse range of applications in the low-end performance range. Because the advantages of the primary switched-mode regulator convince customers right down the line.

For example:

- Enhanced protection of connecte d loads thanks to the regulated output voltage
- Low power loss in the control cabinet thanks to the high efficiency
- Compact design and low weight.

And LOGO!Power is predestined for equipment combinations in standard N distribution boards thanks to

- Mounting on a 35 mm standard rail
- Low mounting depth and stepped cross-section.

Of course, the power supplies comply with the relevant European and American regulations.

Overview

- The user-friendly software for creating control programs on a PC
- Creation of control programs in Control System Flowchart (CSF) or Ladder Diagram (LAD)
- Plus testing, simulation, online testing and archiving of control programs
- Professional documentation via numerous comment and print functions

Minimum system requirements

Windows 95/98, NT 4.0, ME, 2000 or XP

- Pentium PC
- 90 MB free disk space
- 64 MB RAM
- SVGA graphics card with minimum resolution 800x600 (256 colors)

Mac OS X

- PowerMac G3, G4, G4 Cube, IMac, PowerBook G3, G4 or iBook

Linux (tested using Caldera OpenLinux 2.4)

- Will function on all Linux distributions on which Java 2 SDK version 1.3.1 is running
- Please refer to your respective Linux distribution for the hardware requirements.

S7-200

3

Overview

SIMATIC S7-200

- The micro PLC offers maximu m automation at minimum cost
- Extremely simple installation, programming and operation
- Large-scale integration, space-saving, powerful
- Can be used both for simple controls and for complex automation tasks
- All CPUs can be used in stan dalone mode, in networks and within distributed structures
- Suitable for applications where programmable controllers would not have been viable in the past
- With outstanding real-time performance and powerful communication options (PPI, PROFIBUS DP, AS-Interface)
- Shipbuilding certification from
  - American Bureau of Shipping (ABS)
  - Bureau Veritas (BV)
  - Des Norske Veritas (DNV)
  - Germanischer Lloyd (GL)
  - Lloyds Register of Shipping (LRS)
  - Registro Italiano Navale (RINA)
  - Nippon Kaiji Kyokai (NK)

SIPLUS S7-200

- The PLC for use in the hars hest environmental conditions
- With extended temperature range from -25 to +70°C
- Suitable for extraordinary medi al load (pollution gas atmosphere)
- Occasional short-term conden sation and increased mechanical loading permissible
- With the proven PLC te chnology of the S7-200
- Convenient handling, programmi ng, maintenance and service
- Ideal for use in the automotive industry, environmental technology, mining, chemical plants, production technology, food industry etc.
- The alternative to expe nsive custom solutions

Technical specifications

General Technical specifications SIMATIC S7-200	
Degree of protection	IP20 in accordance with IEC 529
Ambient temperature	
•Operation (95% relative humidity)	
- With horizontal mounting	0 to 55℃
- With vertical mounting	0 to 45 ℃
•Transport and storageGeneral	-40 to +70 ℃
- with 95% relative humidity	25 to 55 ℃
Isolation	
•5/24 V DC circuits	Test voltage 500 V AC
•115/230 V AC circuits to ground	Test voltage 1500 V AC
•115/230 V AC circuits to 115/230 V AC circuits	Test voltage 1500 V AC
•230 V AC circuits to 5/24 V DC circuits	Test voltage 1500 V AC
•115 V AC circuits to 5/24 V DC circuits	Test voltage 1500 V AC
Electromagnetic compatibility	Requirements of EMC law
•Noise immunity to EN 50082-2	Tested according to: IEC 801-2, IEC 801-3, IEC 801-4, EN 50141, EN 50204, IEC 801-5, VDE 0160
•Emitted interference according to EN 50081-1 and EN 50081-2	Tested according to EN 55011, Class A, Group 1 and EN 55011, Class B, Group 1
Mechanical rating	
•Vibrations, tested according to/tested with	IEC 68, Part 2-6: 10 to 57 Hz; constant amplitude 0.3 mm; 58 to 150 Hz; constant acceleration 1 g (mounted on DIN rail) or 2 g (mounted in control cabinet); type of vibration: frequency cycles with a rate of change of 1 octave/minute; vibration duration: 10 frequency cycles per axis in each direction of the 3 mutually perpendicular axes
•Shock, tested according to/tested with	IEC 68, Part 2-27/half-sine: shock strength 15 g (peak value), duration 11 ms, 6 shocks on each of the 3 mutually perpendicular axes

General Technical specifications SIPLUS S7-200	
Ambient temperature	
Temperature	Horizontal mounting: -25 ℃ to 70 ℃ Vertical mounting: -25 ℃ to 50 ℃
Relative humidity	5 to 95%; transient condensation permissible, corresponding to relative humidity (RH-) stress grade 2 according to IEC 1131-2 and IEC 721 3-3 Cl. 3K5
Transient icing	-25 ℃ to 0 ℃ IEC 721 3-3 Cl. 3K5
Atmospheric pressure	1080 to 795 hPa corresponding to a height of -1000 to 2000 m
Pollutant concentration	SO2: < 0,5 ppm; relative humidity <60% Test: 10 ppm, 4 days H2S: < 0,1 ppm; relative humidity <60% Test: 1 ppm, 4 days (according to IEC 721 3-3; Class 3C3)
Mechanical environmental conditions	
Vibrations	Type of vibration: frequency progressions changing at 1 octave per minute. 2 Hz ≤ f ≤ 9 Hz, constant amplitude 3,0 mm 9 Hz ≤ f ≤ 150 Hz, constant acceleration 1 g; Duration of vibration: 10 frequency progressions per axis in each direction of the three mutually perpendicular axes; Vibration testing according to IEC 68 section 2-6 (Sinus) and IEC 721 3-3, Class 3M4
Shock	Type of shock: semisinusoidal shock strength: 15 g peak value, duration shock direction 11 ms: 3 shocks each in +/- direction on each of the mutually perpendicular axes Shock testing according to IEC 68 section 2-27
Conformity	EN 50155 (railroad applications - electronical device on rail vehicles)

CPU 221, 222, 224, 224 XP, 226

Overview

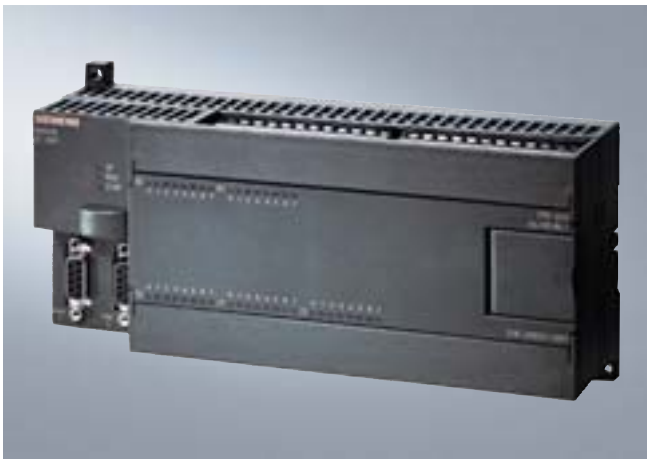
- The smart compact solution
- With 10 inputs/outputs on board
- Not expandable

- The compact high-performance CPU
- With 24 inputs/outputs on board
- Expandable with up to 7 expansion modules

- The superior compact solution
- With 14 inputs/outputs on board
- Expandable with up to 2 expansion modules

- The power CPU
- With 24 digital and 3 analog inputs/outputs onboard
- Expandable with up to 7 expansion modules

Overview



- The high-performance package for complex technical tasks
- With additional PPI port for added flexibility and communication options
- With 40 inputs/outputs on board
- Expansion capability for max. 7 expansion racks

