

## Real-Time Clock Module With NVRAM Control

### Features

- Direct clock/calendar replacement for IBM® AT-compatible computers and other applications
- Functionally compatible with the DS1287/DS1287A and MC146818A
- 114 bytes of general nonvolatile storage
- Automatic backup supply and write-protection to make external SRAM nonvolatile
- Integral lithium cell and crystal
- 160 ns cycle time allows fast bus operation
- Intel bus timing
- 14 bytes for clock/calendar and control
- BCD or binary format for clock and calendar data
- Calendar in day of the week, day of the month, months, and years with automatic leap-year adjustment

- Time of day in seconds, minutes, and hours
  - 12- or 24-hour format
  - Optional daylight saving adjustment
- Programmable square wave output
- Three individually maskable interrupt event flags:
  - Periodic rates from 122  $\mu$ s to 500 ms
  - Time-of-day alarm once per second to once per day
  - End-of-clock update cycle
- Better than one minute per month clock accuracy

114 bytes of general nonvolatile storage.

The bq4287 write-protects the clock, calendar, and storage registers during power failure. The integral backup energy source then maintains data and operates the clock and calendar.

The bq4287 uses its integral battery-backup controller and battery to make a standard CMOS SRAM nonvolatile during power-fail conditions. During power-fail, the bq4287 automatically write-protects the external SRAM and provides a  $V_{CC}$  output sourced from its internal battery.

The bq4287 is a fully compatible real-time clock for IBM AT-compatible computers and other applications.

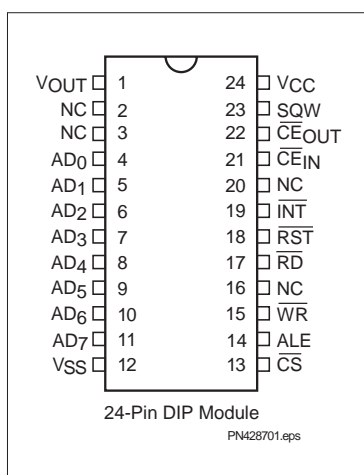

### General Description

The CMOS bq4287 is a low-power microprocessor peripheral providing a time-of-day clock and 100-year calendar with alarm features and battery operation. Other features include three maskable interrupt sources, square wave output, and

As shipped from Benchmarq, the backup cell is electrically isolated from the memory. Following the first application of  $V_{CC}$ , this isolation is broken, and the backup cell provides data retention to the clock, internal RAM,  $V_{OUT}$ , and  $\overline{CE}_{OUT}$  on subsequent power-downs.

The bq4287 is functionally equivalent to the bq4285, except that the battery (16, 20) and crystal pins (2, 3) are not accessible. These pins are connected internally to a coin cell and quartz crystal. The coin cell provides 130mAh of capacity. For a complete description of features, operating conditions, electrical characteristics, bus timing, and pin descriptions, see the bq4285 data sheet.

### Pin Connections

### Pin Names

AD <sub>0</sub> –AD <sub>7</sub>	Multiplexed address/data input/output
$\overline{CS}$	Chip select input
ALE	Address strobe input
$\overline{RD}$	Data strobe input
$\overline{WR}$	Read/write input
INT	Interrupt request output
RST	Reset input
SQW	Square wave output
$\overline{CE}_{IN}$	RAM chip enable input
$\overline{CE}_{OUT}$	RAM chip enable output
NC	No connect
$V_{OUT}$	Supply output
$V_{CC}$	+5V supply
$V_{SS}$	Ground

#### Caution:

**Take care to avoid inadvertent discharge through  $V_{OUT}$  and  $\overline{CE}_{OUT}$  after battery isolation has been broken.**

## Absolute Maximum Ratings

Symbol	Parameter	Value	Unit	Conditions
V <sub>CC</sub>	DC voltage applied on V <sub>CC</sub> relative to V <sub>SS</sub>	-0.3 to 7.0	V	
V <sub>T</sub>	DC voltage applied on any pin excluding V <sub>CC</sub> relative to V <sub>SS</sub>	-0.3 to 7.0	V	V <sub>T</sub> ≤ V <sub>CC</sub> + 0.3
T <sub>OPR</sub>	Operating temperature	0 to +70	°C	Commercial
T <sub>STG</sub>	Storage temperature	-40 to +70	°C	Commercial
T <sub>BIAS</sub>	Temperature under bias	-10 to +70	°C	Commercial
T <sub>SOLDER</sub>	Soldering temperature	260	°C	For 10 seconds

**Note:** Permanent device damage may occur if **Absolute Maximum Ratings** are exceeded. Functional operation should be limited to the Recommended DC Operating Conditions detailed in this data sheet. Exposure to conditions beyond the operational limits for extended periods of time may affect device reliability.

## Recommended DC Operating Conditions (T<sub>A</sub> = T<sub>OPR</sub>)

Symbol	Parameter	Minimum	Typical	Maximum	Unit
V <sub>CC</sub>	Supply voltage	4.5	5.0	5.5	V
V <sub>SS</sub>	Supply voltage	0	0	0	V
V <sub>IL</sub>	Input low voltage	-0.3	-	0.8	V
V <sub>IH</sub>	Input high voltage	2.2	-	V <sub>CC</sub> + 0.3	V

