

CoolLED - High Power, Standard LED DRIVERS

350mA, 500mA, 700mA & 1000mA

Cool-LED DRIVERS provide a high performance solution for powering high-brightness LED's from a mains supply.

The power factor corrected, class II driver has fully-isolated, SELV output delivering up to 33W of power.

The well regulated output current will typically power a series string of between 3 and 14 LEDs with a 1W to 3W rating up to a combined forward voltage of 48V (1000mA = 33V)

All **CoolLED DRIVERS** have a high efficiency design, which ensures **cool operation** and **long life**. The compact enclosure is available in Remote with Flying Leads (A), Integral (B) and Remote Mount (C) versions. Remote types feature screwless cable clamps.

Cool-LED DRIVERS are open and short-circuit protected and have self-resetting over temperature trip.

Consult the sales office for versions where the current level can be set by external switch or presence detector. These drivers include a "soft dim" feature to avoid sudden steps in LED brightness.