Digital outputs				
•Number of digital outputs	4; Transistor	4; Relay	6; Transistor	6; Relay
•Length of cable shielded, max.	500 m	500 m	500 m	500 m
•Length of cable unshielded, max.	150 m	150 m	150 m	150 m
•Short-circuit protection of the output	No; provided externally	No; provided externally	No; provided externally	No; provided externally
•Limitation of voltage induced on circuit interruption to	1 W		1 W	
Switching capacity of the outputs				
- at resistive load, max.	0.75 A	2 A	0.75 A	2 A
- at lamp load, max.	5 W	30 W DC, 200 W AC	5 W	30 W DC, 200 W AC
Output voltage				
- for 1 signal	20 V DC	L+/L1	20 V DC	L+/L1
Output current				
- for 1 signal rated value	750 mA	2 A	750 mA	2 A
- for 0 signal residual current, max.	0.1 mA	0 mA	10 µA	0 mA
Output delay at resistive load				
- "0" after "1", max.	15 µs; of standard outputs, max. (A0.2 to A0.3) 15 µs; of pulse outputs, max. (A0.0 to A0.1) 2 µs	10 ms; all outputs	15 µs; of standard outputs, max. (A0.2 to A0.5) 15 µs; of pulse outputs, max. (A0.0 to A0.1) 2 µs	10 ms; all outputs
- "1" after "0", max.	130 µs; of standard outputs, max. (A0.2 to A0.3) 100 µs; of pulse outputs, max. (A0.0 to A0.1) 10 µs	10 ms; all outputs	130 µs; of standard outputs, max. (A0.2 to A0.5) 100 µs; of pulse outputs, max. (A0.0 to A0.1) 10 µs	10 ms; all outputs
Parallel switching of 2 outputs				
- to increase power	Yes	No	Yes	No
Switching frequency				
- of pulse outputs, at resistive load, max.	20 kHz; A0.0 to A0.1		20 kHz; A0.0 to A0.1	
Summation current of the outputs (per group)				
- up to 40 °C, max.	3 A	6 A	4.5 A	6 A
- horizontal installation, up to 55 °C, max.	3 A	6 A	4.5 A	6 A
Relay outputs				
•Number of operating cycles		10,000,000; mechanical 10 million, at rated load voltage 100,000		10,000,000; mechanical 10 million, at rated load voltage 100,000
Analog inputs				
•Number of analog potentiometers	1; Analog potentiometer; resolution 8 bits	1; Analog potentiometer; resolution 8 bits	1; Analog potentiometer; resolution 8 bits	1; Analog potentiometer; resolution 8 bits
Sensor supply				
24 V - sensor supply				
- 24 V	Yes; permissible range: 15.4 to 28.8 V	Yes; permissible range: 20.4 to 28.8 V	Yes; permissible range: 15.4 to 28.8 V	Yes; permissible range: 20.4 to 28.8 V
- Short-circuit protection	Yes; electronic at 600 mA	Yes; electronic at 600 mA	Yes; electronic at 600 mA	Yes; electronic at 600 mA
- Output current, max.	180 mA	180 mA	180 mA	180 mA
Sensor				
Connectable encoders				
- 2-wire BEROS	Yes	Yes	Yes	Yes
- permissible closed-circuit current (2-wire BEROS), max.	1 mA	1 mA	1 mA	1 mA

Input delay (at rated value of the input voltage)						
•For standard inputs						
- Parameterizable	Yes; all	Yes; all	Yes; all	Yes; all	Yes; all	Yes; all
- at 0 after 1, min.	0.2 ms	0.2 ms	0.2 ms	0.2 ms	0.2 ms	0.2 ms
- at 0 after 1, max.	12.8 ms	12.8 ms	12.8 ms	12.8 ms	12.8 ms	12.8 ms
•for alarm inputs						
- parameterizable	Yes; I0.0 to I0.3	Yes; I0.0 to I0.3	Yes; I0.0 to I0.3	Yes; I0.0 to I0.3	Yes; I0.0 to I0.3	Yes; I0.0 to I0.3
•for counters/technological functions						
- parameterizable	Yes; (E0.0 to E1.5) 30 kHz	Yes; (E0.0 to E1.5) 30 kHz	Yes; (E0.0 to E1.5) up to 200 kHz	Yes; (E0.0 to E1.5) up to 200 kHz	Yes; (E0.0 to E1.5) 30 kHz	Yes; (E0.0 to E1.5) 30 kHz
Digital outputs						
•Number of digital outputs	10; Transistor	10; Relay	10; Transistor	10; Relay	16; Transistor	16; Relay
•Length of cable shielded, max.	500 m	500 m	500 m	500 m	500 m	500 m
•Length of cable unshielded, max.	150 m	150 m	150 m	150 m	150 m	150 m
•Short-circuit protection of the output	No; provided externally	No; provided externally	No; provided externally	No; provided externally	No; provided externally	No; provided externally
•Limitation of voltage induced on circuit interruption to	1 W		1 W		1 W	
Switching capacity of the outputs						
- at resistive load, max.	0.75 A	2 A	0.75 A	2 A	0.75 A	2 A
- at lamp load, max.	5 W	200 W; 30 W DC, 200 W AC	5 W	200 W; 30 W DC, 200 W AC	5 W	200 W; 30 W DC, 200 W AC
Output voltage						
- for 1 signal	20 V DC	L+/L1	L+ minus 0.4V (5V/20,4V for A0.0 to A0.4; 20,4V A0.5 to A1.1)	L+/L1	20 V DC	L+/L1
Output current						
- for 1 signal rated value	750 mA	2 A	750 mA	2 A	750 mA	2 A
- for 0 signal residual current, max.	10 µA	0 mA	10 µA	0 mA	10 µA	0 mA
Output delay at resistive load						
- "0" after "1", max.	15 µs; of the standard outputs, max. (A0.2 to A1.1) 2 µs; of the pulse outputs, max. (A0.0 to A0.1) 2 µs	10 ms; all outputs	15 µs; of the standard outputs, max. (A0.2 to A1.1) 15 µs; of the pulse outputs, max. (A0.0 to A0.1) 0.5 µs	10 ms; all outputs	15 µs; of the standard outputs, max. (A0.2 to A1.1) 2 µs; of the pulse outputs, max. (A0.0 to A0.1) 2 µs	10 ms; all outputs
- "1" after "0", max.	130 µs; of the standard outputs, max. (A0.2 to A1.1) 10 µs; of the pulse outputs, max. (A0.0 to A0.1) 10 µs	10 ms; all outputs	130 µs; of the standard outputs, max. (A0.2 to A1.1) 130 µs; of the pulse outputs, max. (A0.0 to A0.1) 1.5 µs	10 ms; all outputs	130 µs; of the standard outputs, max. (A0.2 to A1.1) 10 µs; of the pulse outputs, max. (A0.0 to A0.1) 10 µs	10 ms; all outputs
Parallel switching of 2 outputs						
- to increase power	Yes	No	Yes	No	Yes	No
Switching frequency						
- of pulse outputs, at resistive load, max.	20 kHz; A0.0 to A0.1	1 Hz	100 kHz; A0.0 to A0.1	1 Hz	20 kHz; A0.0 to A0.1	1 kHz
Summation current of the outputs (per group)						
- up to 40 °C, max.	6 A	10 A	3.75 A	10 A	6 A	10 A
- horizontal installation, up to 55 °C, max.	6 A	10 A	3.75 A	10 A	6 A	10 A

Chinese	**6ES7 298-8FA24-8FH0**
SIMATIC Manual Collection B) Electronic manuals on CD-ROM, 5 languages: S7-200/300/400, C7, LOGO!, SIMATIC DP, PC, PG, STEP 7, Engineering Software, Runtime Software, PCS 7, SIMATIC HMI, SIMATIC NET	**6ES7 998-8XC01-8YE0**
SIMATIC Manual Collection update service for 1 year B) Up-to-date Manual Collection CD as well as the three subsequent updates	**6ES7 998-8XC01-8YE2**

	Order No.
STEP 7 Micro/WIN V4 programming software *Target system:* All CPUs of the SIMATIC S7-200 range *Requirements:* Windows 2000/XP on PG or PC *delivery type:* English, German, French, Spanish, Italian, Chinese; with online documentation	
Single license B)	**6ES7 810-2CC03-0YX0**
Upgrade single license 1) B)	**6ES7 810-2CC03-0YX3**
PROFIBUS bus connector IP20 with 90° cable feeder	
•without PG connection	**6ES7 972-0BA12-0XA0**
•with PG connection	**6ES7 972-0BB12-0XA0**
PROFIBUS bus connector IP20 with 35° cable feeder	
•without PG connection	**6ES7 972-0BA41-0XA0**
•with PG connection	**6ES7 972-0BB41-0XA0**
PROFIBUS FC Standard Cable for connecting to PPI; standard type with special design for quick mounting, 2-wire, shielded, sold by the meter, up to 1000m, minimum order 20 m	**6XV1 830-0EH10**
Repeater RS 485 for PROFIBUS	**6ES7 972-0AA01-0XA0**

