Automotive and Hardware/Home Center  
Circuit Protection Products and Accessories

## The Cooper Bussmann Circuit Protection Advantage

### Market Coverage

#### Innovative Products

#### Profit-Building Packaging

### The Driving Force In Circuit Protection

Cooper Bussmann is a worldwide company, leading the way in development of circuit protection technology. With more than 40,000 different fuse products, we offer the broadest market coverage in the industry. This catalog covers the hardware/home center markets and automotive aftermarket. For additional products or technical information, contact your Cooper Bussmann sales representative or our customer satisfaction team at:

- (636) 527-1461
- (636) 527-1477
- Toll-free fax (877) 359-2675

Additional information about these products can be found in the Automotive and Hardware/Home Center Price Sheets.

Cooper Bussmann offers the industry's most complete line of fuses and circuit protection products. Count on Cooper Bussmann for:

#### Automotive Products

- Blade fuses
- Glass tube fuses
- Fusible links and limiters
- Circuit breakers
- Fuse holders and blocks
- Flashers
- Accessories
- Product displays and assortments

### Hardware/Home Center Products

- Plug fuses
- Box cover units
- Cartridge fuses
- Appliance and electronic fuses
- Accessories
- Product assortments

These are the mass-market products that are always in high demand. Plus, we provide a wide range of niche products - for foreign cars, special applications and more.

A leading manufacturer of automotive fuses since 1917, the Cooper Bussmann product line includes all the industry's latest circuit protection products - such as mini- and maxi-style circuit breakers. We've introduced exciting accessories for today's fast growing applications: mobile phones, audio/video equipment and marine, among others.

Cooper Bussmann keeps you on the cutting edge of circuit protection products. We're working with many of today's leading manufacturers to develop innovative products to protect sophisticated equipment and electronics.

Of course, Cooper Bussmann offers more than product coverage and innovative design. We're the industry leader in profit-building merchandising programs - boosting your sales with attractive package assortments, high-impact displays and dynamic product merchandisers.

#### About This Catalog

- Only the most common numbers for each product are shown.
- Complete product offerings are contained in the price sheets.
- Full circuit protection product amp ranges are shown in the specification pages 4 to 6.
- For fuses not shown in this catalog, visit [www.cooperbussmann.com](http://www.cooperbussmann.com).

## New Automotive Circuit Protection Products

### Fuses & Fuse Tester/Puller

- *easyID™* ATM, ATC and MAX illuminating fuses and holders, page 9
- *easyID™* FMX-\_\_ID illuminating female Maxi fuses, page 10
- Low-profile female Maxi fuses (FMX-\_\_LP Series), page 10
- CBBF battery fuses for main, auxiliary and marine circuit protection, page 11
- *easyID™* FRN-R\_ID indicating 250V cartridge fuses, page 38
- FT-4 Fuse puller/tester/flashlight for blade and glass tube fuses, page 45

### Circuit Breakers and Mini Devices

- ATM footprint Mini Devices for power conditioning, page 12
- CB227 Type III ATC footprint low-profile ignition protected circuit breakers, page 13

### Fuse Panels and Modules

- RTMF 20 Position fuse panel for ATM blade fuses and circuit breakers, page 19

- Power distribution relay module (CBPRM) and fuse block (CBPFM) for use with FMX fuses, page 19

### Fuses Assortments

- KM-6LP - Carded ATM low-profile assortment, page 25
- NO.24 - Emergency fuse safety kit assortment of 25 ATM, ATM\_LP, ATC, MAX and FMX fuses with fuse tester/puller, page 27
- NO.60LP - Low-profile ATM installer fuse assortment, page 31
- NO.105 - Late model automotive fuse assortment of low-profile and regular ATM, ATC and MAX blade fuses, page 32
- NO.290 - PRO-PAK Professional technician's assortment, page 32

### Marine-Rated High Amp Circuit Breakers, page 16

- CB187F Type III Surface-mount manual reset with switch function
- CB187P Type III Panel-mount manual reset with switch function
- CB251 Type I Ignition protected weatherproof panel-mount manual reset
- CB255 Type III Ignition protected weatherproof panel-mount manual reset with "Push-to-Trip" option

Cooper Bussmann circuit protection solutions comply with major industrial standards and agency requirements such as: BS, IEC, DIN, UL, NEMA, SAE, CSA, CE, C-UL, etc. and are manufactured at facilities that are ISO 9000 certified. This catalog is intended to present product data and provide technical information that will help the end user with design application. Cooper Bussmann reserves the right, without notice, to change design or construction of any products and to discontinue or limit distribution of any products. Cooper Bussmann also reserves the right to change or update, without notice, any technical information contained in this catalog. Once a product has been selected, it should be tested by the user in all possible applications. Further, Cooper Bussmann takes no responsibility for errors or omissions contained in this catalog, or for misapplication of any Cooper Bussmann product. Extensive product information is available in the Cooper Bussmann product data sheets available online at [www.cooperbussmann.com](http://www.cooperbussmann.com).

## Package Options

### Package Options

In addition to boxed product, Cooper Bussmann makes many of its products available in packaging that is designed for various retail environments and needs. These packaging options do not apply to every product. Check the Cooper Bussmann Price Sheet for availability. Below are explanations of the various packaging options you'll see listed in the product tables of this catalog.

Always consult the price sheet for minimum order quantities and increments.

For package and quantity specifications, visit [www.cooperbussmann.com/RetailPackaging](http://www.cooperbussmann.com/RetailPackaging).

### Blister Pack

#### Prefix Symbol: BP

This is for carded product that can be placed on a pegboard. It is ordered by adding a prefix to the basic product part number.

Example: To order a blister pack of GMA-1 fuse, specify BP/GMA-1.

Blister pack product is labeled in English with some product also containing Spanish labeling.

### Tri-lingual

#### Prefix Symbol: CP

This packaging is primarily for Canadian retailers where package language requirements are for English, French and Spanish labeling.

This is for carded product that can be placed on a pegboard. It is ordered by adding a prefix to the basic product part number.

Example: To order a tri-lingual blister pack assortment of ATC fuse, specify CP/AK-6.

### Value Pack

#### Prefix Symbol: VP

Value packs are resealable clamshell packages containing loose-packed fuses of a single amp rating. VP packs contain larger quantities of fuses than our standard blister packs, and are ideal for small shops and mobile technicians.

Example: To order a value pack of ATM-5 fuse, specify VP/ATM-5.

### Polybag

#### Suffix Symbol: BC

Residential fuses packed one per bag with a barcode. Designed for use with tilt bins.

Example: To order a polybag ABC-15 fuse, specify ABC-15BC.

### Reload

#### Suffix Symbol: RLD

Bulk fuses packed in a clear polybag with product label and bar code. Designed for reloading product into tilt-bins.

Example: To order a reload of ATM-5 fuse, specify ATM-5RLD.

### Reclosable Tins/Traditional Packs

ATM, ATM\_LP, ATC and MAX blade fuses and Glass tube fuses are standard packed in a reclosable tin.

### Assortments

Designed to be mounted on a peg board, assortments are a handy way to offer customers a variety of ratings that will cover general applications, such as the automotive replacement fuse ratings to keep in the glove box.

### easyID™ Illuminating Fuses and Fuse Holders

Special packaging to highlight this exciting new addition to the automotive blade fuse line. Coverage includes all popular ratings of ATM, ATC and MAX blade fuses and illuminating inline fuse holders for ATM and ATC fuses. See page 9 for details.

## ATM, ATC® and Maxi® Blade Fuses

The industry standard - used in most domestic and imported cars today. All Cooper Bussmann blade fuses meet or exceed OEM and SAE standards. Cooper Bussmann is a certified OEM supplier of ATC®, ATM and Maxi® (MAX) fuses to car manufacturers.

### Blade Fuse Color Codes (Amps)

| Color      | ATC | ATM | Low-Profile ATM | MAX |
|------------|-----|-----|-----------------|-----|
| Black      | 1   | -   |                 |     |
| Gray       | 2   | 2   |                 | 25  |
| Violet     | 3   | 3   |                 | -   |
| Pink       | 4   | 4   |                 | -   |
| Tan        | 5   | 5   | 5               | 70  |
| Brown      | 7½  | 7½  | 7½              | 35  |
| Red        | 10  | 10  | 10              | 50  |
| Blue       | 15  | 15  | 15              | 60  |
| Yellow     | 20  | 20  | 20              | 20  |
| Clear      | 25  | 25  | 25              | 80  |
| Green      | 30  | 30  | 30              | 30  |
| Blue-Green | 35  | -   | -               | -   |
| Orange     | 40  | -   | -               | 40  |

### ATM Blade Fuses

See page 9 for easyID™ illuminating versions

Introduced in the early '90s, ATM fuses are quickly growing in popularity for late-model OEM applications. ATM fuses use the same universal color-coding as ATC style. Cooper Bussmann ATM fuses feature an enclosed element offering protection against shocks and sparks, plus corrosion resistance for longer service life.

### ATC® Blade Fuses

See page 9 for easyID™ illuminating versions

ATC Blade fuses were introduced in the late '70s, and are still widely used by automotive OEMs. Cooper Bussmann ATC products use the industry's universal color-coding to indicate amp rating. Cooper Bussmann ATC fuses feature an enclosed element - offering protection against shocks and sparks, plus corrosion resistance for longer service life.

### Maxi® (MAX) Blade Fuses

See page 9 for easyID™ illuminating versions

Maxi Fuses are used to protect circuits in the wiring harness - usually found under the hood, in a fuse panel or supplementary panel near the battery. Primarily used in domestic cars, MAX fuses also have some applications in imported models. OEM applications currently range up to 60 amps, however, some aftermarket accessories (such as high-end stereos) require protection up to 80 amps.

## easyID™ Automotive Illuminating Blade Fuses and Fuse Holders

### Finding Open Fuses Is Now Easy with the Cooper Bussmann® Family of easyID™ Blade Fuses and Holders

Now, a drop-in replacement is available for low-voltage applications up to 80 amps that can benefit from open fuse indication. The Cooper Bussmann line of easyID illuminating blade fuses and holders use Light Emitting Diode (LED) technology to show that a fuse has opened, making them easy to spot in fuse panels tucked up under dark dashboards.

The ATM, ATC® and Maxi® fuses use the same universal color-coding as traditional non-illuminating fuses. Illuminating fuse holders allow adding circuits with easyID, but use regular ATM and ATC blade fuses.

Tri-lingual packaging in English, Spanish and French.

#### easyID™ ATM Illuminating Blade Fuses

Following on the popularity and wide application of ATM fuses for late-model OEM vehicles, the easyID illuminating ATM fuse line is available in popular ATM amp ratings with packaging that's designed for easy retail selling.

