## Overview

Industrial construction, in-plant operations, and telecommunications. Computer installations and power facilities. Transportation and panel equipment. Wherever electrical and electronic components and systems are used to connect, fasten, insulate and identify wire and conduits, you'll find a Thomas & Betts quality product performing to industry-wide standards of excellence. For over a hundred years, Thomas & Betts has developed the products you need, with the quality you demand and at the right price.

E-Z-Code Identification Products are marketed nationally through an exclusive network of authorized stocking distributors, where emphasis is placed on customer service, experience and product knowledge. Staffed by trained professionals with a background in federal, state and local codes and regulations, your local T&B distributor can provide you with quotation service, up-to-date pricing, shipping costs and competitive product line evaluations when needed.

### ***Automated Wire Markers & Accessories***

The E-Z-Coder™ Wire Marker Printer is one of the smallest, most portable wire marker printers in the industry. It is a simple, easy-to-use, and reliable tool that'll have you marking wires almost as soon as you pull it from the box. E-Z-Code Labeling Software is a full-featured labeling system for creating custom labels for your cabling and wire marking needs. E-Z-Code® Laser Printable Markers let you print your own markers to your requirements.

### ***Wire Marker Book, Cards and Labels***

Pocket pack wire marker books are easy to carry, easy to use. T&B maintenance and production labels have been designed to provide extra-added convenience through positive, protected clear identification. Wire marking is simple, clean and fast...just pull tape out, tear and wrap. Compact size fits in your pocket or hangs from work belt.

### ***Lockout / Tagout***

E-Z-Code offers an inclusive product line to supply the general requirements of the OSHA Lockout/Tagout standard. From comprehensive training videos to circuit breaker locking devices, E-Z-Code Lockout/Tagout products help insure that general industry workers will be protected from accidents during maintenance and servicing of equipment.

### ***Identification Tapes***

Bright colors are not the only advantages of these Barricade and Burial Tapes. T&B's attention-getting Tapes are also inexpensive and easy to handle. Protect-A-Line tape is ideal for marking hazardous or off-limit barricade areas. A large assortment of Buried Utility Tape and Foil Backed Detectable Buried Utility Tapes help prevent potential accidents during excavations and underground installations.

### ***Electrical Hazard Safety Signs***

T&B provides a large assortment of necessary Electrical Hazard Safety Signs to complete your construction and maintenance projects. Choose from either Aluminum, Plastic, or Self Sticking material to suit your environments. Or create your own sign to your specifications by ordering from our Specials Form.

## E-Z-Coder™ Wire Marker Printer

**The E-Z-Coder™ Wire Marker Printer from Thomas & Betts.**  
**It's how to run wires without running wild.**

*The E-Z-Coder Wire Marker Printer is sold with one battery pack, a battery charger, one ribbon for general use labels and a wrist cord. The E-Z-Case, accessory batteries and all printing media are sold separately.*

The E-Z-Coder™ Wire Marker Printer is one of the smallest, most portable wire marker printers in the industry. It is a simple, easy-to-use, and reliable tool that'll have you marking wires almost as soon as you pull it from the box. When compared with other larger, more complicated systems, the E-Z-Coder™ printer is also one of the most affordable devices for producing custom labels for wire, face plates, outlets and electrical components. And the E-Z-Coder wire marker printer makes sharp, impressive labels that reflect the quality and professionalism that's required even on the toughest jobs.

- Compact unit that fits easily in the palm of your hand.
- Simple to use, no elaborate training is required.
- Weighs only a little over a pound.

- Powered from a single rechargeable battery, prints up to 250 labels from a single charge.
- Easy-loading label system.
- Wide, user-friendly buttons, with common electrical notations.
- Large, easy-to-read LCD display.
- Heavy-duty printing head for years of quality label printing.
- Self-adjusts the label to the correct printing position.
- Automatic label serialization.
- Three different printing position modes and either small or large type size, bold and normal type.
- Rugged construction.
- Simple instructions on the back of the printer.
- Wide variety of labels, including heat-shrinkable tubing.

Self-laminating write-on markers are made from a durable Vinyl material to provide excellent legend protection. These self-laminating write-on markers protect your code, even when submerged in water and oils. Constructed of Vinyl plastic with a write-on area and a transparent extension that laminates the code when wrapped around itself.

1. Apply legend area to cable first.
  2. Roll the clear area around the cable, making sure it covers the legend.
  3. Legend is protected against water, grease, chemicals and other foreign matter.
- Make your own laminated markers by using these blank write-ons.

High contrast reflective yellow on a black background, three standard sizes are available. Durable, trouble-free WRM Reflective Industrial Markers reflect light up to 100 times brighter than white or yellow painted surfaces. Manufactured from self-sticking WRM reflective material, these markers keep right on performing even in the most severe weather conditions.

T&B has put our most popular size reflective markers in a kit. Manufactured from the same tough materials as the individual markers, the kit will keep the WRUM series markers organized and free from damage and that means economy.

### Barricade Tape

Bright colors are not the only advantages of these Barricade Tapes. T&B's attention-getting Barricade Tape is also inexpensive and easy to handle. Protect-A-Line tape is ideal for marking hazardous or off-limit areas. Convenient and reusable, it performs well both indoors and out-of-doors.

- Available in 3" X 1000' rolls.

### Buried Utility Tape

Now you can help insure against costly dig-ins. Place T&B's Buried Utility Tape 1 to 1½ feet below the ground surface directly above the pipeline or cable below. Bright fade resistant colors warn equipment operators that a vital pipeline or cable is BURIED BELOW, before damage occurs. Buried utility tapes are printed black on a bright background.

- Available in 3" and 6" widths.