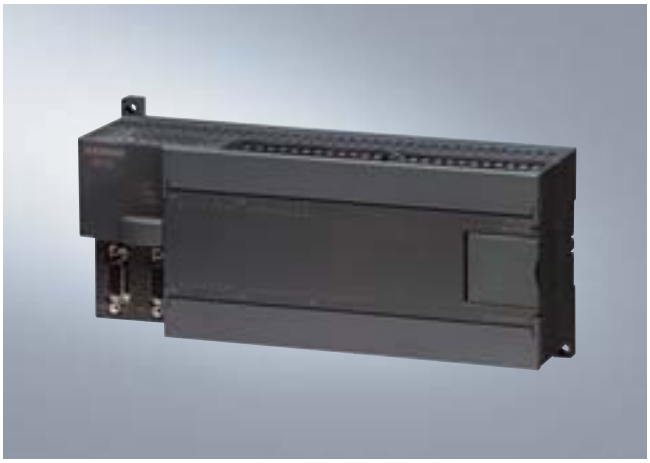
1) Upgrade for all previous STEP 7 Micro/WIN and STEP 7 Micro/DOS versions

A) Subject to export regulations: AL: N and ECCN: EAR99H

B) Subject to export regulations: AL: N and ECCN: EAR99S

SIPLUS central processing units

Overview



- The SIPLUS S7-200 CPUs for us e in the harshest environmental conditions
- With extended temperature range from -25 to +70°C
- Suitable for extraordinary medi al load (pollution gas atmosphere)
- Occasional short-term conden sation and increased mechanical loading permissible
- With the proven PLC te chnology of the S7-200
- Convenient handling, programmi ng, maintenance and service
- The alternative to expe nsive custom solutions

More Information you can find at:

http://www.siemens.com/siplus

Overview

- Digital inputs/outputs to suppl ement the onboard I/Os of the CPUs
- For flexible adaptation of PLC to respective task

	6ES7 221-1BH22-0XA0	6ES7 221-1BF22-0XA0	6ES7 221-1EF22-0XA0
Current consumption			
•from backplane bus 5 V DC, max.	70 mA	30 mA	30 mA
•Power dissipation, typical	3 W	2 W	3 W
Connection system			
•Pluggable I/O terminals	Yes	Yes	Yes
Digital inputs			
•Number of digital inputs	16	8	8
Length of cable			
- Length of cable shielded, max	500 m	500 m	500 m
- Length of cable unshielded, max	300 m	300 m	300 m
•m/p reading	Yes	Yes	
•Input characteristic to comply with IEC 1131, Type 1	Yes		Yes
Input voltage			
- Rated value, AC			230 V; 220/230 V AC (47 to 63 Hz)
- Rated value, DC	24 V	24 V	
- for signal "0"	0 to 5 V	0 to 5 V	to 20 V AC
- for signal "1"	15 to 30 V	15 to 30 V	79 V AC (at 2.5 mA min.)
Input current			
- for 1 signal, typical	4 mA	4 mA	2.5 mA
Input delay (at rated value of the input voltage)			
•For standard inputs			
- at 0 after 1, max.	4.5 ms	4.5 ms	15 ms
Sensor			
Connectable encoders			
- 2-wire BEROS	Yes	Yes	Yes
- permissible closed-circuit current (2-wire BEROS), max.	1 mA	1 mA	1 mA
Potentials/ electrical isolation			
Digital input functions			
- Electrical isolation, digital input functions	Yes; Optocoupler	Yes; Optocoupler	Yes; Optocoupler
- between the channels, in groups of	4	4	1; (8 groups)
Dimensions and weight			
•Weight, approx.	160 g	150 g	160 g
•Width	71.2 mm	46 mm	71.2 mm
•Height	80 mm	80 mm	80 mm
•Depth	62 mm	62 mm	62 mm

Technical specifications EM 222

	6ES7 222-1BD22-0XA0	6ES7 222-1BF22-0XA0
Voltages and currents		
Load voltage L+		
- Rated value (DC)	24 V	24 V
- permissible range, lower limit (DC)	20.4 V	20.4 V
- permissible range, upper limit (DC)	28.8 V	28.8 V
Current consumption		
Digital outputs		
•from backplane bus 5 V DC, max.	40 mA	50 mA
•Power dissipation, typical	3 W	2 W
Connection system		
•Pluggable I/O terminals	Yes	Yes
Digital outputs		
•Number of digital outputs	4	8
•Length of cable shielded, max.	500 m	500 m
•Length of cable unshielded, max.	150 m	150 m
•Short-circuit protection of the output	No; provided externally (see manual package "Installing an S7-200")	No; provided externally (see manual package "Installing an S7-200")
•Limitation of voltage induced on circuit interruption to	L+ (-48 V)	L+ (-48 V)
Output voltage		
- for 1 signal	20 V DC	20 V
Output current		
- for 1 signal permissible range for 0 to 55 °C, max.	5 A	750 mA
- for 0 signal residual current, max.	30 µA	10 µA
Parallel switching of 2 outputs		
- to increase power		Yes
Summation current of the outputs (per group)		
- up to 40 °C, max.	20 A	3 A
- horizontal installation, up to 55 °C, max.	20 A	3 A
- Maximum current per wire/group	5 A	3 A
Relay outputs		
Switching capacity of the contacts		
- at inductive load, max.	5 A	0.75 A
- at lamp load, max.	50 W	5 W
- at resistive load, max.	5 A	0.75 A
Potentials/ electrical isolation		
Digital output functions		
- Electrical isolation, digital output functions	Yes; Optocoupler	Yes; Optocoupler
- between the channels, in groups of	1; 4 groups	4
Dimensions and weight		
•Weight, approx.	120 g	150 g
•Width	45 mm	45 mm
•Height	80 mm	80 mm
•Depth	62 mm	62 mm

SIPLUS digital modules

3

Overview

- Digital inputs/outputs to supp lement the integral I/Os of the CPUs
- For flexible adaptation of the controller to the task
- For subsequent upgrading of the system with additional inputs and outputs

These modules are designed for

- *an ambient range of –25 °C to + 70 °C, condensation permissible*
- *extraordinary medial load (for example by chloric and sulphuric atmospheres)*

Overview

- Analog inputs and outputs for the SIMATIC S7-200
- With extremely short conversion times
- For connections of analog sensors and actuators without additional amplifier
- For solving the more complex automation tasks

Technical specifications EM 231

	6ES7 231-0HC22-0XA0
Current consumption	
•from load voltage L+ (no load), max.	60 mA
•from backplane bus 5 V DC, max.	20 mA
•Power dissipation, typical	2 W
Connection system	
•Pluggable I/O terminals	No
Analog inputs	
•Number of analog inputs	4; Differential
•Length of cable shielded, max	100 m; to sensor
•Permissible input voltage for the voltage input (destruction limit), max.	30 V
•Permissible input voltage for the current input (destruction limit), max.	32 mA
Input ranges (rated values), voltages	
- 0 to +5 V	Yes
- 0 to +10 V	Yes
- -2.5 V to +2.5 V	Yes
- -5 V to +5 V	Yes
Input ranges (rated values), currents	
- 0 to 20 mA	Yes
Characteristic curve linearization	
- for voltage measurement	no
- for current measurement	no
Temperature compensation	
- parameterizable	No

	6ES7 231-0HC22-0XA0
Analog value formation	
Integration and conversion time/triggering per channel	
- with over-range (bits incl. sign), max	12 Bit
- Interference voltage suppression for interference frequency f1 in Hz	40 dB, DC up to 60 V for interference frequency 50 / 60 Hz
- Conversion time (per channel)	250 µs
Displayable conversion value range	
- bipolar signals	-32,000 to +32,000
- unipolar signals	0 to 32000
Error/accuracies	
Interference voltage suppression for f = n x (fl +/- 1 %)	
- Common-mode voltage, max.	12 V
Potentials/ electrical isolation	
Analog output functions	
- Electrical isolation, analog inputs	No
Dimensions and weight	
•Weight, approx.	183 g
•Width	71.2 mm
•Height	80 mm
•Depth	62 mm