##### BP/ATM-AID Fuse Assortment

Contains one each of 10, 15, 20, 25 and 30 amp easyID illuminating ATM fuses

##### ATM-ID-SK Service Kit

Contains six each of 5, 10, 15, 20, 25 and 30 amp easyID illuminating ATM fuses. Ideal for fleet maintenance departments.

#### easyID™ Maxi® (MAX) Illuminating Blade Fuses

Used for protecting circuits in wiring harnesses (usually found under the hood, in a fuse panel or supplementary panel near the battery) Maxi Fuses are finding increased popularity in domestic cars and some import models. Current OEM applications range up to 60 amps, but some aftermarket accessories (such as high-end stereos) require protection up to 80 amps. The Cooper Bussmann® easyID Maxi illuminating fuse line is a sure seller for the high amp circuit protection market.

## Specialty and High Amp Fuses & Fusible Links

### Female Maxi Fuses

Developed to meet the growing OEM demand for smaller components, the FMX and low-profile FMX Female Maxi fuses offer high amp protection in compact packages. Both FMX and low-profile FMX fuses are available in amp ratings from 20 to 60A.

#### easyID™ FMX Illuminating Female Maxi Fuses

Following on the popularity and wider application of FMX fuses for late-model OEM vehicles, the easyID illuminating FMX fuse line with LED open fuse indication technology is available in popular amp ratings. Tri-lingual packaging provides easy retail selling.

### Fusible Links and Fusible Link Wire

14Vdc BP/FL-14 and BP/FL-16 kits includes 9" length fusible link wire with printed label attached indicating wire gauge numbers; two different ring terminals and crimp connector.

| Part No.  | Description  |
|-----------|--|
| BP/FL-14  | 9-inches of 14 gauge fusible link wire with $\frac{3}{16}$ " and $\frac{5}{16}$ " terminals and crimp connector. |
| BP/FL-16  | 9-inches of 16 gauge fusible link wire with $\frac{1}{4}$ " and $\frac{5}{16}$ " terminals and crimp connector.  |
| BP/FLW-14 | Six foot coil of 14 gauge fusible link wire.   |

### ANN & ANL Current Limiters

Often used to protect charging systems in battery-operated forklifts, golf carts and similar applications. These rugged, reliable fuses offer high amp ratings in a compact size just  $\frac{7}{16}$ " x  $3\frac{3}{16}$ ".

Durable glass-laminated melamine body and riveted construction offer superior service life in heavy-duty applications. Clear window provides open-fuse indication.

#### ANN Very Fast-Acting Current Limiters

For applications up to 800 amps. Uses SFR fuse block - see page 20.

### AMG High Amp Stud-Mount Fuses

| Part No.<br>(Amps) | Blister<br>Pack |
|--------------------|-----------------|
| AMG-100            |                 |
| AMG-125            |                 |
| AMG-150            |                 |
| AMG-175            | X               |
| AMG-200            |                 |
| AMG-225            |                 |
| AMG-250            |                 |
| AMG-300            |                 |

Used for high current applications on selected late model vehicles. AMG fuses are available in amp ratings from 100A to 300A. HMEG fuse block with splash-proof cover is also available - see page 20.

### AMI High Amp Stud-Mount Fuses

| Part No. (Amps) |
|-----------------|
| AMI-40          |
| AMI-50          |
| AMI-80          |

These high amp fuses are used in power distribution protection for automotive systems on some late model cars. AMI fuses are available in amp ratings: 40, 50, and 80A. Uses HMIID fuse holder - see page 20.

## Automotive Circuit Breakers

Cooper Bussmann offers the industry's largest selection of automotive circuit breakers including both OEM-style and fuse-replacement devices.

Circuit breakers are designed to offer a variety of performance characteristics including three types of reset.

(NOTE: Always follow the OEM's recommendations when replacing circuit breakers. Replace only with the same type breaker in aftermarket applications.)

### Type I - Automatic Reset

Circuit breaker automatically resets after opening. If the fault still exists, the breaker will continue to cycle between ON and OFF positions until the overload is corrected. These devices are sometimes called "cycling breakers." Type I/Automatic Reset circuit breakers do not address, or correct, overcurrent or fault conditions. They only react by cycling OFF and ON. Any overcurrent or fault condition that causes any Type I circuit breaker to operate should be corrected as soon as possible. Continual vehicle operation under an overcurrent or fault condition (causing the Type I circuit breaker to cycle) is NOT recommended.

### Type II - Modified Reset

The circuit breaker will remain tripped (in the OFF position) as long as there's power to the circuit, due to an internal resistor. Type II breakers can be reset by turning off the circuit, or by turning off the ignition switch. These devices are sometimes called "non-cycling breakers." Several Cooper Bussmann Type II breakers feature silver-colored bodies.

### Type III - Manual Reset

The circuit breaker will remain tripped (in the OFF position) until an indicator button or lever is manually reset. Type III breakers are also available with a switchable feature, which allows you to use an external button to disable the circuit. Cooper Bussmann circuit breakers feature our patented fail-safe technology - offering an innovative element design which combines the resettable performance of circuit breakers with the short-circuit protection of a fuse.

- Resettable, to work like a normal "cycling" breaker, in low overload conditions.
- Under severe overload or short-circuit conditions, the breaker's element will open to prevent damage to the circuit.

### Blade-Type Breakers

Cooper Bussmann blade-type circuit breakers are available in several reset modes that correspond to SAE categories: SAE Type I (automatic reset), SAE Type II (modified reset) and SAE Type III (manual reset). All Cooper Bussmann blade-type circuit breakers utilize carefully designed and manufactured snap-acting thermal elements with precious metal electrical contacts.

See page 6 for circuit breaker specifications.

### ATM Footprint Breakers

CB211 and CB212 Cooper Bussmann ATM footprint breakers match the blade footprint of ATM fuses. Ultra-thin, to fit in tight spaces - they're the smallest automotive circuit breakers on the market. Cooper Bussmann ATM footprint breakers comply with SAE standard J553.

#### CB211 Type I ATM Footprint Circuit Breaker

| Part No. (Amps) | Blister Pack |
|-----------------|--------------|
| CB211-7½        |              |
| CB211-10        | X            |
| CB211-15        | X            |
| CB211-20        | X            |
| CB211-25        | X            |
| CB211-30        | X            |

#### CB212 Type II ATM Footprint Circuit Breaker

| Part No. (Amps) |
|-----------------|
| CB212-10        |
| CB212-15        |
| CB212-20        |
| CB212-25        |
| CB212-30        |

#### MMB Type I Wide ATM Footprint Circuit Breaker For GM Vehicles

| Part No. (Amps) | OEM No.  |
|-----------------|----------|
| MMB-15          | 12135171 |
| MMB-20          | 12135072 |

### Mini Devices

Transorb, resistor and diode vehicle-style electrical protection devices easily install in common ATM fuse holders. These circuit protection devices provide voltage and current limiting functionality to vehicle circuitry; and are designed for the on- and off-highway requirements of heavy trucks, RV, construction, agriculture, ATV and material handling equipment.

- **Transorb** - Protects against voltage spikes. Clamp rating: 27Vdc. Power rating: 1500W
- **Resistor** - Drops circuit voltage. Power rating: 5W. Resistance: 68Ω.
- **Diode** - Prevents reverse current flow. Amp rating: 6A.

| Part No.    | Description                                   |
|-------------|---|
| CB22901-1.5 | Transorb voltage spike protector              |
| CB22902-68  | Resistor voltage drop device                  |
| CB22903-6   | Diode reverse current protector               |
| CB22903-6V  | Diode reverse current protector with wing key |

## Automotive Circuit Breakers

### ATC Breakers

CB221 and CB222 breakers are designed to fit ATC style fuse panels. Cooper Bussmann ATC breakers are the thinnest available in the aftermarket. These devices comply with SAE standard J553.

CB227 complies with SAE J553 and SAE J1171 for ignition protection.

Cooper Bussmann also offers three ATC-style breakers as replacement parts for specific OEM applications - ACB-20, CCB-25, and FCB-20.

### ACB-20 Type I ATC Footprint Circuit Breaker for GM Vehicles

| Part No. (Amps) | Blister Pack | OEM No.  |
|-----------------|--------------|----------|
| ACB-20          | X            | 12040816 |

### CB221 Type I ATC Footprint Circuit Breakers

| Part No. (Amps) |
|-----------------|
| CB221-7½        |
| CB221-10        |
| CB221-15        |
| CB221-20        |
| CB221-25        |
| CB221-30        |

### CB222 Type II ATC Footprint Circuit Breakers

| Part No. (Amps) |
|-----------------|
| CB222-10        |
| CB222-15        |
| CB222-20        |
| CB222-25        |
| CB222-30        |

### CB223 Type III ATC Footprint Circuit Breakers

| Part No. (Amps) |
|-----------------|
| CB223-7½        |
| CB223-10        |
| CB223-15        |
| CB223-20        |
| CB223-25        |
| CB223-30        |

### CB227 Type III ATC Footprint Low-Profile Circuit Breakers

| Color Code | Part No. (Amps) |
|------------|-----------------|
| Tan        | CB227-5         |
| Moss Green | CB227-6         |
| Brown      | CB227-7½        |
| Red        | CB227-10        |
| Blue       | CB227-15        |
| Yellow     | CB227-20        |
| White      | CB227-25        |
| Green      | CB227-30        |

### CBB-30 Type II ATC Footprint Circuit Breaker

| Part No. (Amps) | Blister Pack |
|-----------------|--------------|
| CBB-30          | X            |

### CCB-25 Type I ATC Footprint Circuit Breaker For Chrysler Vehicles

| Part No. (Amps) | OEM No. |
|-----------------|---------|
| BP/CCB-25       | 4527053 |

### FCB-20 Type II ATC Footprint Circuit Breaker for Ford Vehicles

| Part No. (Amps) | OEM No.       |
|-----------------|---------------|
| BP/FCB-20       | D9AB-14526-BA |

### UCB Type I ATC Footprint Circuit Breakers

UCB breakers feature "snap-off" universal blades that can easily be sized to fit applications where fuse block spacing is tight, or the fuse terminal is recessed.

| Color Code | Part No. (Amps) | Blister Pack | Tri-Lingual Blister |
|------------|-----------------|--------------|---------------------|
| Plain      | UCB-6           |              |                     |
| Brown      | UCB-8           |              |                     |
| Red        | UCB-10          | X            |                     |
| Blue       | UCB-15          | X            | X                   |
| Yellow     | UCB-20          | X            |                     |
| Plain      | UCB-25          | X            |                     |
| Green      | UCB-30          | X            | X                   |

## Automotive Circuit Breakers

### Maxi Breakers

Identical in size to Maxi-style fuses. The only breakers on the market to match the Maxi's footprint and body dimensions.