### Foil Backed Detectable Buried Utility Tape

In addition to bright colors, the Foil Backed Detectable Tape features a metallic backing that is designed to be detectable under normal earthen surfaces up to 18" with common metal detectors. A simple and fast method to relocating lines, cables and conduit for future renovation.

- Available in 3" and 6" widths.

## Lockout/Tagout

### Single Pole Circuit Breaker Lockout

'No Hole' Circuit Breaker Lockout device will lock out most single pole circuit breakers. Easy to install, provides secure locking protection. Device also available for 480/600 volt switches.

### Multi Pole Circuit Breaker Lockout

Multi-Pole lockout works with most major multi-pole breakers with tie-bar. Very convenient because no self-locking tie or screwdriver is needed to install.

### Plug Lockout

Designed for heavy duty applications, the Plug Lockout is an inexpensive way to safely lock out electrical plugs. Made of rugged polypropylene, the lockouts are available in two sizes: one to fit standard 110-volt grounded plugs and a larger size for 220- and 550-volt plugs.

### Gate Valve Lockout

Make locking out valves safe and easy. Available in five sizes to fit valve handles from 1 to 13 inches in diameter. Made of durable, non-adherent plastic to resist chemicals and hot and cold temperatures. Stainless steel hinge design adds strength & security. Unique knockout feature accommodates OS&Y or 'rising stem' gate valves.

### Cable Lockout

Flexible cable will lock out ALL sizes of gate valves & multiple disconnects in various energy distribution centers. Better than chains and just as effective, but a lot less weight. Great for security use too.

### Standard Ball Valve Lockout

Fits all major brand ball valves. Simple one-piece design makes it easy to use.

## E-Z Code® Lockout Devices

It is vitally important to control hazardous energy sources during servicing and maintenance of machines and equipment. The unexpected start up of the machines or equipment or release of stored energy could cause injury to employees. OSHA generally requires that energy sources for equipment be turned off or disconnected and that the switch either be locked or labeled with a warning tag. OSHA estimates compliance with the standard will prevent about 120 fatalities and approximately 28,000 serious and 32,000 minor injuries each year.

E-Z-Code offers an inclusive product line to supply the general requirements of the OSHA Lockout/Tagout standard. From comprehensive training videos to circuit breaker locking devices, E-Z-Code Lockout/Tagout products help insure that general industry workers will be protected from accidents during maintenance and servicing of equipment.

## Three Steps for Compliance

OSHA: Lockout/Tagout standard (29 CFR 1910.147) requires that all energy sources be turned off and "locked out" while machines are being serviced or maintained. Compliance with this regulation requires three basic steps ...

### Step 1: Develop a Written Program

This involves identifying and writing procedures for the control of hazardous energy. This also includes preparation for shutdown, equipment isolation, Lockout/Tagout application, release of stored energy and verification of energy isolation to each piece of equipment.

### Step 2: Training Employees

Both affected and authorized employees must be trained in the specific energy control procedures established by the company. Verification of this training is required.

### Step 3: Implement the Program

In addition to developing formal written procedures and training employees, T&B offers a variety of padlocks, tags, signs and lockout devices to help you implement lockout procedures for many different energy sources including: electricity, pneumatics, steam, gas, liquids, and many others.

## Lockout/Tagout

*The Lockout Compliance Manual helps you format your written program.*

### Lockout Compliance Manual

This two volume compliance set contains samples that highlight what OSHA is looking for and demonstrates what you must do to comply with Lockout/Tagout regulations. It helps you format your written program and gets you started on compliance. Remember, not having a thorough, written energy control program is the most common violation cited by OSHA.

#### Hazardous Energy Control Manual

85-page manual includes:

- Step-by-step instructions for developing your Lockout/Tagout compliance program.
- Suggested training program including outlines, training notes and handout materials.

- Forms and checklists for developing your hazardous energy control procedures.
- Sample programs and procedures.
- Copy of OSHA Standard 29 CFR 1910.147.

#### Hazardous Energy Control Procedures

Includes:

- Sample programs and forms for completing your inventory listing, equipment procedures and employee training log.
- Three ring binder designed to contain your written program and related information.

## Lockout/Tagout

### Durable Lockout Tags

OSHA requirements for Lockout Tags are very specific, and E-Z-Code® Lockout Tags have been designed to comply with every performance standard. Tags are available in two sturdy materials: reusable dura-tag and economical vinyl. All tags have a reinforcing brass grommet  $\frac{7}{16}$ " diameter to accept most padlocks. All tag surfaces allow employees to easily personalize tags with their name, department and estimated completion information as required by regulations.

### Reusable Dura-Tag

Durable, plastic tags are encapsulated in matte polyester laminate. Tag meets OSHA 50 lb. pull requirement. These tags are designed for harsh plant environments and are chemically resistant. Supplied with heavy duty  $\frac{3}{8}$ " ID brass grommet and nylon ties. Matte finish accepts pencil, pen and marker. 25/pkg.

Fig. 2

Designed to keep children away from switchgear and transformers.  
Made of WPM pressure sensitive destructable vinyl film, making one piece removal virtually impossible.  
These labels meet both NEMA and Underwriters Laboratory applicable standards.

Choose from four visual warning legends for use on machines and other equipment.

New 2002 National Electric Code Requirement  
110.16 Flash Protection

The new requirement is intended to reduce the occurrence of serious injury or death due to arcing faults to workers who work on or near energized electrical equipment. The warning label should remind a qualified worker who intends to open the equipment for analysis or work that a serious hazard exists and that the worker should follow appropriate work practices and wear appropriate personal protection equipment (PPE) for the specific hazard.
