

# ARINC 429 PCI Card

MODEL: DD-42916i3-300

## FEATURES

- 16 Independently Programmable Receiver/Transmitter, High/Low Speed ARINC Channels
- Supports High-Speed Data Rates on All Channels Simultaneously
- Six Discrete Inputs and Four Discrete Outputs
- Multiple Reception Methods
- Receive Label/SDI Data Filtering and Data Time Stamping
- Programmable Interrupt Support
- On-Board Processor for Engineering Unit Conversions and Data Processing
- Synchronous and Multiple Asynchronous Transmission Methods
- Wraparound Internal Self Test for Each Channel
- Command/Response Communication FIFO
- Dual Port RAM for ARINC Data
- Drivers and Run-Time Library Support for Windows<sup>®</sup> 9x/2000/XP, Windows NT<sup>®</sup>, Linux, and VxWorks<sup>®</sup>, Including LabVIEW<sup>™</sup> and LabWindows<sup>™</sup>/CVI Support
- Optional Commercial Avionics Utilities 32-bit Software Suite
- Optional *dataMARS*/*dataSIMS* 32-Bit Monitoring and Simulation Software

## DESCRIPTION

The DD-42916i3-300 is a DD-42916C1-300 PMC card on a PCI carrier, which provides a PCI interface to an ARINC 429 data bus. The card contains a high performance processor used for data processing, time stamping, and engineering unit conversion. The DD-42916i3-300 efficiently transfers ARINC 429 data via dual port RAM accessed by both the host computer and the card.

DD-42916i3-300 software supports all modes of operation and includes 'C', LabVIEW and LabWindows/CVI programming libraries. An optional Commercial Avionics Utilities Suite includes an ARINC 429 Data Bus Analyzer and an ARINC 615 Data Loader. Optional *dataMARS* software provides powerful monitoring and extensive post analysis capabilities. Optional *dataSIMS* software adds simulation capability.