#### CB1911 Type I MAX Footprint Circuit Breakers

| Part No. (Amps) |
|-----------------|
| CB1911-10       |
| CB1911-15       |
| CB1911-20       |
| CB1911-25       |
| CB1911-30       |
| CB1911-35       |
| CB1911-40       |
| CB1911-50       |

#### CB1921 Type II MAX Footprint Circuit Breakers

| Part No. (Amps) |
|-----------------|
| CB1921-10       |
| CB1921-15       |
| CB1921-20       |
| CB1921-25       |
| CB1921-30       |

### Glass Tube Breakers

#### CBF Type II Circuit Breakers For Use In Glass Tube Fuse Holders and Blocks

CBF circuit breakers can be used to replace glass fuses in 1/4" x 1 1/4" small dimension fuse blocks.

| Part No. (Amps) | Blister Pack |
|-----------------|--------------|
| CBF-6           |              |
| CBF-10          |              |
| CBF-15          |              |
| CBF-20          |              |
| CBF-25          |              |
| CBF-30          | X            |
| CBF-35          |              |
| CBF-40          |              |

### Heavy-Duty Breakers

Used in many heavy-duty and truck applications. Use ring terminals to connect breaker into circuit.

Cooper Bussmann stud-type circuit breakers feature our patented fail-safe technology, and are available in styles: without bracket; with mounting bracket; waterproof, with mounting bracket and with combination blade and stud terminals. Complies with SAE standard J553.

#### CB123-B Type III 10-32 Stud-Mount Circuit Breakers with Crosswise Bracket and Cover

| Part No. (Amps) |
|-----------------|
| CB123-10B       |
| CB123-15B       |
| CB123-20B       |
| CB123-30B       |
| CB123-40B       |
| CB123-50B       |

#### CB123-HB Type III 10-32 Stud-Mount Circuit Breakers with Lengthwise Bracket and Cover

| Part No. (Amps) |
|-----------------|
| CB123-10HB      |
| CB123-15HB      |
| CB123-20HB      |
| CB123-30HB      |
| CB123-40HB      |
| CB123-50HB      |

#### CBC Type I 10-32 Stud-Mount Circuit Breakers

| Part No. (Amps) |
|-----------------|
| CBC-8           |
| CBC-10          |
| CBC-15          |
| CBC-20          |
| CBC-25          |
| CBC-30          |
| CBC-35          |
| CBC-40          |
| CBC-50          |

#### CBC-B Type I 10-32 Stud-Mount Circuit Breakers with Crosswise Bracket

| Part No. (Amps) | Blister Pack | Tri-Lingual Blister |
|-----------------|--------------|---------------------|
| CBC-8B          |              |                     |
| CBC-10B         |              |                     |
| CBC-15B         |              |                     |
| CBC-20B         | X            |                     |
| CBC-25B         | X            |                     |
| CBC-30B         | X            | X                   |
| CBC-35B         | X            |                     |
| CBC-40B         | X            |                     |
| CBC-50B         | X            |                     |

## Automotive Circuit Breakers

### CBC-BWP Type I 10-32 Stud-Mount Weatherproof Circuit Breakers

#### Part No. (Amps)

|           |
|-----------|
| CBC-20BWP |
| CBC-30BWP |

### CBC-HB Type I 10-32 Stud-Mount Circuit Breakers with Lengthwise Bracket

| Part No. (Amps) | Blister Pack |
|-----------------|--------------|
| CBC-10HB        |              |
| CBC-15HB        |              |
| CBC-20HB        | X            |

### Quick-Connect Breakers

Used in trucks, RVs, boats, buses, etc. offered with 1/4" quick-connect or 90° bent screw terminals.

### CBT-M Type II Circuit Breakers For Mack Trucks with 1/4" Blades on 1" Centers

#### Part No. (Amps)

|         |
|---------|
| CBT-10M |
| CBT-15M |
| CBT-20M |
| CBT-25M |
| CBT-30M |

### CBT-N Type II Circuit Breakers For Navistar Trucks with 1/4" Blades on 1.08" Centers

#### Part No. (Amps)

|         |
|---------|
| CBT-10N |
| CBT-15N |
| CBT-20N |
| CBT-25N |
| CBT-30N |

### CBU Type I Circuit Breakers with 1/4" Quick-Connect Terminals on 0.99" Centers (30B with crosswise bracket)

#### Part No. (Amps)

|         |
|---------|
| CBU-6   |
| CBU-30B |

## Automotive Circuit Breakers

### High Amp Circuit Breakers

These high amp circuit breakers are typically used in auxiliary and accessory circuits for trucks, buses, RVs and marine applications. All high amp circuit breakers comply with the SAE J1117 standard for ignition protection and have applications in battery charger systems and DC audio systems. Offered in flush-mount or panel-mount (see chart for amps available).

#### CB181F Type I High Amp Waterproof Circuit Breakers with SEMS Nuts Installed

##### Part No. (Amps)

|            |            |
|------------|------------|
| CB181F-60  | CB181F-110 |

### Marine-Rated Circuit Breakers

Specifically designed to meet the needs of marine applications, the CB187F and CB187P offer 5kA interrupting ratings and ignition protection per ABYC E-11. Usable as an ON/OFF switch (capable of withstanding 3000 on/off cycles @48Vdc), they have corrosion resistant plating on 5/16-18 copper terminals.

#### CB187F Type III Marine-Rated Surface-Mount Manual Reset Circuit Breaker with Switch Function and Nuts/Lock Washers Installed

##### Part No. (Amps)

|           |            |

## Fuse Holders & Taps

Cooper Bussmann offers a complete line of fuse holders to install either blade-type or glass tube fuses. Choose water resistant and/or splash-proof versions for extra protection in special applications. Four types of connectors are available to meet the needs of technicians and do-it-yourselfers:

- **Wire Loop.** To install, simply cut the wire, strip ends and attach each end to the circuit. Requires the use of additional connectors.
- **Crimp-On.** Strip wire and insert into fuse holder. Crimp the connections tightly, and you're done. No additional hardware needed.

- **Self-Stripping.** Easy to install — simply locate fuse holder at a convenient spot along the wire. Snap fuse holder closed around wire to pierce insulation automatically.
- **Quick-Connect.** Attach fully insulated female push-on terminal onto the 1/4" quick-connect terminals.

When selecting a fuse holder, always match the device to the wire being fused. Using an undersized fuse holder will increase electrical resistance in the circuit and reduce performance. NOTE: Never install a fuse with a larger amp rating than specified for the holder.

### Blade-Type Fuse Holders

#### In-Line Fuse Holders for ATM Fuses

| Part No.  | Blister Pack | Tri-Lingual Blister | Maximum Volts/Amps | Leadwire | Description            |
|-----------|--------------|---------------------|--------------------|----------|------------------------|
| HHL       | X            |                     | 32V/20A            | 2x4"/#16 | Holder with cover      |
| HHM       | X            | X                   | 32V/30A            | 2x4"/#12 | Holder with cover      |
| HHU       | X            |                     | 32V/30A            | 2x4"/#12 | Water-resistant holder |
| ATM-FHID* |              | X                   | 32V/20A            | 2x4"/#16 | Illuminating holder    |

\* For use with regular ATM fuses. For details on the easyID™ line of illuminating ATM blade fuses, see page 9.

#### In-Line Fuse Holders for ATC Fuses

| Part No.  | Blister Pack | Tri-Lingual Blister | Maximum Volts/Amps | Leadwire   | Description                       |
|-----------|--------------|---------------------|--------------------|------------|-----------------------------------|
| HHC       | X            | X                   | 32V/20A            | 2x4"/#16   | Yellow water-resistant holder     |
| HHD       | X            | X                   | 32V/30A            | 2x4"/#12   | Heavy-duty fuse holder            |
| HHD-30    | X            |                     | 32V/30A            | 2x4"/#12   | Holder with ATC-30A fuse          |
| HHF       | X            |                     | 32V/20A            | 2x4"/#16   | Holder with protective cover      |
| HHG       | X            | X                   | 32V/30A            | 2x4"/#12   | Heavy-duty holder with cover      |
| HHR       | X            |                     | 32V/30A            | 2x5"/#12   | Heavy-duty water-resistant holder |
| HHS       | X            |                     | 32V/20A            | #18 to #14 | Self-stripping fuse holder        |
| ATC-FHID* |              | X                   | 32V/20A            | 2x6"/#16   | Illuminating holder               |

\* For use with regular ATC fuses. For details on the easyID™ line of illuminating ATC blade fuses, see page 9.

#### In-Line Fuse Holders for Maxi Fuses

| Part No. | Volts/Amps | Leadwire | Description            |
|----------|------------|----------|------------------------|
| HHX      | 32V/20-60A | 2x5"/#6  | Fuse holder with cover |

## Fuse Holders & Taps

### Fuse Taps For ATM and ATC Fuses

Tap into an existing circuit to power a mobile phone, stereo components, etc. with Cooper Bussmann fuse tap accessories.

| Part No.   | Description  |
|------------|--|
| BP/ATM-TAP | 5-Count: Taps into existing ATM fuse for additional non-fused circuit, includes crimp-on connector that attaches easily to the power lead for electronic gear. |
| BP/ATC-TAP | 5-Count: Taps into existing ATC fuse by fitting over the leg for additional non-fused circuit, includes crimp-on connector.                                    |
| BP/HHH     | Converts ATM fuse circuit into two fusible circuits. Inserts into ATM fuse block, added circuit 10A max.   |
| BP/HHA     | Converts an ATC fuse circuit into two fusible circuits. Inserts into ATC fuse block, added circuit 10A max.  |

### Glass Tube In-Line Holders For 1/4" Diameter Fuses

| Part No. | Blister Pack | Tri-Lingual | Fuse/Size                      | Ratings Volts/Amps | Leads/Terminals        | Description Feature  |
|----------|--------------|-------------|--------------------------------|--------------------|------------------------|--|
| HFA      |              |             | 1/4" x 1 1/4"                  | 250V/20A           | Crimp #12 to 16 wire   | Water-resistant-black body   |
| HFB      | X            | X           | 1/4" x 1 1/4"                  | 32V/30A            | Crimp #12 to 18 wire   | Water-resistant-yellow body  |
| HHB      | X            | X           | 1/4" x 1/8" to 1 1/4"          | 32V/30A            | Crimp #12 to 16 wire   | Universal-yellow body  |
| HHK      | X            | X           | 1/4" x 5/8" to 1 1/4" & SFE-20 | 32V/20A            | #14 leadwire/yellow    | Universal nylon, twist lock, no fuse-black body                                  |
| HHN      | X            |             | 1/4" x 1 1/4"                  | 32V/30A            | #12 leadwire/yellow    | Nylon heavy-duty w/ AGC-30 fuse-white body                                       |
| HMJ      | X            | X           | For SFE-20 (included)          | 32V/20A            | 8" of #14 leadwire/bk  | With fuse and wire loop leads-black body   |
| HMK      | X            | X           | 1/4" x 1 1/4" & SFE-20         | 32V/30A            | #12 leadwire/bk        | No fuse, wire loop leads-black body  |
| HRH      |              |             | For SFE-9 (included)           | 32V/9A             | 19" of #14 leadwire    | With fuse and wire loop leads-black body   |
| HRI      |              |             | For SFE-14 (included)          | 32V/14A            | 19" of #14 leadwire/bk | With fuse and wire loop leads-gray body  |
| HRJ      |              |             | For SFE-20 (included)          | 32V/20A            | 19" of #14 leadwire/bk | With fuse and wire loop leads-black body   |
| HRK      | X            | X           | 1/4" dia. x 1/8" to 1 1/4"     | 32V/15A            | #14 leadwire/bk        | Universal with wire loop leads and springs for different fuse lengths-black body |