Analog modules

Technical specifications EM 232

	6ES7 232-0HB22-0XA0
Current consumption	
•from backplane bus 5 V DC, max.	20 mA
•from sensor current or ext. power supply (24 V DC), max.	70 mA
•Power dissipation, typical	2 W
Connection system	
•Pluggable I/O terminals	No
Analog outputs	
•Number of analog outputs	2
Output ranges, voltage	
- -10 to +10 V	Yes
Output ranges, current	
- 4 to 20 mA	Yes
Burden resistance (in the nominal output range)	
- at voltage outputs, min.	5 kΩ
- at current outputs, max.	0.5 kΩ
Analog value formation	
Integration and conversion time/triggering per channel	
- with over-range	U/12 bits, I/11 bits
Settling time	
- for voltage output function	100 µs
- for current output function	2 ms
Displayable conversion value range	
- bipolar signals	-32,000 to +32,000
- unipolar signals	0 to 32,000
Error/accuracies	
Operational limit in the entire temperature range	
- Relative to the output range, voltage	+/- 2 %
- Relative to the output range, current	+/- 2 %
Basic error limit (operational limit at 25 °C)	
- relative to the output range, voltage	+/- 0.5 %
- relative to the output range, current	+/- 0.5 %
Potentials/ electrical isolation	
Analog output functions	
- Electrical isolation, analog output functions	No
Dimensions and weight	
•Weight, approx.	148 g
•Width	46 mm
•Height	80 mm
•Depth	62 mm

Technical specifications EM 235

	6ES7 235-0KD22-0XA0
Current consumption	
•from backplane bus 5 V DC, max.	30 mA
•from sensor current or ext. power supply (24 V DC), max.	60 mA
•Power dissipation, typical	2 W
Connection system	
•Pluggable I/O terminals	No
Analog inputs	
•Number of analog inputs	4; Differential
•Permissible input voltage for the voltage input (destruction limit), max.	30 V
•Permissible input voltage for the current input (destruction limit), max.	32 mA
Input ranges (rated values), voltages	
- Voltage	Yes
- 0 to +50 mV	Yes
- 0 to +100 mV	Yes
- 0 to +500 mV	Yes
- 0 to +1 V	Yes
- 0 to +5 V	Yes
- 0 to +10 V	Yes
- -1 V to +1 V	Yes
- -10 V to +10 V	Yes
- -100 mV to +100 mV	Yes
- -2.5 V to +2.5 V	Yes
- -25 mV to +25 mV	Yes
- -250 mV to +250 mV	Yes
- -5 V to +5 V	Yes
- -50 mV to +50 mV	Yes
- -500 mV to +500 mV	Yes
Input ranges (rated values), currents	
- Current	Yes
- 0 to 20 mA	Yes
Characteristic curve linearization	
- for voltage measurement	No
- for current measurement	No
Temperature compensation	
- parameterizable	No
Analog outputs	
•Number of analog outputs	1
Output ranges, voltage	
- -10 to +10 V	Yes
Output ranges, current	
- 0 to 20 mA	Yes
Burden resistance (in the nominal output range)	
- at voltage outputs, min.	5 kΩ
- at current outputs, max.	0.5 kΩ

Technical specifications (continued)

	6ES7 235-0KD22-0XA0
Analog value formation	
Integration and conversion time/triggering per channel	
- with over-range (bits incl. sign), max	12 Bit; 11 bits for power output
- Basic conversion time, ms	< 0.25 ms
- Interference voltage suppression for interference frequency f1 in Hz	40 dB, DC to 60 Hz
Settling time	
- for voltage output function	100 µs
- for current output function	2 ms
Displayable conversion value range	
- bipolar signals	-32,000 to +32,000
- unipolar signals	0 to 32,000
Error/accuracies	
Operational limit in the entire temperature range	
- Relative to the output range, voltage	+/- 2 %

EM 231 thermocouple module

Overview

- For user-friendly, high precision temperature detection
- 7 standard types of th ermocouple can be used
- For measuring low-level analog signals (±80 mV), as well
- Easy to install in an existing system

Technical specifications

	6ES7 231-7PD22-0XA0
Current consumption	
•from load voltage L+ (no load), max.	60 mA
•from backplane bus 5 V DC, max.	87 mA
•Power dissipation, typical	1.8 W
Connection system	
•Pluggable I/O terminals	No
Analog inputs	
•Number of analog inputs	4
•Length of cable shielded, max	100 m; to sensor
•Permissible input voltage for the voltage input (destruction limit), max.	30 V
•Loop resistance line	100 Ω
•Update time (all channels)	405 ms
Input ranges (rated values), voltages	
- -80 mV to +80 mV	Yes
Input ranges (rated values), thermocouples	
- Type E	Yes
- Type J	Yes
- Type K	Yes
- Type N	Yes
- Type R	Yes
- Type S	Yes
- Type T	Yes

	6ES7 231-7PD22-0XA0
Analog value formation	
•Measuring principle	Sigma-Delta
Integration and conversion time/triggering per channel	
- with over-range (bits incl. sign), max	16 Bit; Temperature 0.1 °C / 0.1 °F
- Interference voltage suppression for interference frequency f1 in Hz	85 dB at 50 / 60 / 400 Hz
Displayable conversion value range	
- bipolar signals	-27,648 to +27,648
Error/accuracies	
•Cold connection point	+/-1.5 °C
•Repeatability in the settled state at 25°C (relative to the output range)	+/- 0.05 %

SIPLUS analog modules

3

Overview

- Analog inputs and outputs for the SIMATIC S7-200
- With extremely short conversion times
- For connections of analog sensors and actuators without additional amplifier
- For solving the more complex automation tasks

These modules are designed for

- *an ambient range of –25 °C to + 70 °C, condensation permissible*
- *extraordinary medial load (for example by chloric and sulphuric atmospheres)*

Technical specifications

Overview

- Function modules for simple positioning tasks (1 axis)
- Stepper motors and servo moto rs from the Micro Stepper to the high-performance servo drive can be connected
- Flexible connection possibilities
- Full support from STEP 7-Micro/WIN with parameterization and startup

Technical specifications

	6ES7 253-1AA22-0XA0
Supply voltages	
Rated value	
- permissible range, lower limit (DC)	11 V
- permissible range, upper limit (DC)	30 V
Current consumption	
•from backplane bus 5 V DC, max.	190 mA
•from supply voltage L+, max.	300 mA; from 12 V DC, 130 mA from 24 V DC
Configuration	
•Number of modules per CPU	max. 5 with CPU 226/226XM, max. 3 with CPU 224, max. 1 with CPU 222
Digital inputs	
•Number of digital inputs	5
•Functions	Stop (STP), reference point switch (RPS), upper limit switch (LMT+), lower limit switch (LMT-), zero point (ZP)
Length of cable	
- Length of cable shielded, max	100 m; STP, RPS, LMT+, LMT- 100 m, ZP 10 m
- Length of cable unshielded, max	30 m; STP, RPS, LMT+, LMT- 30 m, ZP not advisable
•Type	IEC Type 1, p-reading
Input voltage	
- Rated value, DC	24 V
- for signal "0"	STP, RPS, LMT+, LMT- DC 5 V; ZP DC 1 V
- for signal "1"	STP, RPS, LMT+, LMT- DC 15 V; ZP DC 3 V
Input delay (at rated value of the input voltage)	
•For standard inputs	
- Parameterizable	Yes; STP, RPS, LMT+, LMT- 0.2 to 12.8 ms ZP min 2 µs

Sensor	
Connectable encoders	
- 2-wire BEROS	Yes
- permissible closed-circuit current (2-wire BEROS), max.	1 mA
Drive interface	
Signal output I	
- Number	4; choice of RS422/RS485 or 5 V DC
- Type	RS422/RS485 electrically isolated (P0+, P0-, P1+, P1-)
- Differential output voltage, min.	2.8 V; RL=200 ohms
- Pulse frequency	200 kHz; P0+, P0-, P1+, P1-, P0, P1
- Length of cable, max.	10 m; 10 m shielded; 1 m unshielded
Signal output III	
- Type	5 V DC isolated (P0, P1, DIS, CLR)
- Output voltage	30 V DC
- Output current	50 mA; output delay (DIS, CLR) max. 30 µs
Potentials/ electrical isolation	
Digital input functions	
- between the channels	Yes
- between the channels, in groups of	1 (STP, RPS, ZP), 2 (LMT-, LMT+)
Dimensions and weight	
•Weight, approx.	190 g
•Width	71.2 mm
•Height	80 mm
•Depth	62 mm

