PROTOTYPING BOARD ACCESSORIES

HEADERS AND SOCKET PINS

MINIWRAP SOCKET PINS (TYPES 3, 4 & 5)

These pins have 4-leaf spring beryllium copper inserts enabling components to be plugged directly into sockets.

Type 3 is a low-profile pin allowing components to be mounted close to the board surface

Type 4 has a higher profile allowing heat to be dissipated by convection between the components and the board

Type 5 Identical to type 3 but without beryllium copper contact. Recommended for use with discrete components to be soldered in position