### Panel-Mount Holders For 1/4" x 1 1/4" Fuses

| Part No. | Blister Pack | Max. Panel Thickness | Knob Type           | Description/Mounting                      | Terminals                                | Ratings Volts/Amps |
|----------|--------------|----------------------|---------------------|---|--|--------------------|
| HKP      | X            | 0.3"                 | Knob                | High-profile cover knob, rear hexnut      | Solder terminals                         | 250V/30A           |
| HKP-HH   | X            | 0.3"                 | Knob                | High-profile cover knob, rear hexnut      | 1/4" quick-connect terminals             | 250V/15A           |
| HTB-26I  |              | 0.3"                 | Knob                | Low-profile cover knob, rear hexnut       | In-line 1/4" quick-connect terminals     | 250V/20A           |
| HTB-38I  |              | 0.3"                 | Screwdriver/slotted | Low-profile cover knob, rear hexnut       | Right angle 1/4" quick-connect terminals | 250V/20A           |
| HTB-68I  |              | 0.3"                 | Knob                | Low-profile cover knob, front hexnut      | Right angle 1/4" quick-connect terminals | 250V/20A           |
| HTB-88I  |              | 0.125"               | Knob                | Low-profile cover knob, through-hole snap | Right angle 1/4" quick-connect terminals | 250V/20A           |

## Fuse Panels, Blocks, Junction Blocks & Terminal Strips

Designed for versatility, durability and ease-of-installation, Cooper Bussmann fuse panels and blocks deliver the ideal solution for many applications. Cooper Bussmann fuse panels and blocks are molded of high-performance thermoplastic, and feature high quality hardware in a choice of connector styles.

### Fuse Panels For Blade Fuses

#### RTMF Fuse Panel - ATM Footprint

The Rear Terminal 20 Position ATM Fuse Panel provides efficient power distribution in a rugged compact package.

The RTMF offers a weather tight enclosure (IP66/67) for ATM blade fuses and circuit breakers when cover, cable seals, and cavity plugs are installed.\*

*Shown with deep cover.  
Fuses and circuit breakers sold separately.*

| Part No. | Description                               |
|----------|---|
| RTMF     | 20 position fuse block                    |
| RTMF-SC  | 20 position fuse block with shallow cover |
| RTMF-DC  | 20 position fuse block with deep cover    |

\*Electrical terminals, cable seals and cavity plugs are either Delphi Packard Metri-Pack® 280 Series terminals (sealed/tangless) or AMP® terminals. They accept #12-22 AWG wire sizes. Delphi Packard 280 Series cavity plugs are installed where wires are not used. Seals and cavity plugs not sold by Cooper Bussmann.

### 15600 Fuse Panels - ATC Footprint

A single, common power input makes it simple to wire for multiple circuits - each rated to 30 amps, up to 32 volts. Molded of high grade thermoplastic, for superior performance. Quick-connect terminals for easy installation. Recessed fuse contacts provide finger-safe protection.

*Fuses and circuit breakers sold separately.*

| Fuse Positions | Short Base Part No. | Blister Pack | Tri-Lingual Blister | Long Base Part No. |
|----------------|---------------------|--------------|---------------------|--------------------|
| 4              | 15600-04-20         |              |                     | 15600-04-21        |
| 6              | 15600-06-20         | X*           | X*                  | 15600-06-21        |

| 14             | 15600-14-20         |              |                     | 15600-14-21        |
| 16             | 15600-16-20         |              |                     | 15600-16-21        |
| 18             | 15600-18-20         |              |                     | 15600-18-21        |
| 20             | 15600-20-20         |              |                     | 15600-20-21        |

\*Not available for long base panels.

### Power Distribution Relay Module & Fuse Block

The sealed Power Relay Module (CBPRM) and Power Fuse Module (CBPFM) are compact power distribution modules for high current applications having extreme moisture and high vibration.

The 24 volt CBPRM contains a 35A relay and two FMX fuse positions (one protects the relay and the other a single-circuit in-line fuse)

The CBPFM has two FMX fuse positions for separate circuits.

Both the CBPRM and CBPFM feature rugged M8 power input studs, and an IP66 removable, weather-tight cover to protect the fuse positions.

*FMX fuses sold separately.*

Electrical terminations not supplied by Cooper Bussmann.

| Part No. | Description        |
|----------|--------------------|
| CBPFM    | Power Fuse Module  |
| CBPRM    | Power Relay Module |

### S-8202 Series 300 Volt, 20 Amp Glass Tube Fuse Blocks

| Part No. (Poles) | Blister Pack | Tri-Lingual Blister |
|------------------|--------------|---------------------|
| S-8202-1         | X            |                     |
| S-8202-2         | X            | X                   |
| S-8202-3         |              |                     |
| S-8202-4         | X            |                     |
| S-8202-5         |              |                     |
| S-8202-7         |              |                     |
| S-8202-8         |              |                     |
| S-8202-9         |              |                     |
| S-8202-10        |              |                     |
| S-8202-12        |              |                     |

S-8202 – Fuse blocks with 1/4" quick-connect terminals 300 volt rating. Available in 1 through 12 position units. Break-away design lets you snap off or combine positions as needed to get the exact number required for your application. UL recognized, 20 amp maximum.

### S-8301 Series 300 Volt, 30 Amp Glass Tube Fuse Blocks

| Part No. (Poles) | Blister Pack |
|------------------|--------------|
| S-8301-1         | X            |
| S-8301-2         |              |
| S-8301-3         |              |
| S-8301-4         |              |
| S-8301-5         |              |
| S-8301-6         |              |
| S-8301-7         |              |
| S-8301-8         |              |
| S-8301-9         |              |
| S-8301-10        |              |
| S-8301-11        |              |
| S-8301-12        |              |

S-8301 – Fuse blocks with screw connect terminals 300 volt rating. Available in 1 through 12 position units. Break-away design lets you snap off or combine positions as needed to get the exact number required for your application. UL recognized, 30 amp max.

## Fuse Panels, Blocks, Junction Blocks & Terminal Strips

### HMEG Fuse Holder

Use with AMG fuses from 100 to 300 amps. Recommended wire size #2-8. HMEG fuse holders have full-access design for ease of wiring. HMEG is impact resistant and has durable plastic base and cover.

### HMID Fuse Block

Use with AMI fuses from 40 to 80 amps. Multiple blocks can be linked together to form an assembly.

### SFR Fuse Block

Lift truck fuse holder. Use with ANN and ANL fuses.

| Part No. | Description  |
|----------|--|
| HMEG     | Stud Fuse Holder with Cover for use with AMG high amp fuses.                               |
| HMID     | Stud Fuse Holder with Cover for use with AMI high amp fuses, linkable to form an assembly. |
| SFR      | Open Stud Fuse Block for ANN and ANL current limiters                                      |

### Junction Blocks

**C1938** Feed-through stud-type junction block  $\frac{3}{8}$ -16 thread/stud size, 250\* amps max.

**JB3816-2** Non-feed through stud-type junction block  $\frac{3}{8}$ -16 thread/stud size, 250\* amps max.  
\*Voltage rating dependent upon installation

BP/C1938

BP/JB3816-2

| Poles | Part No.    | Type                       | Stud Thread       |
|-------|-------------|----------------------------|-------------------|
| 1     | BP/C1938    | Stud Junction Feed Through | $\frac{3}{8}$ -16 |
| 1     | BP/JB3816-2 | Stud Junction Block        | $\frac{3}{8}$ -16 |

### Battery Power Tap

BP/BAT-TAP - Attaches directly to battery terminal to create three additional circuits.

BP/BAT-TAP

| Part No.   | Description  |
|------------|--|
| BP/BAT-TAP | Attaches to side battery terminal to create three, non-fused $\frac{1}{4}$ " quick-connect circuits. |

### Terminal Strips and Blocks

BP/C5237 Designed for trucks, RVs and wiring accessories - Cooper Bussmann stud-type junction blocks, BP/C5237-3BC, BP/C5237-6BC and BP/C5237-8BC available in 3, 6 and 8 terminal configurations. Rated for applications to 30A, 300V (UL)/ 600V (CSA).

TB200 and TB300 terminal blocks are nickel-plated brass with black thermoplastic construction.

| Poles | Part No.     | Type                     | Stud/Screw | Volts/Amps |

## Switches & Indicating Lights

### Toggle and Rocker Switches

Cooper Bussmann offers a complete line of switches and indicating lights, both for replacement applications and special aftermarket installations. The

Cooper Bussmann switch line includes toggle switches, rocker switches, and duck bill toggle switches - all in a variety of styles, colors and finishes.

#### Toggle Switches

| Color  | Part No. | Tri-Lingual Blister | Function | Rating  | Feature |

## Automotive Flashers

Cooper Bussmann offers a complete line of flashers for a wide variety of applications. All Cooper Bussmann flashers meet SAE standards and other applicable state and federal guidelines.

To select the proper replacement flasher, match these three specifications:

- Specific vs. Variable load. Specific load flashers are designed to flash only a certain number of lamps. Variable load flashers can handle a range of amps, such as is required with a trailer in tow.
- Lamp capacity. Designates the total number of lamps in the circuit for the left or right directional signal.

### Thermal and Electronic 12 and 24 Vdc Flashers

| Part No. | Blister Pack | Tri-Lingual Blister | Type                        | Terminals | Volts | Amps | Number of Bulbs |

\* Alternating

- Number of terminals. Select either a two or three blade flasher, to match the socket in the panel.

### Thermal Flashers

- Uses heat build-up to flash circuit on and off.
- Features an audible click, alerting driver that a directional signal is engaged.
- Generally used in older model year vehicles.
- Operates correctly under variable load – flashing the designated vehicle lamps only; or additional lamps when a trailer is in tow.
- Does not indicate lamp outage.

### Heavy-Duty Electronic Flashers

- These flashers rely on electronic circuitry - not heat - to operate. Excellent performance in extreme climates.
- Original equipment on many late-model cars and light trucks - both domestic and imported.
- Direct plug-in replacement. No adapter required.
- Flashes at twice the normal speed to indicate lamp outage, and features an audible click when engaged.
- Electronic design provides superior service life.