EM 277 PROFIBUS DP module

Overview

- For connection of the S7-22x to PROFIBUS DP (as slave) and MPI
- Can be simultaneously operat ed as MPI slave and DP slave
- Transmission rate max. 12 Mbps
- Can be used with CPU from version 6ES7 22x-xxx **21**-xxxx

Technical specifications

	6ES7 277-0AA22-0XA0
Voltages and currents	
Load voltage L+	
- Rated value (DC)	24 V
- permissible range, lower limit (DC)	20.4 V
- permissible range, upper limit (DC)	28.8 V
Current consumption	
•from backplane bus 5 V DC, max.	150 mA
•from sensor current or ext. power supply (24 V DC), max.	180 mA; 30 to 180 mA
•Power dissipation, typical	2.5 W
Configuration	
•Connectable stations	TD 200 from V2.0, OP, TP, PG/PC, S7-300/400, PROFIBUS DP-Master
Communication functions	
•Bus protocol/transfer protocol	PROFIBUS DP (Slave), MPI (Slave)
Number of connections	
- MPI connections, max.	6
- MPI connections reserved for OP communication	1
- MPI connections reserved for PG communication	1
Interfaces	
•Number of RS485 interfaces	1
5 V DC	
- Output current, max.	90 mA
24 V DC	
- Voltage range	20.4 to 28.8 V
- Output current, max.	120 mA
- Current limiting	0.7 to 2.4 A

	6ES7 277-0AA22-0XA0
Connection system	
•Pluggable I/O terminals	No
PROFIBUS DP	
•Transmission rate, max.	12 Mbit/s; 9.6 / 19.2 / 45.45 / 93.75 / 187.5 / 500 kbit/s 1 / 1.5 / 3 / 6 / 12 Mbit/s
•Station addresses	0 to 99, adjustable
•Length of cable, max.	1,200 m; 100 to 1200 m, depending on the transmission rate
•Number of stations in the system, max.	126; of which max. 99 EM 277
•Number of stations per segment, max.	32
•Automatic transmission speed detection	Yes
Dimensions and weight	
•Weight, approx.	175 g
•Width	71.2 mm
•Height	80 mm
•Depth	62 mm

Overview

The CP 243-2 is the AS-Interface master for the innovated generation of SIMATIC S7-200. The communications processor (6GK1 243-2AX01-0AX0) supports the extended AS-Interface specification V2.1 and has the following functions:

- Up to 62 AS-Interface slaves can be connected and integrated analog value transfer (according to the extended AS-Interface specification V2.1)
- Supports all AS-Interface master functions in accordance with the extended AS-Interface specification V2.1
- Status displays for operating states and display of the functional readiness of connected slaves with LEDs in the front panel
- Indication of errors (incl. AS-Interface voltage errors, configuration errors) with LEDs in the front panel
- Compact enclosure designed to match the new generation of SIMATIC S7-200.

Technical specifications

AS-Interface specification	V 2.1
Interfaces	
•Address space used in the PLC	Corresponding to 2 I/O modules (8 DI/8 DO and 8 AI/8 AO)
•AS-Interface connection	Terminal
Current consumption	
•Via AS-Interface	Max. 100 mA
•Through backplane bus	Typ. 220 mA at DC 5 V
Power loss	Approx. 2 W
Perm. environmental conditions	
•Operating temperature	
- Horizontal mounting	0 °C to +55 °C
- Vertical mounting	0 °C to +45 °C
•Transport/storage temperature	- 40 °C to +70 °C
•Relative humidity	Max. 95% at +25 °C
Design	
•Module format	S7-22x expansion module
•Dimensions (W x H x D) in mm	71.2 x 80 x 62 (H+16 mm with holes for wall mounting)
•Weight	Approx. 250 g
•Space required	1 slot

Ordering Data	Order No.

CP 243-1

Overview

- Connection of SIMATIC S7-200 to Industrial Ethernet with
  - 10/100 Mbit/s
  - Half/full duplex
  - RJ 45 socket
  - TCP/IP
- Configuration, remote programmi ng and service is possible with STEP 7-Micro/WIN through Industrial Ethernet (program upload and download, status)
- CPU/CPU communication is poss ible through Industrial Ethernet (Client + Server, 8 S7 connections + 1 PG connection)
- Thanks to integration in S7-O PC, further processing of PLC data in PC applications is possible
- Modules can be replaced with out the need for a programming device

Technical specifications

Data transmission rate	10/100 Mbit/s autosensing
Interfaces	
•10 BaseT, 100 Base TX	RJ45
•Connection for power supply	24 V DC (± 5%)
Current consumption	
•From backplane bus	55 mA
•From external 24 V DC	60 mA
Power loss at 24 V DC	1.75 W
Perm. environmental conditions	
•Operating temperature	
- Horizontal mounting	0℃ to +55℃
- Vertical mounting	0℃ to +45℃
•Transport/storage temperature	-40 ℃ to +70 ℃
•Relative humidity	Max. 95% at +25 ℃
Design	
•Dimensions (W x H x D) in mm	71.2 x 80 x 62
•Weight	150 g
Performance data	
S7 communication/ PG communication	
•Number of usable connections	8 S7 connections + 1 PG connection
Configuration	With STEP 7-Micro/WIN (V3.2 SP1 and higher)

Ordering Data

	Order No.
CP 243-1 communications processor D)	**6GK7 243-1EX00-0XE0**
for connection of SIMATIC S7-200 to Industrial Ethernet; for S7 communication, PG communication with electronic manual on CD-ROM, German, English, French, Italian, Spanish	
Programming software STEP 7-Micro/WIN32 V3.2 for SP3 and higher	
Target system: All CPUs of the SIMATIC S7-200 *Prerequisite:* Windows 95/98/NT/2000/XP on PG or PC with 80486 or Pentium processor *delivery package:* German, English, French, Spanish, Italian; with online documentation	
Single license B)	**6ES7 810-2CC03-0YX0**
Single license Upgrade 1) B)	**6ES7 810-2CC03-0YX3**

1) Upgrade for all previous STEP 7-Micro/WIN and STEP 7-Micro/DOS versions

B) Subject to export regulations: AL: N and ECCN: EAR99S

D) Subject to export regulations: AL: N and ECCN: 5D992B1

Overview

- Connection of SIMATIC S7-200 to Industrial Ethernet with
  - 10/100 Mbit/s
  - Half/full duplex
  - RJ45 socket
  - TCP/IP
- Configuration, remote programmi ng and service is possible with STEP 7-Micro/WIN through Industrial Ethernet (program upload and download, status)
- CPU/CPU communication is poss ible through Industrial Ethernet (Client + Server, 8 S7 connections + 1 PG connection)
- IT communication
  - Web function
  - E-mail function
  - FTP Client function for program-controlled data exchange (e.g. DOS, UNIX, LINUX, embedded systems)
- FTP server with 8 Mbyte memory
- OPC enables further processing of PLC data in PC applications

Technical specifications

Data transmission rate	10/100 Mbit/s autosensing
Interfaces	
•10BaseT, 100BaseTX	RJ45
•Connection for power supply	24 V DC (± 5%)
Current consumption	
•From backplane bus	55 mA
•From external 24 V DC	60 mA
Power loss at 24 V DC	1.75 W
Perm. environmental conditions	
•Operating temperature	
- Horizontal mounting	0℃ to +55℃
- Vertical mounting	0℃ to +45℃
•Transport/storage temperature	-40 ℃ to +70 ℃
•Relative humidity	Max. 95% at +25 ℃
Design	
•Dimensions (W x H x D) in mm	71.2 x 80 x 62
•Weight	150 g
Performance data	
IT communication	
•Number of connections to an e-mail server	1
•E-mail client	32 E-mails with max. 1024 characters
•Number of FTP connections	1
•Number of HTTP connections	4
•Adjustable access enable program	8 users
•Memory capacity of the Flash Memory file system	8 MB
•Service life of the Flash Memory cells	1,000,000 write cycles
S7 communication/ PG communication	
•Number of usable connections	8 S7 connections + 1 PG connection
Configuration	With STEP 7-Micro/WIN, V3.2 SP3 and higher

Ordering Data

	Order No.
CP 243-1 IT communications processor D) for connection of SIMATIC S7-200 to Industrial Ethernet; for S7 communication, PG communication E-mail and WWW server; with electronic manual on CD-ROM German, English, French, Italian, Spanish	**6GK7 243-1GX00-0XE0**
Programming software STEP 7-Micro/WIN32 V3.2 for SP3 and higher *Target system:* All CPUs of the SIMATIC S7-200 *Prerequisite:* Windows 95/98/NT/2000/XP on PG or PC with 80486 or Pentium processor *Delivery package:* German, English, French, Spanish, Italian; with online documentation

D) Subject to export regulations: AL: N and ECCN: 5D992B1

Power supplies

3

Overview

The regulated load power supply for the SIMATIC S7-200.

