

Speaker /Headphone Amplifiers Series**1.1W to1.5W****Monaural Speaker Amplifiers****BH7824FVM, BH7826FVM****•Description**

The BH7824FVM and BH7826FVM are speaker amplifier ICs for low-voltage drives and low power consumption audio, specialized for mobile telephones and other mobile audio devices.

•Features

- 1) BTL monaural speaker amplifier
- 2) Capable of high power 500mW/8Ω/BTL output
- 3) Wide power supply voltage range
- 4) Supports active/shutdown modes
- 5) Built-in anti-pop circuit
- 6) Built-in thermal shutdown circuit

•Applications

Mobile telephones, PDAs, notebook computers, DSC, DVC, and other mobile audio devices.

•Product lineup

Part No.	BH7824FVM	BH7826FVM
Input type	Unbalanced input	Balanced input
Supply voltage(V)	2.4~5.5	2.6~5.5

●Absolute maximum ratings (Ta=25°C)

Parameter	Symbol	Limits	Unit
Supply voltage	Vccmax.	6.0	V
Power dissipation	Pd	470(*1)	mW
Operating temperature	Topr	-30~+85(*2)	°C
Storage temperature	Tstg	-55~+125	°C

*1 Reduced by 4.7 mW/°C at 25°C or higher, when mounted on a 70mm×70mm×1.6mm PCB board.

*2 Topr=70°C~85°C is the range for performing basic operations and does not guarantee characteristics or rated output.

Moreover, TSD (Thermal Shutdown) may become operable if input signals occurring in this range are excessive.

Fig.1 Ta-Pd (when mounted on a PCB board)

●Operating range (Ta=25°C)

Part No.	BH7824FVM	BH7826FVM
Supply voltage	2.4V~5.5V	2.6~5.5

* Note: This IC is not designed to be radiation-resistant.

●Electrical characteristics (Unless otherwise noted Ta=25°C, Vcc=3.6V, f=1kHz, RL=8Ω)

Parameter	Symbol	Typ.		Unit	Conditions
		BA7824FVM	BA7826FVM		
Circuit current 1	ICC1	3.5	3.5	mA	No signal Active mode
Circuit current 2	ICC2	0	0	μA	No signal Suspend mode
Voltage gain 1	Gv1	+11.5	+11.5	dB	VIN=-20dBV, 1st Opamp gain
Voltage gain 2	Gv2	0	—	dB	2nd Opamp gain
Maximum output voltage1	VOM1	+6.0	+6.0	dBV	DSTN=1% BTL *1
Maximum output voltage2	VOM2	—	+5.1	dBV	VCC=3.4V, DSTN=1%, BTL *1
Output distortion	DSTN	0.07	0.2	%	VIN=-20dBV SE *1
Output noise level	VNO	-94	-94	dBV	No signal, SE Active mode *2
Suspend attenuation	GS	-107	-107	dBV	VIN=-20dBV BTL *2
Bias setting voltage	VBIAS	1.8	1.8	V	3pin DC voltage
Suspend hold voltage/H	VSH1	VCC×0.8~VCC	2.0~VCC	V	Active mode, Hold voltage
Suspend hold voltage/L	VSH2	0~0.5	0~0.5	V	Suspend mode, Hold voltage

*1 : B.W.=0.4~30kHz

*2 : DIN AUDIO

●Block diagram

Fig.4 BH7824FVM

Fig.5 BH7826FVM

●Equivalent circuit

Pin No.	BH7824FVM		BH7826FVM	
	Pin name	Equivalent circuit	Pin name	Equivalent circuit
1	SUSPEND CTRL		SUSPEND CTRL	
2	BIAS OUT		BIAS OUT	
3	BIAS IN		BIAS IN	
4	SP IN		SP IN	
5	SP OUT1		SP OUT1	
6	Vcc	—	Vcc	—
7	GND	—	GND	—
8	SP OUT2		SP OUT2	

Note: Numerical values in figures are design values, and do not guarantee ratings.

●Application circuit

●Cautions on use

1) Set within the ranges below.

Item	8, 12Ωspeaker	16Ωspeaker
	BH7824FVM/26FVM	BH7824FVM
R1	$10\text{k}\Omega \leq R1 \leq 120\text{k}\Omega$	←
R2	$47\text{k}\Omega \leq R1 \leq 120\text{k}\Omega$	←
Cf	$Cf \leq 560\text{pF}$ ($G > +6\text{dB}$) $Cf \leq 270\text{pF}$ ($0 < G \leq +6\text{dB}$)	←
Co	$Co \leq 100\text{pF}$	$Co \leq 47\text{pF}$
fcutoff	$fcutoff \leq 4\text{kHz}$ $fcutoff = 1/(2\pi R_2 C_f)$ [Hz]	←

- 2) Do not use this IC without a load.
- 3) Do not connect a capacitive load greater than 100 pF between an output pin (pin 5 or 8) and GND.
Because of the multiple feedback configuration, if a large capacitive load were connected, the amplifier might oscillate.
- 4) This IC is compatible with dynamic speaker loads (8/12/16Ω: BH7824FVM, 8/12Ω: BH7826FVM) and is not compatible with loads other than these mentioned.
- 5) A soft mute setting becomes effective on connecting a resistor and capacitor to the SUSPEND pin (1pin: BH7824FVM, 2pin: BH7826FVM).