## APPLICATIONS

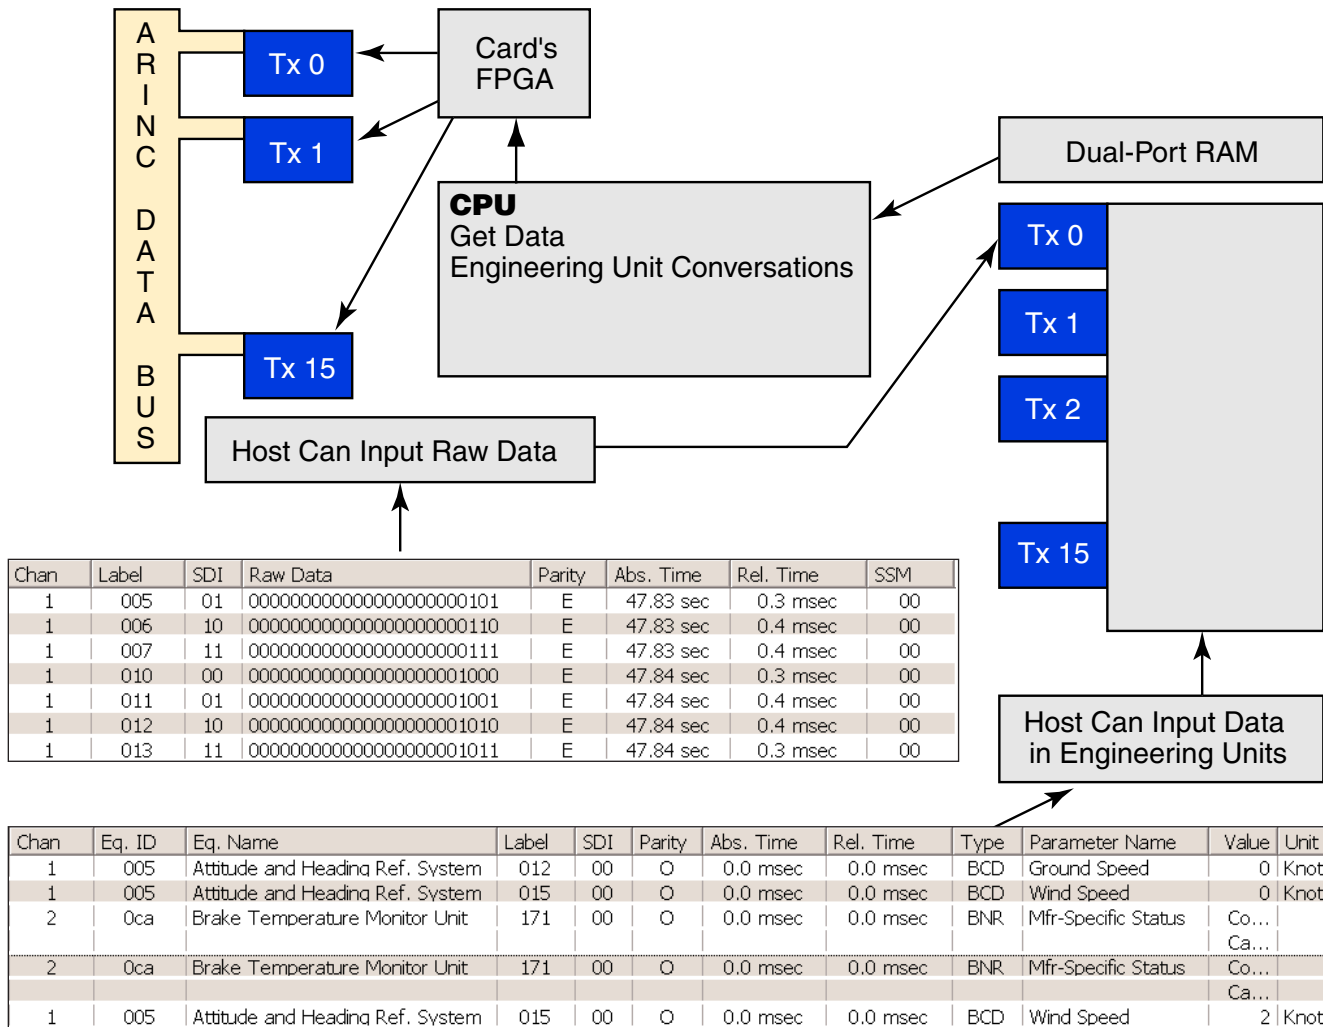

With 16 programmable receive/transmit channels, high/low speed operation, and engineering unit conversion; the DD-42916i3-300 is well suited to all types of ground support work, including development and manufacturing, testing, and on-board data acquisition. The DD-42916i3-300 equips LRU developers with easy access for simulating and testing new systems prior to use with actual flight systems. It can also be used by avionics maintenance and validation teams to perform end-item testing in the laboratory and onboard testing via portable PC's.

## Figure 1

## Data Transmission

Figure 2

## CARD and SOFTWARE CAPABILITIES

## Transmit Data Options

- Queued FIFO Transmission to any Channel
- Scheduled Major/Minor Frames Transmission to any Channel
- Scheduled Label/SDI Rate Transmission to any Channel

- Changes in Tx/Rx FIFO Status
- End of Major Frame

## Received Data Options

- "Mailbox" Type Reception from any Channel
- Queued FIFO Reception from any Channel
- Filtering of Received Label/SDI Combinations
- Time Stamping of Received Data

## Discrete I/O

- Six Open/Ground Discrete Inputs
- Four 30V/100 mA Discrete Outputs

## Software

- Driver Support for Windows 95/98/2000 for Windows 9x/2000/XP and Windows NT, Linux, and VxWorks
  - Support for LabVIEW and LabWindows/CVI
  - High-Level API with Over 40 Commands
  - Demo Programs
  - Optional Avionics Utilities Suite
    - ARINC 429 Data Bus Analyzer
    - ARINC 615 Data Loader
  - Optional *dataMARS* and *dataSIMS* Software
    - *dataMARS* Monitoring Software
    - *dataSIMS* Simulation and Monitoring Software
- 

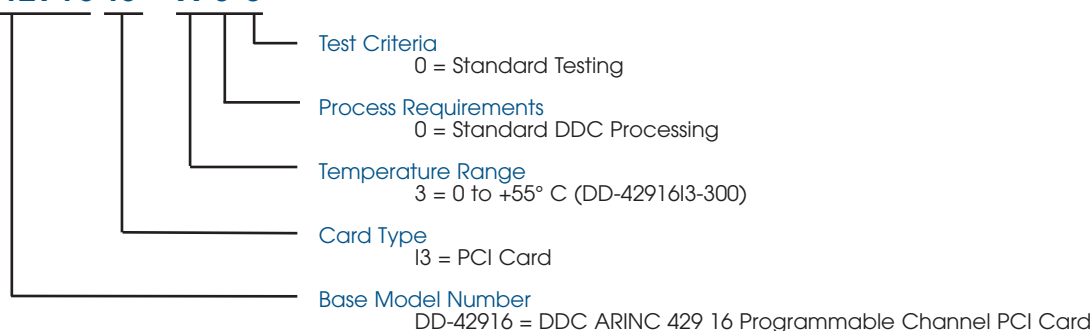

## Specifications

PARAMETER	VALUE	UNITS
<b>ELECTRICAL CHARACTERISTICS</b>		
Nominal Data Rates	12.5 or 100	kHz
Expected Bus Impedance	75	ohms
Receiver Input Impedance	1000	ohms
Time Tag Resolution	1 or 1,000	μs
Power Supply Voltage	+3.3, +5, and ±12	Vdc
Discrete Inputs Logic Threshold	3.0 to 3.5	V
Discrete Outputs Current (open drain sink, at 30 volts)	100	mA
<b>ENVIRONMENTAL CHARACTERISTICS</b>		
Operating Temperature: (up to 95% relative humidity, non-condensing)	0 to 55	°C
Storage Temperature (up to 99% relative humidity, non-condensing)	-40° to 85	°C
<b>PHYSICAL CHARACTERISTICS</b>		
Standard Short PCI Card	6.9 x 4.2 (17.5 x 10.7)	in (cm)
I/O Connector	0.050" Mini-D Type 50-pin connector	on front panel
Weight	5.50 (156)	oz (g)

## Ordering Information

**DD-42916 I3 - X 0 0**

### Included Software

- DD-42977S0** - Software Drivers, `C` API Library, LabVIEW, and LabWindows/CVI for Windows 9x/2000/XP and Windows NT
- DD-42977S1** - Software Drivers and `C` API Library for Linux
- DD-42977S2** - Software Drivers and `C` API Library for VxWorks

### Optional 32-bit GUI Software

- DD-42999S0** - Commercial Avionics Utilities Software Suite for Windows 9x/2000/XP and Windows NT
- Includes:
- ARINC 429 Data Bus Analyzer
  - ARINC 615 Data Loader

### Mating Connector

**3M Part Number** - 10150-3000VE

### Optional Monitoring and Simulation Software

- BU-694X4DM-64VM** - 32-bit *dataMARS*
- BU-694X4DS-64VM** - 32-bit *dataSIMS*
- X = Software License Type, 0 = Parallel Port, 1 = USB
