EMERGENCY RECHARGEABLE LED HAZARD LIGHTS

The **PULSAR** are multi-mode, rechargeable LED warning lights; designed for traffic control, signalling, hazard awareness and vehicle safety. Ideal for professional applications, including the Police, Fire and Highway Services.

These small but robust units are manufactured in shock resistant plastic housing, are waterproof (up to 10 metres) and virtually indestructible (withstanding most vehicle weights if crushed). Incorporated magnets allow attachment to vehicles or any metal surfaces.

Ingeniously designed, the **PULSARS** are charged within their case, via the integral metal sensors, using either a mains or vehicle power source. The LED charging indicator gives you a sign of the battery status.
