JUMO DELOS T

Electronic temperature switch with display and analog output

- For temperatures from -50 to +260 °C (+500 °C)
- EHEDG certification
- Configuration with the rev transmitter on the temperature switch or the setup program
- M 12x1 plug-connection; protection class IP65 as per DIN EN 60529 with the machine connector inserted

Brief description

The highly precise, electronic temperature switch comprises a sheath with built-in temperature probe, a process connection as well as an attached case with LCD display for the electronics. Depending on the application, the following output variants are available: 1x PNP or 2x PNP switching output (binary output) or 1x PNP switching output and 1x analog output.

The configuration of the output signal and the measuring range can be customized.

Depending on the version, the electronic temperature switch can be used in an operating temperature range from -50 to +150 °C, -50 to +260 °C and -50 to +500 °C. The analog output signal 4 to 20 mA, 0 to 20 mA, 0 to 10 V or reversed 20 to 4 mA, 20 to 0 mA and 10 to 0 V is available linearized (temperature linear).

The electronic temperature probe is designed for industrial applications and complies with the European Standards to guarantee electromagnetic compatibility (EMC).

Basic type 902940/10