- Coordinated design and functiona lity, can be integrated easily into the PLC network.
- For reliably powering the controller, encoders and sensors with 24 V DC, 3.5 A.
- Flexible implementation, either in industry or in the domestic supply system

Technical specifications

Type	**3.5 A**
Order No.	**6EP1 332-1SH31**
Input	Single-phase AC
Rated voltage $V_{in\ rated}$	**120/230 V AC** Settable using wire jumper
Voltage range	93 to 132 V/187 to 264 V AC
Overvoltage strength	2.3 x $V_{inrated}$, 1.3 ms
Mains buffering $I_{out\ rated}$	> 20 ms at V_{in} = 187 V
Rated line frequency; range	50/60 Hz, 47 to 63 Hz
Rated current$I_{in\ rated}$	1.65/0.95 A
Inrush current limitation (+25 °C)	< 33 A, < 3 ms (V_{in} = 230 V)
I^2t	< 1.0 A^2s
Integrated line-side fuse	T 2.5 A/250 V (not accessible)
Recommended circuit-breaker (EC 898) in mains supply line	Two-pole circuit-breaker from 10 A, Characteristic C or from 6 A, Characteristic D
Output	Stabilized, floating direct voltage
Rated voltage $V_{out\ rated}$	**24 V DC**
Total tolerance	± 5 % (typ. ± 2 %)
•Stat. mains compensation	Approx. ± 0.1 %
•Stat. load compensation	Approx. ± 0.2 %
Residual ripple (clock frequency: approx. 50 kHz)	< 150 mV_{pp} (typ. 30 mV_{pp})
Spikes (bandwidth: 20 MHz)	< 240 mV_{pp} (typ. 110 mV_{pp})
Setting range	-
Status display	-
Power ON/OFF behavior	No overshoot of V_{out} (soft start)
Starting delay/voltage rise	< 1 s/typ. 80 ms
Rated current $I_{out\ rated}$	**3.5 A**
Current range	
•Up to +45 °C	0 to 3.5 A
•Up to +60 °C	0 to 3.5 A
Dyn. V/I with	
•Starting on short circuit	typ. 5 A for 100 ms
•Short-circuit in operation	typ. 5 A for 100 ms
Parallel connection for increased output	Yes, up to 5

Type	**3.5 A**
Order No.	**6EP1 332-1SH31**
Efficiency	
Efficiency at $V_{out\ rated}$, $I_{out\ rated}$	Approx. 84 %
Power loss at $V_{out\ rated}$, $I_{out\ rated}$	Approx. 16 W
Control	
Dyn. mains compensation ($V_{in\ rated}$ ±15 %)	± 0.3 % V_{out}
Dyn. load compensation (I_{out}: 50/100/50 %)	< ± 10 % V_{out} (typ. ± 3 % V_{out})
Settling time	
•Load step from 50 to 100%	< 5 ms
•Load step from 100 to 50%	< 5 ms
Protection and monitoring	
Output overvoltage protection	
Current limitation	3.8 A
Short-circuit protection	Stabilized current characteristic to typ. 14 V, electronic shutdown below that, automatic restart
RMS sustained short-circuit current	< 4 A
Overload/short-circuit indicator	-
Safety	
Galvanic isolation pri-mary/secondary	Yes, SELV output voltage V_{out} acc. to EN 60950
Protective class	Class I
Discharge current	< 3.5 mA
TÜV test	Yes
CE-marking	Yes
UL/cUL (CSA), approval	Yes, cULus listed (UL 508, CSA 22.2 No. 14-M91), File E143289
FM approval	-
Appr. for use in marine vessels	-
Degree of protection (EN 60529)	IP20

Technical specifications (Continued)

Type	3.5 A
Order No.	**6EP1 332-1SH31**
EMC	
Interference emission	EN 55022 Class B
Line harmonics limitation	EN 61000-3-2
Interference immunity	EN 61000-6-2
Operating specifications	
Ambient temperature range	0 to +60°C with natural convection
Transportation and storage temperature range	-25 to +85 °C
Humidity rating	Climatic class 3K3 acc. to EN 60721, no condensation
Mechanical specifications	
Connections	
•Mains input L, N, PE	One screw-type terminal each for 0.5 to 1 mm^2 finely stranded, 0.5 to 1.5 mm^2 single-core
•Output L+	1 screw-type terminal for 0.5 to 1 mm^2
•Output M	2 screw-type terminals for 0.5 to 1 mm^2
Dimensions (W x H x D) in mm	160 x 80 x 62
Weight approx.	0.5 kg
Mounting	Snap-mounting on DIN rail EN 50022-35x15/7.5, wall mounting
Accessories	Mounting bracket

TD 200 text display

Overview

- The user-friendly text display for the S7-200
- For control and monitoring:
  Message text display, intervention in PLC program, setting of inputs and outputs
- Direct connection to CPU interf ace using supplied cable or incorporation into network (also via EM 277)
- No separate power supply required
- No separate parameterization software required
- Addressing and setting of contrast in supplied menu

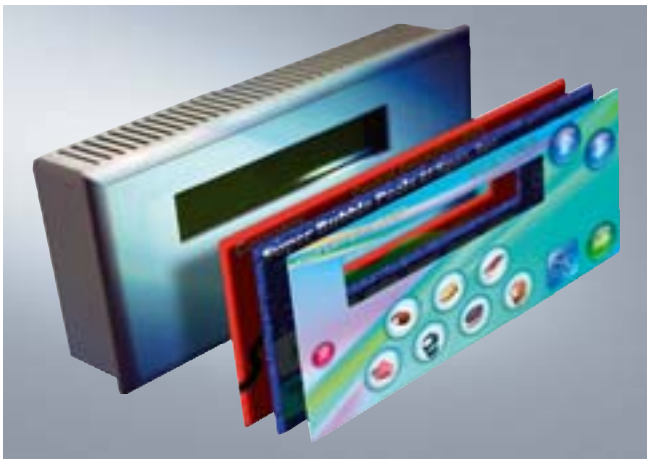
Ordering Data

	Order No.
Text Display TD 200 for connecting to SIMATIC S7-200; used with STEP 7 Micro/WIN V3.2 SP4 and higher.	**6ES7 272-0AA30-0YA0**
PROFIBUS bus connector IP20 with 90° cable feeder	
•without PG connection	**6ES7 972-0BA12-0XA0**
•with PG connection	**6ES7 972-0BB12-0XA0**
PROFIBUS bus connector IP20 with 35° cable feeder	
•without PG connection	**6ES7 972-0BA41-0XA0**
•with PG connection	**6ES7 972-0BB41-0XA0**
PROFIBUS FC Standard Cable for connecting to PPI; standard type with special design for quick mounting, 2-wire, shielded, sold by the meter, up to 1000 m, minimum order 20 m	**6XV1 830-0EH10**

Technical specifications

	6ES7 272-0AA30-0YA0
Power supply	
Input voltage	
- Rated value (DC)	24 V; Power supplied through the S7-200 communications interface or optional external power supply unit. The CPU sensor power supply (24 V DC) is not brought into load
Input current	
- Rated value at 24 V DC	120 mA
MPI	
•Transmission rate (PPI), max.	187.5 kBit/s
1st interface	
•Physical	RS 485
Functionality	
- PPI	Yes
PPI	
- Number of stations	126; S7-200, OP, TP, TBP, PG/PC
Operator control and monitoring	
Display	
- Type	LCD backlit
- Number of lines	2
- Number of characters per line	20; Chars/line: ASCII, Cyrillic; 10 chars per line: Chinese
- Height of characters	5 mm
Environmental requirements	
Operating temperature	
- min.	0 °C
- max.	60 °C
Storage/transportation temperature	
- min.	-40 °C
- max.	70 °C
Degree of protection and class of protection	
- IP 65	Yes; frontal
Dimensions and weight	
•Weight, approx.	250 g
•Width	148 mm
•Height	76 mm
•Depth	27 mm
•Installation cutout, width	138 mm
•Installation cutout, height	68 mm
•Cabinet/control panel thickness	0.3 mm; 0.3 to 4 mm

