

Twin Industries VME extender cards provide access to cards under test to facilitate signal monitoring and debugging. Additional benefits include the protection of systems slots from excess wear and tear during the removal and insertion of test cards.

FEATURES:

- Point to point connections for all signals
- Test points for signal monitoring (8196-6U-EXT-LF)
- Available in 3U and 6U form factors
- Jumpers make/break all signals; allows for fault analysis or pin-out customization (8196-6U-EXT-LF)
