New! Externally Powered Transparent Proto-Boards, 3220 Tie Points, ROHS

Global Specialties Economy Line solderless Proto-Boards & Breadboarding systems offer students of electronics an economical choice for breadboarding without sacrificing quality. Global has expanded it's line of transparent Proto-Boards & Breadboards and have added Two new models with ABS plastic sockets with phosphor-bronze contacts are mounted on a Metal back plates for added durability. The transparent ABS plastic sockets are perfect for educational applications because they allow student and designers to clearly view circuit connections. Plastic feet and color-coded binding posts are included. Use Global's solderless breadboards to design test fixtures, perform lab experiments and in all areas of custom electronic design applications.

Specifications

- Packaging: Blister pack
- Metal plate dimension: 240x210x1.2mm
- Board dimension: 184.4x190x8.5mm
- Material: Transparent ABS plastic with color printed
- 4 Terminal strips: 2520 tie-point
- 7 Distribution strip: 700 tie-point