### Super Heavy-Duty Electronic Flashers

- Provides variable load functionality in heavy-duty applications.
- Replacement flasher for domestic cars, light trucks and vans.
- Electronic design provides superior service life.

## Troubleshooting Guide

Flashers and lamps are the source of most problems with directional signals, But many other conditions can cause malfunctions, too; loose or corroded connections; inadequate grounding of the turn signal switch; worn turn signal lever, etc.

| Symptom  | Solution   |
|--|--|
| • Signal lamps light, but don't flash                    | • Check and/or replace flasher   |
| • Signal lamps do not operate on either side of vehicle  | • Check and/or replace fuse  |
| • Both signal lamps are out on one side of vehicle       | • Check for bad lamps<br>• Check grounding and wiring from turn signal lever   |
| • One signal lamp is out on one side of vehicle          | • Check and/or replace lamp  |
| • Signal lamp flashes too rapidly on one side of vehicle | • Check and/or replace lamps<br>• Check whether the proper lamp is installed (A heavy-duty lamp in a standard circuit will flash too rapidly.) |
| • Signal lamp flashes too slowly on one side of vehicle  | • Check whether the proper lamp is installed (A standard lamp in a heavy-duty circuit will flash too slowly)                                   |

## Battery Disconnect Switches, Surge Protectors & Computer Memory

### Battery Disconnect Switch

**BP/BMS-1** Top post anti-theft battery master switch kit. Complete with HHM fuse holder and ATM-20 fuse, ring terminals and stainless steel bolt and wing nut.

**BP/BMS-2** Side post anti-theft battery master switch kit for GM vehicles. Complete with HHM fuse holder and ATM-20 fuse and ring terminals.

**15968-1** Heavy-duty switch is designed to open the circuit between the battery and the electrical load of a battery powered system- typically in large truck applications. The switch is rated at 50Vac/dc maximum, 400A continuous. It can withstand cranking or surge currents up to 2000A for a maximum of 5 seconds.

**BP/SP-1** Surge protector jumper cable upgrade kit for automotive and marine applications. Can be used for cables up to 3 gauge.

### Battery Disconnect Switches and Surge Protector

| Part No. | Description  |
|----------|--|
| BP/BMS-1 | Top post anti-theft master switch with HHM fuse holder and ATM-20 fuse and ring terminals  |
| BP/BMS-2 | Side post anti-theft master switch with HHM fuse holder and ATM-20 fuse and ring terminals |
| 15968-1  | Heavy-duty disconnect: 50Vac/dc, 400A maximum  |
| BP/SP-1  | Jumper cable 12Vdc surge protector kit for cables up to 3 gauge                            |

## Retail Packaging & Assortments

Make your selling space work harder - with America's best-known name in fuses.

### Retail Automotive Fuse Assortments

Fuse assortments provide customers a handy selection of fuses and fuse ratings for general replacement applications.

**AK-6\*** - ATC Assortment: 5, 10, 15, 20, 25 & 30A

**BP/AGA-AH** - AGA Assortment: 10, 15, (2)20 & (2)30A.

**BP/AGA-AL** - AGA Assortment: 1, 2, 3, (2)5 & 7½A

**BP/AGC-L** - AGC Assortment: 1, (2)2, & (3)3A.

**BP/AGW-A** - AGW Assortment: 7½, (2)15, (2)20 & 30A.

**BP/AGX-A** - AGX Assortment: (2)20, (2)25 & (2)30A

**BP/SFE-AH** - SFE Assortment: (2)14, (2)20 & 30A.

**BP/SFE-AL** - SFE Assortment: 4, 6, (2)7½ & (2)9A.

**CB-5\*** - Car Phone & Mobile Entertainment Assortment:

AGC-1½, (2)2, 2½ & 3A

**KE-5** - British Car Assortment: AGC-7½, 15, 20, 25 & 30A.

**KG-5\*** - German/European Car Assortment: GBC-5, (2)8, 16 & 25A.

**KJ-5\*** - Japanese Car Assortment: AGC-5, 10, 15, 20 & 30A.

**KJA-6\*** - ATC Japanese Car Assortment: 5, 7½, 10, 15, 20 & 30A.

**KM-6LP** - ATM Low-Profile Assortment: 7½LP, 10LP, 15LP, 20LP, 25LP, & 30LP

**KM-8\*** - ATM Assortment: 2, 5, 7½, 10, 15, 20, 25 & 30A.

**MKA-5** - ATC Motorcycle Assortment: 5, 7½, 10, 15 & 20A.

**MKG-6** - Motorcycle Assortment: AGX-5, (2)8, 10, 15 & 20A.

**UK-6\*** - American Car Assortment: AGC-5, 15 & 30;

SFE-9, 14 & 20A.

\* Also available in tri-lingual packaging. Add "CP/" prefix to part number.

*Bold, high-impact package graphics stand out on the shelf: Cooper Bussmann signature colors - bright yellow and black - catch the eye and generate impulse sales.*

*Minimize handling costs - self-service instructions are printed on every card.*

## Retail Packaging & Assortments

Build impulse sales with fuse emergency kits. A great way to remind consumers to keep spare fuses on hand.

Use emergency kits to merchandise multiple locations in your store - to generate new sales and profits from unused selling space.

### Retail Automotive Fuse Emergency Kits

Fuse emergency kits provide customers a handy selection of fuses and fuse ratings along with a fuse puller for general replacement applications.

**AT-7\*** - ATC Kit: 5, 10, 15, 20, 25 & 30A and FP-A3 Fuse Puller.

**DIA-1** - ATC Diagnostic Kit: 5, 10, 15, 20, 25 & 30A and FT-3 Fuse Tester/Puller.

**DIA-2** - ATM Diagnostic Kit: 2, 5, 7½, 10, 15, 20, 25 & 30A and FT-3 Fuse Tester/Puller.

**EK-7\*** - American Car Kit: AGC-5, 15 & 30; SFE-9, 14 & 20A and FP-A3 Fuse Puller.

**KG-7\*** - German/European Car Kit: GBC-5, (2)8, 16 & 25A and FP-A3 Fuse Puller.

**KJ-7\*** - Japanese Car Kit: AGC-5, 10, 15, 20 & 30A and FP-A3 Fuse Puller.

**KJA-7\*** - ATC Japanese Car Kit: 5, 7½, 10, 15, 20 & 30A and FP-A3 Fuse Puller.

**KM-9\*** - ATM Kit: 2, 5, 7½, 10, 15, 20, 25 & 30A and FP-A3 Fuse Puller.

**MKA-6** - ATC Motorcycle Kit: 5, 7½, 10, 15 & 20A and FP-A3 Fuse Puller.

**MKG-7** - Motorcycle Kit: AGX-5, (2) 8, 10, 15 & 20A and FP-A3 Fuse Puller.

\* Also available in tri-lingual packaging. Add "CP/" prefix to part number.

## Retail Packaging & Assortments

Increase the "total ring" on your fuse assortment sales - with Cooper Bussmann large-count fuse packages.

Cooper Bussmann Bonus Packs are great for small shops, do-it-yourself mechanics - or for stocking commercial/ service vehicles.

### Retail Automotive Fuse Bonus Packs

Fuse bonus packs provide customers a large quantity and selection of fuses and ratings along with a fuse tester/puller for general replacement applications.

**AGC-EK** - AGC Kit: (60 pieces/10 each) 5, 10, 15, 20, 25 & 30A and FT-3 Fuse Tester/Puller.

**ATM-FMX-EK** - ATM and FMX Emergency Kit: 5 each of ATM-10, 15, 20, 25 & 30A, and 1 each of FMX-20, 30, 40, & 50A and FT-3 Fuse Tester/Puller.

**NO.24** - Emergency Fuse Safety Kit: one each of ATM-10, 15, 20, 25, 30, ATM-10LP, 15LP, 20LP, 25LP, 30LP, ATC-3, 5, 7½, 10, 15, 20, 25, 30, 40, MAX-30, 40, FMX-30, 40 and FT-3 Fuse Tester/Puller.

**NO.43\*** - ATM Kit: 7 each of 5, 10, 15, 20, 25 & 30A and FT-3 Fuse Tester/Puller. Fuses are loose-packed for easy access in reclosable heavy-duty clamshell package.

**NO.44\*** - ATC Kit: 7 each of 5, 10, 15, 20, 25 & 30A and FT-3 Fuse Tester/Puller. Fuses are loose-packed for easy access in reclosable heavy-duty clamshell package.

**NO.53** - ATC and Maxi Fuse Kit: (45 pieces) ATC-10, 15, 20, & 30A; MAX-30, 40 & 50A and FT-3 Fuse Tester/Puller.

**NO.64** - ATM and Maxi Fuse Kit: (64 pieces) ATM-2, 3, 4, 5, 7½, 10, 15, 20 & 30A; MAX 30, 40 & 50A and FT-3 Fuse Tester/Puller

**NO.80** - ATC Bulk Assortment: (80 pieces/10 each) 3, 5, 7½, 10, 15, 20, 25 & 30A. Fuses are loose-packed for easy access. Reclosable, heavy-duty clamshell package stores easily in tool boxes.

\* Also available in tri-lingual packaging. Add "CP/" prefix to part number.

## Marine Displays & Retail Assortments

### Marine Displays and Assortments

#### NO.108BK

Circuit protection emergency kit. Provides for replacement of fuses and circuit breakers for almost any marine electrical circuit. Sturdy, compact reclosable box. A must for commercial marine applications or boating enthusiasts. Contains:

**Fuses:** Five each of ABC-10, AGC-1½, GMA-2A, MDA-8, ten of AGC-3, 7½, 15, 25, fifteen of AGC-20, 30.

**Circuit Breakers:** Three each of CBF-30.

#### NO.M200

Contains the most popular fast-acting and time-delay marine fuses. Comes complete with free rack and inventory/reorder feature.

40 Tins (200 fuses). Contains one tin each of ABC-15, AGA-20, AGC-¼, ½, ¾, 1½, 2½, 3, 4, 5, 7½, ATC-10, 15, 20, 25, 30, GMA-1, 2, 3, MDA-8, SFE-7½, 9, two tins each of AGC-1, 2, 10, 15, 20, 25, 30, SFE-14, 20.

### Marine Fuse Kits & Accessories

**BPA-5:** Marine accessory and bilge pump fuse assortment:

- AGC-5, 10, 15, 20 & 30A.

**BP/MDL:** ½ to 30A time-delay fuses for marine motor protection. Two MDL fuses per card.

**MA-5:** Marine accessory assortment:

- AGC-½, 1, 1½, 2 & 3A

**MK-6:** Marine fuse assortment containing:

- SFE-9, 14 & 20A
- AGC-10, 15 & 30A

See Page 11 for CBBF Marine Rated Battery Fuses

## Retail Packaging & Assortments

### Retail Automotive Plan-O-Gram

Color-Coded packaging for fast, easy product selection.  
Fits standard four-foot wide gondola.

