

TGH Series

SOT227 120 and 200 Watt Thick Film Power Resistors

Due to a non inductive design these resistors are ideally suited for high frequency and pulse load applications. By direct mounting on a heatsink significant cost advantages can be realized. The TGH can be supplied in a 2-terminal or 4-terminal version. Triple resistors are available. Popular applications are: Variable speed Drives, Power Supplies, Control Devices, Telecom, Robotics, Motor Controls and other switching designs. Specials and custom designed components on request.