**Note:** Typical values indicate operation at T<sub>A</sub> = 25°C.

## DC Electrical Characteristics (T<sub>A</sub> = T<sub>OPR</sub>, V<sub>CC</sub> = 5V ± 10%)

Symbol	Parameter	Minimum	Typical	Maximum	Unit	Conditions/Notes
C	Battery capacity	-	130	-	mAh	Refer to graphs in Typical Battery Characteristics section
I <sub>LI</sub>	Input leakage current	-	-	± 1	μA	V <sub>IN</sub> = V <sub>SS</sub> to V <sub>CC</sub>
I <sub>LO</sub>	Output leakage current	-	-	± 1	μA	AD <sub>0</sub> –AD <sub>7</sub> , INT and SQW in high impedance
V <sub>OH</sub>	Output high voltage	2.4	-	-	V	I <sub>OH</sub> = -1.0 mA
V <sub>OL</sub>	Output low voltage	-	-	0.4	V	I <sub>OL</sub> = 4.0 mA
I <sub>CC</sub>	Operating supply current	-	7	15	mA	Min. cycle, duty = 100%, I <sub>OH</sub> = 0mA, I <sub>OL</sub> = 0mA
I <sub>CCB</sub>	Battery operation current	-	0.3	0.5	μA	V <sub>BC</sub> = 3V, T <sub>A</sub> = 25°C, no load on V <sub>OUT</sub> or CE <sub>OUT</sub>
V <sub>SO</sub>	Supply switch-over voltage	-	3.0	-	V	
V <sub>PFD</sub>	Power-fail-detect voltage	4.0	4.17	4.35	V	
V <sub>BC</sub>	Backup cell voltage	-	3.0	-	V	Internal backup cell voltage; refer to graphs in Typical Battery Characteristics section
V <sub>OUT1</sub>	V <sub>OUT</sub> voltage	V <sub>CC</sub> - 0.3V	-	-	V	I <sub>OUT</sub> = 100mA, V <sub>CC</sub> > V <sub>BC</sub>
V <sub>OUT2</sub>	V <sub>OUT</sub> voltage	V <sub>BC</sub> - 0.3V	-	-	V	I <sub>OUT</sub> = 100μA, V <sub>CC</sub> < V <sub>BC</sub>
I <sub>CE</sub>	Chip enable input current	-	-	100	μA	Internal 50K pull-up

**Note:** Typical values indicate operation at T<sub>A</sub> = 25°C, V<sub>CC</sub> = 5V.

### Power-Down/Power-Up Timing ( $T_A = T_{OPR}$ )

Symbol	Parameter	Minimum	Typical	Maximum	Unit	Conditions
$t_F$	$V_{CC}$ slew from 4.5V to 0V	300	-	-	$\mu s$	
$t_R$	$V_{CC}$ slew from 0V to 4.5V	100	-	-	$\mu s$	
$t_{CSR}$	$\overline{CS}$ at $V_{IH}$ after power-up	20	-	200	ms	Internal write-protection period after $V_{CC}$ passes $V_{PFD}$ on power-up.
$t_{DR}$	Data-retention and time-keeping time	10	-	-	years	$T_A = 25^\circ C$ , no load on $V_{OUT}$ or $CE_{OUT}$ .
$t_{WPT}$	Write-protect time for external RAM	10	16	30	$\mu s$	Delay after $V_{CC}$ slows down past $V_{PFD}$ before SRAM is write-protected.
$t_{CER}$	Chip enable recovery time	$t_{CSR}$	-	$t_{CSR}$	ms	Time during which external SRAM is write-protected after $V_{CC}$ passes $V_{PFD}$ on power-up.
$t_{CED}$	Chip enable propagation delay to external SRAM	-	7	10	ns	

**Note:** Clock accuracy is better than  $\pm 1$  minute per month at  $25^\circ C$  for the period of  $t_{DR}$ .

**Caution:** Negative undershoots below the absolute maximum rating of -0.3V in battery-backup mode may affect data integrity.

## Data Sheet Revision History

Change	Page No.	Description	Nature of Change
1	2	Power-fail detect voltage VPFD	Was 4.1 min, 4.25 max; is 4.0 min, 4.35 max
1	2	Chip enable input current	Additional specification
2	9	Was: "As shipped from Benchmarq, the backup cell is electrically isolated from the memory." Is: "As shipped from Benchmarq, the backup cell is electrically isolated from the active circuitry."	Clarification
2	14	Deleted specifications for $t_{RWH}$ and $t_{RWS}$	Clarification; these parameters are not supported by the bq4287

**Notes:** Change 1 = Nov. 1992 B changes from June 1991 A.  
Change 2 = Nov. 1993 C changes from Nov. 1992 B.

## Ordering Information

**bq4287 MT -**

- Temperature:**  
blank = Commercial (0 to +70°C)
- Package Option:**  
MT = T-type module
- Device:**  
bq4287 Real-Time Clock Module With NVRAM Control

**PACKAGING INFORMATION**

Orderable Device	Status <sup>(1)</sup>	Package Type	Package Drawing	Pins	Package Qty	Eco Plan <sup>(2)</sup>	Lead/Ball Finish	MSL Peak Temp <sup>(3)</sup>
BQ4287MT-SB2	ACTIVE	DIP MOD ULE	MT	24	15	Pb-Free (RoHS)	Call TI	N / A for Pkg Type

<sup>(1)</sup> The marketing status values are defined as follows:

**ACTIVE:** Product device recommended for new designs.

**LIFEBUY:** TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

**NRND:** Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

**PREVIEW:** Device has been announced but is not in production. Samples may or may not be available.

**OBSOLETE:** TI has discontinued the production of the device.

<sup>(2)</sup> Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

**TBD:** The Pb-Free/Green conversion plan has not been defined.

**Pb-Free (RoHS):** TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

**Pb-Free (RoHS Exempt):** This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

**Green (RoHS & no Sb/Br):** TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

<sup>(3)</sup> MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

**Important Information and Disclaimer:** The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

## IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