#### Visual Categorization

- New, color-coded Cooper Bussmann retail packaging
- Fast and easy product identification
- Provides increased shop-ability and faster merchandising

#### Merchandising Ease

- Retail set is simple and straightforward
- Color-coding encourages return of product to correct peg
- Reduces need for assistance by store personnel

#### Consumer Friendly

- Fuse Center is easily located
- Point-of-sale identifies fuse types
- Package color indicators zero-in on category

Contact Cooper Bussmann for the most recent Plan-O-Gram product SKUs

## Installer Tilt-Bin Assortments

AFC-90

AFC-225

NO.225

NO.227

NO.235

NO.236

TEFC

Turn any pegboard or shelf into a profit-building professional fuse center with interlocking tilt-bin sets from Cooper Bussmann. Bin rows are stocked with assortments of the fastest-selling fuses, holders and accessories. Transparent, tilt-out bins make selection a snap, and let you check inventory at a glance. Order the complete Fuse Center unit - or any combination of bin rows.

Reload part numbers are available for AFC-225, NO.225 and NO.227. The reloads are packed in a polybag labeled with the part number and UPC code.

Bins can be stacked in any combination so you can modify your display to fit your customer's needs.

### Fuses:

**AFC-90:** Two bin sets containing five each of MAX-20, 30, 40, 50 & 60A and FMX-20, 3 & 40A fuses, FLB-70, FLF-20, 30, 40 & 60A and FLM-60, 80 & 100A and FLS-30 & 40A fusible links.

**AFC-225:** 25 Each glass tube fuses. AGC-5, 10, 15, 20, 25 & 30A and SFE-14, 20, & 30A.

**NO.225:** 25 Each ATC blade fuses: 3, 4, 5, 7½, 10, 15, 20, 25 & 30A.

**NO.227:** Ten each ATM blade fuses: 2, 3, 5, 7½, 10, 15, 20, 25 & 30A.

### Circuit Breakers

**NO.235:** Five each of CBB-30, CBF-20, & 30A, UCB-10, 15, 20, 25 & 30A and two CBC-30B.

### Fuse Holders:

**NO.236:** Five each of HHB, HHD, HHG, HHM, HHN, HMK.

### Flashers:

**TEFC:** Three each of NO.232 and NO.233, five each of NO.550 and NO.575, and ten each of NO.552.

*All seven units stacked together provide a complete fuse selection for the automotive repair technician. Bins interlock and can be wall-mounted.*

## Installer Assortments

### Traditional Automotive Displays and Assortments

#### NO.200 Glass Tube and Blade Fuses

40 Tins (172 fuses). The most popular display stand offers a variety of glass tube and blade fuses for every service need. Comes with inventory/reorder feature. Contains one tin each of AGC-1, 2, 3, 5, 7½, 10, 15, 20, 25, 30, ATC-3, 4, 5, 7½, 10, 15, 25, 30, ATM-2, 3, 4, 5, 7½, 10, 15, 20, 25, 30, GBC-8, MAX-20, 30, 50, SFE-14, 20 and two tins each of ATC-20 and MAX-40, 60.

#### NO.500 Glass Tube and Blade Fuses

100 Tins (480 fuses). A complete and well balanced stock. Meets every service need for American and foreign cars and trucks, new and old. Comes complete with inventory/reorder feature. Contains one tin each of AGA-5, 20, AGC-1, 2, 4, 7½, AGW-15, 20, AGX-20, 30, ATC-3, 4, 7½, ATM-2, 3, 4, 5, 7½, 10, 15, 20, 25, 30, GBC-8, 16, 25, MAX-20, 30,

40, 50, 60, SFE-4, 6, 7½, 9, 14, 20, 30, two of AGC-3, 5, 10, 15, 25, ATC-5, four of ATC-25, five of ATC-10, six of AGC-20, SFE-20, seven of AGC-30, ATC-15, 30, and eight of ATC-20.

#### NO.90 ATC Fuses

10 Tins (90 fuses). Selection of ATC blade fuses. Fuses tins are packed in plastic box with inventory strip on inside lid. Contains one tin each of 3, 4, 5, 7½, two of 10, 15, 30, three of 25 and five of 20.

#### NO.45 Fusible Link Kit

The top 16 assorted fusible links for wiring harness protection. Comes with selection guide on inside lid. Contains one each of FLB-40, 60, 70, FLD-80, FLF-20, 30, 40, 50, 60, FLM-80, 100, FLS-30, 40, FMX-20, 30, 40.

#### NO.60LP Low-Profile ATM Fuses

Assortment contains 60 fuses: ten each of ATM-7½LP, 10LP, 15LP, 20LP, 25LP & 30LP.

#### NO.95BK ATC & ATM Bulk Display

Selection of 95 ATC and ATM blade fuses. Fuses are loosely packed in 12-cavity, shatter-resistant plastic box. Contains five tins each of ATC-5, 15, 25, ATM-5, 10, 15, 25, 30, ten of ATM-20, fifteen of ATC-10, 20, 30.

#### NO.100BK ATC Bulk Display

Selection of 160 ATC blade fuses. Fuses are loosely packed in 12-cavity, shatter-resistant plastic box. Contains five tins each of 1, 2, 3, 4, 7½, 15, 25, 40, fifteen of 5, 10, 20, 30.

#### Display Cards for In-Line Fuse Holders

Easy hassle-free way to set up a fuse shop in any retail outlet (convenience stores, service stations, auto supply).

Top-selling assortments are merchandised on sturdy display cards to turn any pegboard into extra fuse profits.

#### Blade-Type:

**HHD-12:** 12 HHD ATC blade-type fuse holders (fuses not included)

## Installer Assortments

### NO.290 - PRO PAK Professional Technician's Assortment

Contains the circuit protection products every service technician needs. The compact case organizes 290 of the most common circuit protection products to restore power fast. Comes with a free, high-power white LED spotlight.

#### FREE Tech Spotlight

- High-powered White LED Mounted on Insulated Flexible Cord
- Locking on/off switch
- Batteries included: 3 AG13 button cell
- High-grade polished aluminum housing with metal clip and magnetic base that clings to metal surfaces

### NO.290 - PRO PAK Professional Technician's Assortment Contents

- Fuse Assortments: AGA-AL (1, 2, 3, 5 & 7½A), AGA-AH (10, 15, 20 & 30A), AGW-A (5, 7½, 15, 20 & 30A) and AGX-A (5, 8, 20, 25 & 30A)
- AGC glass fuses. One tin each containing five fuses: AGC-1, 2, 3, 4, 5, 7½, 10, 15, 20, 25 & 30A.
- SFE size-rejecting ¼" glass fuses. One tin each containing five fuses: SFE-4, 7½, 9, 14, 20 & 30A.
- GBC German vehicle fuses. One tin each containing five fuses: GBC-8, 16 & 25A.
- ATM blade fuses. One tin of each rating containing five fuses: ATM-5, 7½, 10, 15, 20, 25 & 30A.
- Low-profile ATM blade fuses. One tin each containing five fuses: ATM-7½LP, 10LP, 15LP, 20LP, 25LP & 30LP.
- ATC blade fuses. One tin each containing five fuses: ATC-3, 4, 5, 7½, 10, 15, 20, 25, 30, 35 & 40A.
- Maxi blade fuses. MAX-20, (2)30, (2)40, 50, 60, 70 & 80A.
- FLB bolt-mount fusible links. One each: FLB-40, 50, 60, 70 & 80A.
- FLD bolt-mount fusible link. One FLD-80A.
- FLF female termination fusible links. One each: FLF-20, 30, 40, 50 & 60A.
- FLM male termination fusible links. One each: FLM-60, 80 & 100A.
- FLS female miniature termination fusible links. One each: FLS-30 & 40A.
- FMX female Maxi fusible links. One each: FMX-20, 30, 40, 50 & 60A.
- FMX\_LP low-profile female Maxi fuses. One each: FMX-20LP, 25LP, 30LP, 40LP, 50LP & 60LP.
- HHD 30A ATC fuse holder
- HHM 30A ATM fuse holder
- HHN glass tube fuse holder with AGC-30A fuse
- HMK heavy-duty glass tube fuse holder
- CBB-30 Type II 30A ATC blade-type circuit breaker
- CBC-30HB Type I stud-mount 30A circuit breaker with lengthwise bracket
- UCB-20 Universal 20A ATC blade-type circuit breaker
- UCB-30 Universal 30A ATC blade-type circuit breaker
- FT-3 fuse puller/tester, FP-A3 3-way fuse puller

### NO.105 Late Model Automotive Fuse Assortment

Selection of low-profile and regular fuses. Fuses are loosely packed in 12-cavity, shatter-resistant plastic box. Contains:

- 10 each ATM-7½LP, 10LP, 25LP & 30LP;
- 15 each ATM-15LP & 20LP;
- 3 each FMX-20, 30 & 40;
- 2 each FMX-50 & 60;
- 3 each FMX-20LP, 30LP & 40LP;
- 2 each FMX-50LP & 60LP;
- 2 each MAX-30 & 40;
- 1 each MAX-20, 50, 60 & 80

### NO.160BK ATC Bulk Assortment

Selection of 160 ATC blade fuses. Fuses are loosely packed in 12-cavity, shatter-resistant plastic box. Contains ten fuses each of 3, 4, 7½, 40, fifteen of 5, 10, 15, 25, thirty of 20, 30.

### SCA

A 485-piece assortment, including glass tube and blade fuses, in-line fuse holders, flashers, fusible links, circuit breakers, fuse puller and fuse tester. Contains the following:

**Fuses:** Two each of MAX-20, 30, 40, 50, 60, ten of ATC-3, 5, 7½, fifteen of AGC-5, 10, 15, 25, 30, ATM-3, 5, 7½, 10, 15, 20, 25, 30, SFE-14, twenty five of ATC-10, 15, 25, 30, SFE-20, fifty of ATC-20.

**Circuit Breakers:** One each of CBB-30, CBC-\_B 20, 30, two of UCB-6, 10, 15, 20, 25, 30.

**Fusible Links:** Two each of FLF-30, 60, FLM-120.

**Fuse Holders:** Two each of HHG, HHK, HHM, HHN.

**Flashers:** Two each of NO.232, NO.552

**Fuse Pullers/Testers:** One each of FP-A3, FT-2.

## Retail Packaging & Assortments

### Retail Hardware Fuse Assortments

Popular fuse assortments and kits to meet the needs of residential circuit protection.

