Overview additional current transformers

We offer the full range of TE Connectivity – Crompton Instruments current transformers. If you miss a current transformer for your dedicated application, we will be glad to assist.

Overview additional current transformers from Sifam Tinsley instrumentation

3 in 1 current transformers with RJ45 connection

- different versions
- 60 to 800A nominal current
- Output 100mA

3 in 1 current transformers with plug in connector

- different versions
- 60 to 800A nominal current
- Output 5A

Ring type current transformers

- several versions
- 40 to 4000A nominal current

Current transformers with accuracy 0,2s

- several versions
- 5 to 5000A nominal current

Current- and voltage transformers with ANSI spec.

- several versions
- 50 to 4000A nominal current
- wide range of nominal voltages
- CTs for metering and relaying

Low Voltage Current Transformers

General functionality , features and specification

General

Low Voltage Current Transformers are used to transfer high primary currents into a low level secondary current, which can be easily used in measuring applications. The relation between the input primary current and the output secondary current gives always a proportional signal.

Usage

For use with analogue indicators, digital metering systems, transducers, measuring relays and other components that accept an AC input signal.

Anwendbare Normen

IEC/EN 60044-1, EN61010-1, UL Listung (Ebony Series) with file no. 257877

Case and enviromental conditions

Self-extinguishing polycarbonate in accordance to UL94V-0.

Operating temperature: -20°C to +85°C (MSC, SC Series -20°C to +70°C)

Degree of protection : IP20 (terminals), IP40 (Case)

For indoor use

Insulation class: E, to IEC85, BS2757

Relative humidity: 0-90%, none condensing

Electrical specification

System voltage: max. 720V AC

Nominal frequency: 50/60Hz

Primäry current: See product specification

Secondary current: 5A or 1A

Tes voltage: 3KV 50Hz for 1 minute.

Nomninal burden and class index: See product specification

Connection: See product specification

Saturation coefficient: <5 (<10 for primay wound CTs)

Accuracy classes and typical usage

Class 0,2 and 0,2s: Laboratory use and network analyzers

Class 0,5 and 0,5s: Enregy Measurment

Class 1: Current and Power

meters Class 3: General usage

Overload:

Permanent overload: 1,2 x In

Short time thermal overload (Ith): 60 x In (SC Series 100 x In for 1 Sekunde)

Short time dynamic overload (Idyn): 2,55 x Ith