Overview



- The user-friendly text display fo r the S7-200 with customizable display
- For control and monitoring:
  Message text display, intervention in PLC program, setting of inputs and outputs
- Direct connection to CPU interf ace using supplied cable or incorporation into network (also via EM 277)
- No separate power supply required
- No separate parameterization software required
- Frontpanel design can be individually selected
- Addressing and setting of contrast in supplied menu

SIMATIC TP 177micro

Overview

- Touch panel for operator cont rol and monitoring of small machines and plants
- Low-cost starter unit in the cate gory of touch panels with graphics capability complete with all the basic functions required for simple tasks
- Pixel graphics 5.7" STN Touch Screen (analog/resistive), Bluemode (4 levels)
- Specifically for SIMATIC S7-200:
  Communication to the PLC is performed via the integrated interface over a point-to-point connection
- Connected to the PLC via MPI or PROFIBUS DP cable
- The SIMATIC TP 177micro is th e innovative successor to the SIMATIC TP 070/TP 170micro Touch Panels
- Ships end of 4th quarter 2004

Configuration

Configuring is carried out with the engineering software SIMATIC WinCC flexible Micro, Compact, Standard or Advanced (see HMI software/engineering software SIMATIC WinCC flexible).

The necessary HardwareSupportPackage (HSP) can be downloaded free of charge via the following link:
http://www4.ad.siemens.de/WW/view/en/19241467

Importing of TP-Designer projects (TP 070) into WinCC flexible is not possible.

A PC/PPI adaptor cable is needed to download the configuration.

Technical specifications

Type	TP 177micro
Display	STN liquid crystal display (LCD)
•Size	5.7"
•Resolution (W x H in pixels)	320 x 240 (240 x 320 with vertical design)
•Colors	4 blue levels
•MTBF backlighting (at 25 °C)	Approx. 50,000 hours
Control elements	Touch screen
•Numeric/alphanumeric input	Yes / Yes[1]
Processor	ARM CPU
Memory	
•Type	Flash / RAM
•Usable memory for user data	256 KB
Ports	1 x RS 485
Interface with PLC	S7-200
Power supply	24 V DC
•Permitted range	+18 V to +30 V DC
•Nominal current	0.24 A
Clock	Software clock, without battery backup
Degree of protection	
•Front	IP65 (in installed state), NEMA 4, NEMA 4x, NEMA 12
•Rear	IP20
Certification	Available soon: FM, cULus, CE, C-Tick
Dimensions	
•Front W x H (mm)	212 x 156
•Cut-out W x H (mm)	198 x 142
Weight	0.7 kg
Ambient conditions	
•Mounting position	Vertical
- Max. permissible angle of inclination without forced ventilation	[2]
•Temperature	
- Operation (vertical installation)	0 °C to +50 °C [2]
- Operation (max. inclination)	[2]
- Transport, storage	-20 °C to +60 °C
•Max. relative humidity	[2]

Type	TP 177micro
Functions	
Message system	
•No. of messages	500
•Bit messages	Yes
•Analog messages	No
•No. of process values per message	8
•Message buffer	Circulating buffer, 128 entries each [3]
Process diagrams	250
•Text objects	500 text elements
•Variables per diagram	20
•Entries per diagram	20
•Graphics objects	Bitmaps, icons, background images
•Dynamic objects	Bars
- Directories	Yes
Variables	250
User administration (security)	Yes
Online languages	5
•Project languages (incl. system messages)	Danish, German, traditional Chinese, simplified Chinese, English, Finnish, French, Greek, Italian, Japanese, Korean, Dutch, Norwegian, Polish, Portuguese, Russian, Swedish, Spanish, Czech, Turkish, Hungarian
Character set	WinCC flexible, ideographic languages
Configuration tool	From WinCC flexible 2004 Micro HSP for OP 73micro, OP 73, OP 77A, TP 177micro, TP 177A (to be ordered separately)
•Configuration transfer	Serial via RS 485

1) English font only can be displayed
2) Status not yet established before going to print
3) Not battery-backed

Note:
All specified values are maximum values.
The total number of configurable elements is limited by the size of the user memory.

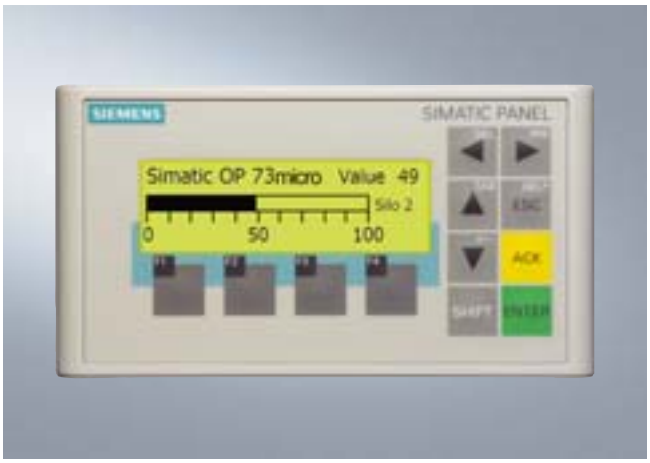
Service package comprising: •Gaskets •Clamp-type terminals •Plug-in terminal strip (block of two)	**6AV6 671-2XA00-4AX0**
PC/PPI cable Multimaster 1) A) for connecting the S7-200 to serial PC/OP interface and for downloading the configuration for Micro Panels	**6ES7 901-3CB30-0XA0**
PROFIBUS 830-1T connecting cable For connection of data terminal, precut/preassembled with two sub D connectors, 9-pin, 3 m	**6XV1 830-1CH30**
System interfaces	see catalog ST 80
Connecting cables	see catalog ST 80

1) The PC/PPI cable with Order No. 6ES7 901-3BF21-0XA0 can also still be used

A) Subject to export regulations AL: N and ECCN: EAR99H

E) Subject to export regulations AL: N and ECCN: 5D002ENC3A

Overview



- Operator panel for operator co ntrol and monitoring of small machines and plants
- A new dimension in graphics: small and clever
- Pixel graphics 3" LCD, monochrome
- 8 system keys, 4 freely co nfigurable function keys
- Specifically for SIMATIC S7-200:
  Communication with the controller is point-to-point using the integral interface
- Connected to the PLC via MPI or PROFIBUS DP cable
- Start of delivery approximately end of 4th quarter 2004

Technical specifications

Type	OP 73micro
Display	LCD
•Size	3“
•Resolution (W x H in pixels)	160 x 48
•Colors	Monochrome (yellow-green)
•MTBF of background lighting (at 25°C)	Approx. 100,000 hours
Control elements	Membrane keyboard
•Function keys, programmable	4 function keys
•System keys	8
•Numeric/alphanumeric input	Yes/yes 1)
Processor	ARM CPU
Memory	
•Type	Flash
•Usable memory for user data	128 KB
Ports	1 x RS 485

The following are available:

- STEP 7- Micro/WIN
- STEP 7 Micro/WIN command library
- WinCC flexible micro
- S7-200 PC-Access

For further information see section 7.

