A log-log plot showing the relationship between Time in Seconds (Y-axis) and Current in Amperes (X-axis) for various current ratings. The Y-axis ranges from 0.0001 to 100 seconds, and the X-axis ranges from 0.01 to 1000 amperes. The graph displays several curves, each representing a different current rating: .050A, .080A, .100A, .125A, .160A, .200A, and .250A. The curves show that for a given current rating, the time decreases as the current increases, and for a given time, the current rating increases as the time decreases.
