The CI connector Series for printed circuit boards can be polarized both by means of the plastic housing and by the use of CIF-LC1 and CIM-SC1 Coding Splines and Clips. COF-SP1 Polarization Pegs are also available for CI Series coding.

For further details please refer to page 186.

The CIF connector Series satisfies the user's mounting needs with the following possibilities:

- mating with CIM, CPM and CRM male connectors;
- using individual single mold connectors from 2 to 25 poles;
- combining Modular connectors from 2 to 4 poles or use Side Stackable connectors from 2 to 25 poles to obtain any number of poles;
- minimizing the stock by storing only selected connectors (ex. 2 - 3... 25 poles) to enable combinations as described above;
- using a custom Kit package to simplify the product management (part-number reduction), to minimize the stock, to improve the assembly and to reduce production errors.

Il connettore Serie CI per circuiti stampati può essere polarizzato sia tramite il corpo plastico, sia con Linguette e Staffe di Codifica CIF-LC1 e CIM-SC1, sia con Spine di Polarizzazione COF-SP1.

Per ulteriori dettagli consultare la pagina 186.

Il connettore Serie CIF soddisfa le esigenze di montaggio dell'utilizzatore; infatti è possibile:

- accoppiarlo con i connettori maschio CIM, CPM, CRM;
- utilizzare singolarmente i connettori monolitici da 2 a 25 vie;
- comporre i connettori Modulari da 2 a 25 vie oppure affiancare i connettori Affiancabili da 2 a 25 vie per ottenere qualsiasi numero di vie;
- gestire uno stoccaggio minimo di connettori (es. 2 - 3... 25 vie) per ottenere quanto sopra;
- utilizzare le confezioni Kit che permettono una semplificazione della gestione del prodotto (riduzione dei part-number), del magazzino, dell'assemblaggio, nonché una riduzione dei rischi d'errore.
