

SuperH MCUs

SH7216 Highest Performance Flash-based MCU with Connectivity

Renesas Electronics America Inc.

Microcontroller and Microprocessor Line-up

Our SH-2A MCU Solution

- High Performance SH-2A Process Core efficiencies Equivalent to Application Processors (2 DMIPS/MHz)
- Combined with High Performance Memory and Peripherals on MCUs

- The SH-2A with Floating Point Unit (FPU)
 - Integrates enough functionality to replace a DSP + MCU into a single chip
 - Benefits include smaller form factors, lower cost, less EMI
 - Software development is simple because everything is coded on a single platform

What's Unique about the SH7216?

The SH7216 shines when customer needs performance & high-throughput

Superscalar RISC Core

2.0 DMIPs / MHz

**Double Precision
64 bit FPU**

**Short 9 cycle
Interrupt Latency**

Peripherals

**Multifunction Timers
2 Inverters supported**

**12 bit ADC Fast 1.0uS
Sampling Rate**

High Speed Memory

**Industry's Fastest 10ns
Flash Memory (1MB)**

**Large SRAM
Up to 128KB**

Rich Connectivity

10 / 100 Ethernet

CAN 2.0

USB 2.0

Supported by leading Third Party SW & Tools:

CMX, Eclipse, Express Logic, GNU Tool suite, IAR, Micrium, Segger

2 Instructions / Clock Core

SH-2A Fast Interrupt Response

INT Trigger

	SH7216	Cortex-M3	ARM7TDMI	PIC32
MCU Interrupt Latency	9	18+	24 – 42	18 – 40+

SH7216 Uses Fastest Flash (10ns read time)

	SH7216	A	B	C	D	E
Max Freq (MHz)	200	72	72	66	80	150
Flash Speed (MHz)	100	24	20	33	30	27

Target Applications

Factory Automation

Precision Motion Control
Industrial Connectivity
Fast I/O Control

Operator Panels

Scientific & Medical

Signal Analysis
Quiet Motor Control
Connectivity

Operator Panels

SH7216 Application Example

Factory Automation

SH7216 RDK + Micrium uC/OS-III Boook

- A comprehensive tool to learn, evaluate, & prototype using SH7216

uC/OS-III Book with
Example Applications

+

SH7216 Board
+
USB Cable
+
Power Supply

+

All Software is
downloaded
from Micrium Site

MSRP: \$199

Book Only MSRP: \$89

Available free with Future Promotion

■ Learn

- RTOS Theory of operation & Usage
- SH7216 Architecture

■ Evaluate

- Pre-programmed Demo Application
- Example Applications with Full Source

■ Prototype

- Full-featured, flexible board
- Debugger included on the board
- Power supply included

uC/OS-III
uC/Probe

CAN

- Sample code for major peripherals
- Vector Control Motor Algorithms
- Ethernet Send/Receive, Open Source TCP/IP supporting uIP
- CAN API – compatible with R8C & R32C API
- USB Device – CDC, MSC, HID
- Fixed Point Math & DSP Libraries for SH-2A FPU

Available on am.renesas.com

SH7216 Third Party Support by SW Components

Third Party	IDE	Compiler	Debug	RTOS	TCP / IP Stack	USB Device	File
CMX	-	-	-	Y	Y	Y	Y
Express Logic	-	-	-	Y	Y	Y	Y