Fig.8 BH7824FVM Soft mute

●Operation Notes

- Numbers and data in entries are representative design values and are not guaranteed values of the items.
- Although ROHM is confident that the example application circuit reflects the best possible recommendations, be sure to verify circuit characteristics for your particular application. Modification of constants for other externally connected circuits may cause variations in both static and transient characteristics for external components as well as this Rohm IC. Allow for sufficient margins when determining circuit constants.
- Absolute maximum ratings**
Use of the IC in excess of absolute maximum ratings, such as the applied voltage or operating temperature range (Topr), may result in IC damage. Assumptions should not be made regarding the state of the IC (short mode or open mode) when such damage is suffered. A physical safety measure, such as a fuse, should be implemented when using the IC at times where the absolute maximum ratings may be exceeded.
- GND potential**
Ensure a minimum GND pin potential in all operating conditions. Make sure that no pins are at a voltage below the GND at any time, regardless of whether it is a transient signal or not.
- Thermal design**
Perform thermal design, in which there are adequate margins, by taking into account the permissible dissipation (Pd) in actual states of use.
- Short circuit between terminals and erroneous mounting**
Pay attention to the assembly direction of the ICs. Wrong mounting direction or shorts between terminals, GND, or other components on the circuits, can damage the IC.
- Operation in strong electromagnetic field**
Using the ICs in a strong electromagnetic field can cause operation malfunction.

●Selection of order type

MSOP8

- The contents described herein are correct as of October, 2005
- The contents described herein are subject to change without notice. For updates of the latest information, please contact and confirm with ROHM CO.,LTD.
- Any part of this application note must not be duplicated or copied without our permission.
- Application circuit diagrams and circuit constants contained herein are shown as examples of standard use and operation. Please pay careful attention to the peripheral conditions when designing circuits and deciding upon circuit constants in the set.
- Any data, including, but not limited to application circuit diagrams and information, described herein are intended only as illustrations of such devices and not as the specifications for such devices. ROHM CO.,LTD. disclaims any warranty that any use of such devices shall be free from infringement of any third party's intellectual property rights or other proprietary rights, and further, assumes no liability of whatsoever nature in the event of any such infringement, or arising from or connected with or related to the use of such devices.
- Upon the sale of any such devices, other than for buyer's right to use such devices itself, resell or otherwise dispose of the same, implied right or license to practice or commercially exploit any intellectual property rights or other proprietary rights owned or controlled by ROHM CO., LTD. is granted to any such buyer.
- The products described herein utilize silicon as the main material.
- The products described herein are not designed to be X ray proof.

The products listed in this catalog are designed to be used with ordinary electronic equipment or devices (such as audio visual equipment, office-automation equipment, communications devices, electrical appliances and electronic toys). Should you intend to use these products with equipment or devices which require an extremely high level of reliability and the malfunction of which would directly endanger human life (such as medical instruments, transportation equipment, aerospace machinery, nuclear-reactor controllers, fuel controllers and other safety devices), please be sure to consult with our sales representative in advance.

- The contents described herein are subject to change without notice. The specifications for the product described in this document are for reference only. Upon actual use, therefore, please request that specifications to be separately delivered.
- Application circuit diagrams and circuit constants contained herein are shown as examples of standard use and operation. Please pay careful attention to the peripheral conditions when designing circuits and deciding upon circuit constants in the set.
- Any data, including, but not limited to application circuit diagrams information, described herein are intended only as illustrations of such devices and not as the specifications for such devices. ROHM CO.,LTD. disclaims any warranty that any use of such devices shall be free from infringement of any third party's intellectual property rights or other proprietary rights, and further, assumes no liability of whatsoever nature in the event of any such infringement, or arising from or connected with or related to the use of such devices.
- Upon the sale of any such devices, other than for buyer's right to use such devices itself, resell or otherwise dispose of the same, no express or implied right or license to practice or commercially exploit any intellectual property rights or other proprietary rights owned or controlled by
- ROHM CO., LTD. is granted to any such buyer.
- Products listed in this document are no antiradiation design.

The products listed in this document are designed to be used with ordinary electronic equipment or devices (such as audio visual equipment, office-automation equipment, communications devices, electrical appliances and electronic toys).

Should you intend to use these products with equipment or devices which require an extremely high level of reliability and the malfunction of which would directly endanger human life (such as medical instruments, transportation equipment, aerospace machinery, nuclear-reactor controllers, fuel controllers and other safety devices), please be sure to consult with our sales representative in advance.

It is our top priority to supply products with the utmost quality and reliability. However, there is always a chance of failure due to unexpected factors. Therefore, please take into account the derating characteristics and allow for sufficient safety features, such as extra margin, anti-flammability, and fail-safe measures when designing in order to prevent possible accidents that may result in bodily harm or fire caused by component failure. ROHM cannot be held responsible for any damages arising from the use of the products under conditions out of the range of the specifications or due to non-compliance with the NOTES specified in this catalog.

Thank you for your accessing to ROHM product informations.