**BP/ABC-A** – Microwave Oven Fuse Assortment, ABC-10, (2)15 & (2)20A

**BP/FNM-AH** – High Amp FNM Cartridge Fuse Assortment: FNM-15 & 20A

**BP/FNM-AL** – Low Amp FNM Cartridge Fuse Assortment: FNM-5 & 10A

**BP/FRN-AH** – High Amp FRN-R Class RK5 Fuse Assortment: FRN-R-35 & 50A

**BP/FRN-AL** – Low Amp FRN-R Class RK5 Fuse Assortment: FRN-R-15 & 25A

**BP/GMA-AH** – High Amp GMA Electronic Glass Tube Fuse Assortment: two each GMA-3, 5 & 6A

**BP/GMA-AL** – Low Amp GMA Electronic Glass Tube Fuse Assortment: two each GMA-500MA, 1 & 2A

**BP/NON-AL** – Low Amp NON Cartridge Fuse Assortment: NON-15 & 25A

**BP/SA-A** – Fustat Rejection Base Plug Fuse Adapter Assortment: SA-15 & 20A

**BP/SC-A** – SC Class G Fuse Assortment: SC-15 & 20A

**HEF-1** - Mobile Phone, Electronic Equipment and Stereos Assortment: (2)AGC-1, (1)2 & (2)3A.

**HEF-2** - Personal Computers and Peripherals Assortment: MDL- $\frac{1}{2}$ , 1 & 2A; GDC-1 & 2A.

### Retail Hardware Fuse Emergency Kits

HEF-2

**NON-EK** - NON Cartridge Fuse Kit: 20, (2)30, 40 & (2)60A and FT-2 Fuse Tester.

**SL-EK** - SL Rejection Base Plug Fuse Kit: (3)15, (2)20 & 30A and FT-3 Fuse Tester.

**TL-EK** - TL Edison Base Plug Fuse Kit: 15, (2)20 & (3)30A and FT-3 Fuse Tester.

### Retail Hardware Holiday Light Fuses

Useful year-round, these fuses come in handy for keeping the lights on and the festivities going strong.

#### 20-Card Christmas Light Counter Displays with Two Clip Strips

**BP/GMA-5XM** - GMA 5 x 20mm fast-acting 5 amp fuses. Five fuses per card.

**BP/MAS-3X5** - MAS 3 x 5mm fast-acting 3 amp fuses. Five fuses per card.

**BP/AGX-7X5** - AGX  $\frac{1}{4}$ " x  $1\frac{1}{4}$ " fast-acting 7 amp fuses. Five fuses per card.

**BP/XMAS-6F Assortment\*** - GLH-7, AGX-7, (2)GMA-5 & MAS-3A Fuses. Total five fuses per card.

\*Product mix is new from previous version.

#### Year-Round Holiday Light Fuse Set Packaging

Five cards per shelf pack. Yellow Cooper Bussmann packaging.

**BP/MAS-3A** - MAS 3 x 5mm fast-acting 3 amp fuses. Five fuses per card.

**BP/GMA-5A** - GMA 5 x 20mm fast-acting 5 amp fuses. Two fuses per card.

BP/GMA-5XM

BP/MAS-3X5

BP/GMA-5A

20-Card Counter Display with Clip Strips

## Glass & Ceramic Tube Fuses

### Automotive

Used in older-model cars, glass tube fuses today are found primarily in automotive accessory applications. The expansive Cooper Bussmann line of glass fuses includes many types and sizes in addition to those listed in this catalog. Call Cooper Bussmann for more product details if you have requirements which are not covered here.

### Appliances and Consumer Electronics

Glass and ceramic tube fuses are often used to protect appliances and consumer electronics. As electronic equipment becomes smaller, the circuits and components become more delicate and easily damaged. Fuses are the preferred method of protection due to their accuracy, small size and reliability. Fuses are available in a wide variety of amp ratings to provide precise protection. Generally, two sizes of user-replaceable fuses are found: the  $\frac{1}{4}$ " x  $1\frac{1}{4}$ " and 5 x 20mm. Each is available in a variety of volt and amp ratings.

### Fuse Types

There are two basic types of fuses available for appliances and consumer electronics: fast-acting or time-delay. Any replacement fuse must match the one it's replacing. In general, fast-acting fuses are a single strand of wire or strip of metal. Time-delay fuses usually have a coiled wire, a thick element wrapped in wire, or a spring. Most electronic fuses will have the voltage and amp rating stamped on the end cap. The type of fuse can generally be visually identified. Also, owner's manuals will have the correct replacement fuse generically identified. For example: "Use a 2 amp, time-delay, 250 volt fuse."

Glass and ceramic tube fuses vary by diameter and length:

- AGU fuses:  $\frac{13}{32}$ " x  $1\frac{1}{2}$ "
- ABC, AGC, GBB, MDA, MDL and MDQ fuses:  $\frac{1}{4}$ " x  $1\frac{1}{4}$ "
- AGX fuses:  $\frac{1}{4}$ " x 1"
- GBC fuses:  $\frac{1}{4}$ " x  $\frac{31}{32}$ "
- AGW fuses:  $\frac{1}{4}$ " x  $\frac{7}{8}$ "
- AGA fuses:  $\frac{1}{4}$ " x  $\frac{5}{8}$ "
- SFE fuses are  $\frac{1}{4}$ " diameter and change in length as amp ratings increase
- GDA, GDB, GDC, GMA, GMC and GMD fuses: 5 x 20mm

### Fuse Selection Criteria

- For electronic/electrical applications, fuse must be rated at 125V or better.
- Voltage must match or exceed the fuse being replaced (125V for household current; 12V for auto; 24V for heavy duty).
- Fuse must match required fuse characteristic – either fast-acting or time-delay.
- Amp rating must match that of the original fuse.

### A Note on Voltage Rating

All fuses have a voltage rating. To maintain safety, this voltage rating should not be exceeded in application, although it is acceptable to use a higher rated fuse in a lower voltage application. For example: A fuse rated for 125 volts is appropriate in household (110V) or automotive (12V), while a fuse rated for 32 volts is appropriate for automotive (12V), but not for household (125V). Always replace a fuse with one of the same or higher voltage rating. See page 4 for technical specifications.

### Fast-Acting $\frac{1}{4}$ " Diameter Fuses

#### AGA - $\frac{1}{4}$ " x $\frac{5}{8}$ " Fast-Acting Glass Tube Fuses

| Part No.<br>(Amps)* |
|---------------------|

## Cartridge Fuses

Cartridge fuses are used to protect motors and branch circuits where higher amps or volt ratings are required. They are available in a wide variety of sizes, amp and volt ratings up to 600Vac and 600 amps. Cartridge fuses are used extensively in commercial, industrial and agricultural applications as well as residential fuse panels, air conditioning, pumps, appliances and other equipment.

Cartridge fuses are available in two types. General Purpose fuses have no time-delay and protect fuse panels, appliances and branch circuits. Heavy-Duty fuses have a time-delay feature, allowing momentary motor startups.

Both are available in 250Vac and 600Vac versions with catalog symbol and amp rating stamped on the knife blade or end cap.

### General Purpose NON & NOS

Used in lighting circuits, main panel protection and other circuits that don't contain large electric motors or inductive loads. One to 60 amp fuses UL Listed Class K5 (IR: 50kA). 70 to 600A fuses UL Class H (IR: 10kA).

### NON 250Vac General Purpose Non-Current Limiting Class K5 & H Fuses

### FRN-R and FRS-R Heavy-Duty Time-Delay Fuses

#### Now FRN-R Fuses Available with easyID™ Blown Fuse Indication!

Used in motor protection. When sized correctly, they help protect motors from burnout caused by overloads or single-phasing. The time-delay feature allows the initial startup current surge for typical motors to pass, but opens prior to motor burnout when longer, dangerous overloads are present. The FRN-R easyID™ option helps locate the blown fuse faster. In addition, the dual-element design opens in as little as 0.004 second if the fuse experiences short-circuit conditions. All fuses UL Listed Class R (IR: 200kA). Groove in end cap or notch in knife blade permit the fuse to be used in Class H, Class K or Class R fuse blocks.

## Cartridge Fuses

### Midget Fuses

Midget fuses are  $\frac{13}{32}$ " x  $1\frac{1}{2}$ " cartridge fuses available in a wide variety of volt and amp ratings to provide supplemental protection to industrial, commercial, agricultural, heating, ventilating and air conditioning equipment. Due to their small size, midget fuses are often used to protect internal components such as control circuit wiring, motor control transformers or small motors. The National Electrical Code® now requires more protection of internal components. This will lead to increased replacement demand for these fuses.

#### Class CC

The rejection versions of Midget fuses are Class CC and are suitable for both branch circuit and supplemental protection.

### Specialty Class G SC Rejection Fuses

#### 600Vac Fast-Acting ( $\frac{1}{2}$ -6A)

#### 600Vac Time-Delay (7-20A)

#### 480Vac Time-Delay (25-60A)

These highly compact branch circuit fuses are used in residential, mobile home and industrial applications. They have a minimum 300 volt rating and are available up to 60A. All SC fuses are  $1\frac{3}{32}$ " in diameter with varying lengths to provide a rejection feature that prevents over fusing (installing a 30 amp fuse in a 20A circuit). One half to 6A SC fuses are fast-acting, while 7 to 60A SC fuses are time-delay to permit temporary overloads to pass without nuisance openings.

| Fuse Length | Part No.<br>(Amps)* | Blister<br>Pack | Poly<br>Bag |

## Plug Fuses, Adapters & Circuit Breakers

### Plug Fuses

These fuses thread into fuse receptacles. Two types of threaded fuses are available: Edison Base (brass threads) and Rejection Base (porcelain threads). The two are not interchangeable. Two categories of plug fuses are available. The medium-duty fuses (TL or SL) have a time-delay feature for use on motor circuits. The heavy-duty fuses (T or S) are industrial strength products featuring the exclusive Cooper Bussmann dual-element construction. This spring loaded design provides superior short-circuit and overload protection. The T or S fuses have more time-delay than the medium-duty fuses in order to better protect motors and critical residential circuits. Plug fuses are rated for a maximum of 125Vac. TL and SL four pack (PK4) versions priced per box.

Plug fuses are often used in residential and industrial branch circuit and motor protection. Fuses are used to protect furnace blower motors, pumps, power tools, garage door openers, etc. Motor protection fuses are usually used in conjunction with branch circuit protection. The fuse is often located in a box cover unit. Plug fuses provide a compact and inexpensive method to prevent damage to electrical motors. They help reduce downtime and lower maintenance costs by opening the circuit when a dangerous overload is present. When used for residential branch circuit protection, fuses are typically located in the main fuse panel.

#### Edison Base Plug Fuses

The base is the same as a light bulb base. All sizes fit the same fuse receptacle.

### Type T 125Vac Dual-Element, Time-Delay, Edison Base Plug Fuses

Heavy-Duty Type T fuses for critical circuit protection. Used for air conditioners, furnace blower motors, swimming pool pumps, deep freezers or any circuit where motors frequently turn on and off. Use for all commercial applications. The Type T plug fuse is an industrial strength product. It provides superior protection, yet will not open under repeated motor startups. Available in a wide amp range to permit exact sizing for motor protection.

| Part No.<br>(Amps)* | Blister<br>Pack | Poly<br>Bag |

\*See Price Sheet for all available ratings.

