

AN8140K

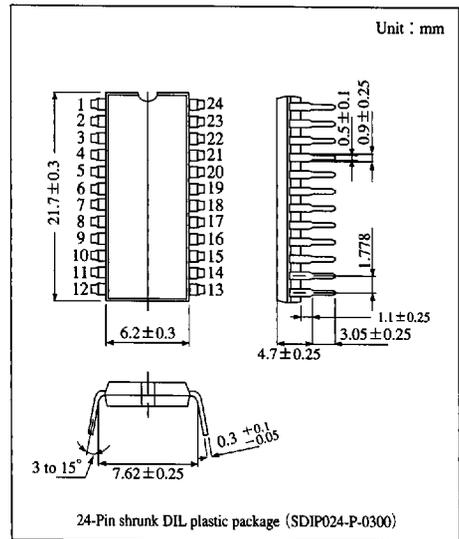

High-speed and Low Power Consumption 10-bit D/A Converter IC

Overview

The AN8140K is a 10-bit D/A converter for video processing and offers low power consumption adopting Bi-CMOS process.

Features

- 10-bit resolution
- High speed : max. conversion rate 50MSPS
- Low power consumption : 150mW
- Input level compatible with TTL
- Single power supply : 5V
- Reference power supply built-in

ICs for TV
