

Part no format: MCE4WT-xxxxxx-MCSTAR

The last 5 Digits indicate MCPCB type in a 20mm star configuration.
The preceding 6 digits are taken from the final 6 digits of the originating Cree LED part number
E.g. Cree part MCE4WT-A2-0000-000M01 becomes MCE4WT-000M01-MCSTAR

The MCE LED has 4 LED chips and this star board has them connected together in a series configuration.

For LED specifications please refer to the relevant Cree Xlamp data sheet and Binning and Labelling document.

Stars come with on a panel of 30 pcs similar to the example shown as example below

Star is nominal 20mm A/F. Centres for screw (e.g M3) mounting 17.5mm. MCPCB thickness is 2mm. Dimensions below in mm