### Type TL 125Vac Time-Delay Edison Base Plug Fuses

Medium-Duty Type TL fuses for residential motor circuits in kitchens, workshops, garages, utility rooms or any circuit with motors, relays or solenoids.

| Part No.<br>(Amps) | Four<br>Pack | Blister<br>Pack |
|--------------------|--------------|-----------------|
| TL-15              | X            | X               |
| TL-20              | X            | X               |
| TL-25              | X            | X               |
| TL-30              | X            | X               |

### MB 125Vac Edison Base Circuit Breakers

For replacing Edison base plug fuses in residential fuse panels.

| Part No.<br>(Amps) | Poly<br>Bag |
|--------------------|-------------|
| BP/MB-15           | X           |
| BP/MB-20           | X           |

## Plug Fuses, Adapters & Circuit Breakers

### CSA Edison Base Plug Fuses

The base is the same as a light bulb base.  
All sizes fit the same fuse receptacle.

### TC 125Vac Dual-Element Time-Delay Type D CSA Edison Base Plug Fuses

TC fuses for residential motor circuits in kitchens, workshops, garages, utility rooms or any circuit with motors, relays or solenoids.

| Part No.<br>(Amps) | Four<br>Pack | Blister<br>Pack |
|--------------------|--------------|-----------------|
| TC-15              | X            | X               |
| TC-20              | X            | X               |
| TC-25              | X            | X               |
| TC-30              | X            | X               |

### P 125Vac Dual-Element One-Time Type P CSA Edison Base Plug Fuses

P fuses for non-inductive loads such as lighting and heating circuits.

| Part No.<br>(Amps)* | Four<br>Pack | Blister<br>Pack |
|---------------------|--------------|-----------------|
| P-15                | X            | X               |
| P-20                | X            | X               |
| P-25                | X            | X               |
| P-30                | X            | X               |

### Rejection Base Plug Fuses

The rejection base threads prevent a larger amp fuse from being used.  
A 30 amp fuse cannot be installed in a 20 amp receptacle because of the different sized threads. Available in medium- and heavy-duty.

| Part No.<br>(Amps)* | Blister<br>Pack | Poly<br>Bag |
|---------------------|-----------------|-------------|
| S-1 1/4             | X               | X           |
| S-1 1/2             | X               | X           |
| S-2                 |                 |             |
| S-2 1/2             |                 |             |
| S-3 1/2             | X               | X           |
| S-3 1/2             |                 |             |
| S-4                 |                 |             |
| S-5                 |                 | X           |

| S-25                | X               | X           |
| S-30                | X               | X           |

\*See Price Sheet for all available ratings.

### Type S 125Vac Dual-Element, Time-Delay, Rejection Base Plug Fuses

Heavy-Duty Type S fuses for critical circuit protection. Used for air conditioners, furnace blower motors, swimming pool pumps, deep freezers or any circuit where motors frequently turn on and off. Used for all commercial applications, the Type S rejection base plug fuse is an industrial strength product. It provides superior protection, yet will not open under repeated motor startups. Available in a wide amp range to permit exact sizing for motor protection.

### SL 125Vac Time-Delay, Rejection Base Plug Fuses

SL fuses for residential motor circuits in kitchens, workshops, garages, utility rooms or any circuit with motors, relays or solenoids.

| Part No.<br>(Amps) | Four<br>Pack | Blister<br>Pack |
|--------------------|--------------|-----------------|
| SL-15              | X            | X               |
| SL-20              | X            | X               |
| SL-25              | X            | X               |
| SL-30              | X            | X               |

### SA Fustat Fuse Adapters for Using Type S and SL Rejection Plug Fuses In Edison Base Fuse Sockets

The size-rejection SA inserts convert an Edison Base receptacle to accept the Rejection Base S and SL fuses. Once installed, the SA adapter can not easily be removed and limits the amp rating of the fuse that can be installed. SA adapters are available in a wide variety of sizes to protect motors and branch circuits. Use the chart to select the correct SA adapter. Ideal for retrofitting Edison Base fuse panels in rental property to prevent over-fusing and bring existing panels up to compliance with the NEC®.

| Amp<br>Range | Part No.* | Blister<br>Pack | Poly<br>Bag |
|--------------|-----------|-----------------|-------------|
| 1 or less    | SA-1      |                 |             |
| 1.25 or less | SA-1 1/4  |                 |             |
| 1.6 or less  | SA-1 1/2  |                 | X           |

## Box Cover Units

### For Supplemental Circuit and Small Motor Protection

Box cover units provide an efficient and economical method to protect motors from damage due to overloads. In most cases, the branch circuit protection in the main panel is not sufficient to protect small motors. For example: a motor rated for 6 1/4 amps will likely burn up before a 30 amp breaker will trip. The box cover unit permits a supplemental fuse to be installed. The fuse can be sized close to the motor load so that it opens when the motor draws current in excess of its amp rating, thus protecting the motor from damage.

Box cover units are available in a variety of sizes that fit standard electrical boxes. In addition to a fuse holder, many accessories make these units more convenient. When a switch is used (SS Series) it turns the fused power to the load on and off. The receptacle (SR Series) allows motors to be plugged into the fused circuit. All box cover units are UL Listed for a maximum 15 amp fuse at 125Vac (except as noted).

## Accessories

### Automotive Blade And Glass Tube Fuse Pullers and Testers

Remove automotive fuses quickly and easily with the FP-A3 fuse puller. The innovative tool design lets you remove or install both blade-type and glass fuses.

The FT-3 and FT-4 combination fuse tester and fuse puller is designed for easy one-handed testing of glass and blade fuses. Light glows when fuse is good.

### Cartridge Fuse Pullers

Cooper Bussmann® fuse pullers are heavy-duty tools for safely removing fuses from their blocks. Can be used with all cartridge fuses.

\*Only available in blister pack.

### Fuse Reducers

Fuse reducers allow a smaller size fuse to be installed in a fuse block intended for a larger fuse. For example: a 30 amp fuse is two inches long and will not fit into a 60 amp fuse block (which is three inches between clips). A NO.263 reducer installed on the fuse permits it to be installed in a 60 amp fuse block. Reducers are particularly useful when equipment is being converted. Proper protection can be maintained without the expense of replacing the fuse block. Catalog numbers with the "-R" suffix (NO.263-R fit rejection (Class R) fuse blocks. Consult factory for 600 volt and Class J reducers.

### NON & FRN-R 250 Volt Fuse Reducers

| Part No.*                            | Poly Bag | Fuse Block Size (Amps) | Fuse Size (Amps) |

\*See Price Sheet for all available reducers.

## Fuseology - Fuse Troubleshooting

Overcurrent devices provide two main purposes in an electrical circuit:

1. To protect components, equipment and associated wiring from costly damage.
2. To isolate sub-systems from the main system once a current fault has occurred.

Fuses and circuit breakers are commonly selected as the preferred overcurrent devices.

### Fuses

Fuses are current sensitive devices and selected to be the weakest link in the circuit. Circuit protection is provided when the fuse link melts and safely interrupts the overcurrent demand. The key criteria to judge the performance of a fuse is the time versus current characteristic curve. This curve can be used to match the fuse with the anticipated overcurrent load expected in the application.

### Thermal Circuit Breakers

The basic components of a thermal circuit breaker are the composite alloy reed, two precious metal contacts and the interconnecting terminals. When an overcurrent occurs, heat is generated as the current flows through the reed causing the reed to deflect and snap open. This separates the contacts and safely interrupts the current flow. Two important parameters used to judge the performance of thermal circuit breakers are the time versus current characteristic curve, similar to the fuse, along with the speed at which the contacts snap open. The relative speed at which the contacts separate is a measure of the cycle life under electrical loading demands. Cooper Bussmann carefully designs its snap acting reed element to ensure long cycle performance for its products.

### Types of Overcurrent

**Short-Circuit:** Short-circuit is a current condition that greatly exceeds the rating of the device. It is caused when a malfunction or accident creates a break in the normal path allowing electricity to flow directly to ground. This shorter current path bypasses the resistance offered by the circuit components connected in the normal current path. In this situation, there is virtually no resistance to impede the current and the current will build to a level where the heat generated can cause insulation and/or equipment breakdown.

**Overload:** An overload is an overcurrent that is within the normal current path. Overloads occur when the current exceeds the value for which the equipment or associated wiring is rated. This typically occurs when too many devices are connected to the circuit or when a device connected to the circuit malfunctions. Sustained overloads may slowly cause overheating of the wiring and the components. The circuit protection device must open before these types of overloads cause damage.

### Selecting Overcurrent Protection

During normal conditions, an overcurrent protection device must carry the current without nuisance openings. However, when an overload or short-circuit occurs, the device must interrupt the overcurrent and withstand the voltage across the device after arcing. To properly select an overcurrent device, the following items must be carefully considered:

**Voltage Rating:** Represents the maximum system voltage present in the circuit in which the overcurrent device is installed. The system voltage should not exceed this value for proper operation of the device during an overcurrent event.

**Current Rating:** This is the amp value marked on the circuit protection device. The circuit protection device is designed to handle this value under steady operating conditions and at ambient temperatures near 25°C. The current rating of the fuse should not exceed the rating of the device.

### Characteristics of Equipment to be Protected/In-rush Characteristics:

During the operation of protected equipment, system current can significantly vary. This is particularly evident when motor or other inductive loads in the circuit cause large current surges during start-up or shutdown. A time-delay fuse should be used in applications where in-rush currents are possible.

### Troubleshooting Technique

**Important:** Before replacing any fuse or circuit breaker, always turn off power, and determine and remedy the cause of the fuse or circuit breaker opening.

- Always replace an open fuse with one of the same type having the correct voltage and amp rating for the application or called for by the equipment manufacturer.
- Always replace a non-working circuit breaker with one of the same type having the correct voltage and amp rating for the application or called for by the equipment manufacturer. If replacing a fuse with a circuit breaker, consult your owner's manual for recommendations.

Because fuses contain no moving parts, they do not generally operate due to wear-and-tear. When a fuse opens, it's important that you determine and correct what caused the overcurrent situation in the first place. Otherwise, the replacement fuse is likely to open, too - and the circuit will still not function as intended.

**Automotive:** Fuses are installed in one or more fuse blocks - which can be located in various locations in the vehicle, depending on its make and model. Typically, fuse panels can be found in the passenger compartment, below the steering wheel; in the engine compartment; or in some cases, in the trunk. See the vehicle owner's manual for the precise location of the fuse block(s).

On most vehicles, each clip in the fuse block will be labeled, to help you identify which circuit the fuse protects (wipers, radio, dome light, etc.). The fuse itself is labeled with an amp rating, and (in the case of blade fuses) a color coding.

**Home:** For circuits carrying 120/240 volts, please refer troubleshooting and servicing to a qualified electrician.
