

RGSC-Series

The RGSC-Series Super Corvette rocker switches offer the Corvette styling in a double pole construction with higher electrical ratings and high inrush capabilities. These switches can handle up to 125 amp peak inrush current and can accommodate a wide range of panel cutouts due to the patented mounting ear construction. International ratings are available up to 20 amps.

Specifications

- Certifications*: UL, CSA, VDE
- Dielectric Strength: 1,000V (minimum)
- Insulation Resistance: 100 Megohms (minimum)
- Base Material: Nylon
- Actuator Material: Nylon

* Due to ongoing technological advances, consult factory for certification specifics.

Dimensional Specifications: in. [mm]

NOTES:

Shading indicates standard configurations.

Panel Cut-Out Recommendations: For sheet metal panels, switch must enter panel in same direction as the punch. (Burr on bottom.) Test cut hole in actual material.

1 Circuits E and F available with Rating Codes 20, 21 and 57 only.

2 Additional ratings are available. Consult factory.

3 Custom colors are available. Consult factory.

4 White is standard with dark actuators; black is standard with light actuators.