SIMATIC S7-300

4

S7-300/S7-300F

Overview

S7-300

- The modular mini PLC system for the low and medium performance ranges
- With comprehensive range of modules for optimum adaptation to the automation task
- Flexible use through simple implementation of distributed structures and versatile networking
- Convenient system as result of user-friendly handling and uncomplicated, fan-free configuration
- Can be expanded without prob lems when the tasks increase
- Powerful thanks to a large numb er of integrated functions

S7-300F

- Failsafe automation system for plants with increased safety requirements for production engineering
- Based on S7-300
- ET 200S and ET 200M distributed I/O stations with safety-relevant modules can also be connected; safety-relevant communication via PROFIBUS DP with PROFISAFE profile.
- Standard modules can be used in addition for non-safety-relevant applications

SIPLUS S7-300

- The PLC for use in the hars hest environmental conditions
- With extended temperature range from -25 to +70°C
- Suitable for extraordinary medi al load (pollution gas atmosphere)
- Occasional short-term conden sation and increased mechanical loading permissible
- With the proven PLC te chnology of the S7-300
- Convenient handling, programmi ng, maintenance and service
- Ideal for use in the automotive industry, environmental technology, mining, chemical plants, production technology, food industry etc.
- The alternative to expe nsive custom solutions

More Information you can find at:

Technical specifications

General technical specifications S7-300, S7-300F	
Degree of protection	Degree of protection IP20 to IEC 60 529
Ambient temperature	
•With horizontal mounting	0 to 60 °C
•With vertical mounting	0 to 40 °C
Relative humidity	5 to 95%, no condensation (RH severity level 2 in accordance with IEC 61131-2)
Atmospheric pressure	795 to 1080 hPa
Isolation	
•24 V DC circuits	Test voltage 500 V DC
•230 V AC circuits	Test voltage 1460 V AC
Electromagnetic compatibility	Requirements of EMC law; Noise immunity according to IEC 61000-6-2, tested according to: IEC 61000-4-2, 61000-4-3, IEC 61000-4-4, IEC 61000-4-5, IEC 61000-4-6 Emitted interference according to EN 50081-2, tested according to EN 55011, class A, group 1
Mechanical rating	
•Vibrations, tested according to/tested with	IEC 60068, Part 2-6/10 up 58 Hz; constant amplitude 0.075 mm; 58 to 150 Hz; constant acceleration 1 g; oscillation period: 10 frequency cycles per axis in each direction of the 3 mutually perpendicular axes
•Shock, tested according to/tested with	IEC 60068, Part 2-27/half-sine: strength of impact 15 g (peak value), duration 11 ms

General technical specifications SIPLUS S7-300	
Ambient temperature	
Temperature	Horizontal mounting: -25 °C to 70 °C Vertical mounting: -25 °C to 50 °C
Relative humidity	5 to 95%; transient condensation permissible, corresponding to relative humidity (RH-) stress grade 2 according to IEC 1131-2 and IEC 721 3-3 Cl. 3K5
Transient icing	-25 °C to 0 °C IEC 721 3-3 Cl. 3K5
Atmospheric pressure	1080 to 795 hPa corresponding to a height of -1000 to 2000 m
Pollutant concentration	SO2: < 0,5 ppm; relative humidity <60% Test: 10 ppm, 4 days H2S: < 0,1 ppm; relative humidity <60% Test: 1 ppm, 4 days (according to IEC 721 3-3; Class 3C3)
Mechanical environmental conditions	
Vibrations	Type of vibration: frequency progressions changing at 1 octave per minute. 2 Hz ≤ f ≤ 9 Hz, constant amplitude 3,0 mm 9 Hz ≤ f ≤ 150 Hz, constant acceleration 1 g; Duration of vibration: 10 frequency progressions per axis in each direction of the three mutually perpendicular axes; Vibration testing according to IEC 68 section 2-6 (Sinus) and IEC 721 3-3, Class 3M4
Shock	Type of shock: semisinusoidal shock strength: 15 g peak value, duration shock direction 11 ms: 3 shocks each in +/- direction on each of the mutually perpendicular axesShock testing according to IEC 68 section 2-27
Conformity	EN 50155 (railroad applications - electronical device on rail vehicles)

CPU 312C to CPU 317F-2 DP

CPU 312C

- The compact CPU with integrat ed digital inputs and outputs
- For small applications with high requirements in terms of processing power
- With process-related functions

Micro memory card required to operate the CPU.

CPU 313C-2 PtP

- The compact CPU with integr ated digital I/Os and second serial interface
- For installations with high requ irements in terms of processing power and response time.
- With process-related functions

Micro memory card required to operate the CPU.

CPU 313C

- The compact CPU with integrated digital and analog inputs and outputs
- For installations with high requirements in terms of processing power and response time.
- With process-related functions

Micro memory card required to operate the CPU.

CPU 313C-2 DP

- The compact CPU with in tegrated digital I/Os and PROFIBUS DP master/slave interface
- With process-related functions
- For tasks with special functions
- For the connection of standalone I/O devices

Micro memory card required to operate the CPU.

4

CPU 314C-2 PtP

- The compact CPU with integrated digital and analog I/Os, as well as a second serial interface
- For installations with high requirements in terms of processing power and response time
- With process-related functions

Micro memory card required to operate the CPU.

CPU 312

- The starter CPU for Totally Integrated Automation (TIA).
- For small-scale applications wi th moderate requirements on the processing speed.

Micro memory card required to operate the CPU.

CPU 314C-2 DP

- The compact CPU with integrated digital and analog I/Os and PROFIBUS DP master/slave interface
- With process-related functions
- For tasks with special functions
- For the connection of standalone I/O devices

Micro memory card required to operate the CPU.

CPU 314

- For installations with medium requirements on program scope
- High processing performance in binary and floating-point arithmetic

Micro memory card is required to operate the CPU.

CPU 312C to CPU 317F-2 DP

CPU 315-2 DP

- The CPU with medium to larg e program memory and quantity framework for the use, if required, of SIMATIC Engineering Tools
- High processing performance in binary and floating-point arithmetic
- PROFIBUS DP master/slave interface
- For extensive I/O configurations
- For setting up distributed I/O structures

Micro memory card required for operation of CPU.

CPU 318-2 DP

- The CPU with a large program memory and PROFIBUS DP master/slave interface
- For extensive I/O configurations
- For setting up distributed I/O structures

CPU 317-2 DP

- The CPU with a large program memory and quantity frame-work for demanding requirements
- For multisector automation tasks in the construction of series machines, special machines and plants
- Used as a central controller on production lines with central and distributed I/O
- High processing performance in binary and floating-point arithmetic
- PROFIBUS DP master/slave interface
- For extensive I/O configurations
- For setting up distributed I/O structures
- Supports as an option the use of SIMATIC Engineering Tools
- Distributed intelligence in Component based Automation (CBA) on PROFIBUS DP

Micro memory card required for operation of CPU.

CPU 317-2 PN/DP

- The CPU with a large program memory and quantity frame-work for demanding requirements
- Distributed intelligence in Component based Automation (CBA) on PROFInet
- PROFINET proxy for intelligent devices on PROFIBUS DP in Component based Automation (CBA)
- PROFINET I/O controller for operating distributed I/O on PROFINET
- For multisector automation tasks in the construction of series machines, special machines and plants
- Used as a central controller on production lines with central and distributed I/O
- For extensive I/O configurations
- For setting up distributed I/O structures
- High processing performance in binary and floating-point arithmetic
- Combined MPI/PROFIBUS DP-master/slave interface
- Supports as an option the us e of SIMATIC Engineering Tools

Micro memory card required for operation of CPU.

CPU 317T-2 DP

- SIMATIC CPU with integrated technology/motion control functionality
- With the full functionality of the standard CPU 317-2 DP
- For multisector automation tasks in the construction of series machines, special machines and plants
- Ideal for synchronized motion al sequences such a coupling to a virtual/real master, gearbox synchronism, cam disc or printmark correction.
- Used as a central controller on production lines with central and distributed I/O
- Distributed intelligence in Component Based Automation (CBA) on PROFIBUS DP
- With onboard I/O for fast tech nological functions (e.g., cam switching, reference point detection)
- PROFIBUS DP (DRIVE) interfac e for the isochronous connection of drive components.
- A common S7 application program for control and motion control tasks (no additional programming language for motion control required)
- Optional "S7 Technology" package required

CPU 315F-2 DP

- For configuration of a failsaf e automation system for plants with increased safety requirements
- Based on the SIMATIC CPU 315-2 DP
- With 2 interfaces (1x MPI, 1x DP/MPI)
- Complies with safety requiremen ts up to SIL 3 to IEC 61508, AK6 to DIN V 19250 and Cat. 4 to EN 954-1
- Without additional wiring of safety-relevant I/O
- Safety-relevant communication via PROFIBUS DP with *PROFISAFE* profile with distributed I/O stations
- Distributed connection of failsafe ET200S PROFISAFE I/O modules possible;
  Central and distributed connection of failsafe ET200M I/O modules possible
- Central and distributed use of standard modules for non-safety-relevant applications

Micro memory card required for operation of CPU.
