

7-IN-1 STRIPPER

Seven tools in one saves time, effort and money.

This Ideal stripper is a "must-have" tool for any electrician's tool box or pouch. Its versatility eliminates the need to carry and use a variety of tools to perform related tasks. It helps make a job easier, less time consuming and more cost efficient.

The quality-built 7-In-1 Stripper can help you do *all* of the following:

Strips wire with accuracy – Heat-treated, precision form-ground holes provide years of nick-free stripping of 16-6 AWG solid and 18-8 AWG stranded wire.

Cuts wire up to 6 gauge – The long-lasting, knife-like cutting edges can be used on stranded, solid, Romex and U.F. wire.

Crimps bare and insulated terminals – For 22-10 AWG wire sizes.

Cuts unhardened bolts and screws – Closely matched cutting holes on both halves of the tool provide fast shearing of bolts and screws. Cutting holes are tapped to assure clean threads on commonly-encountered sizes such as #4-40, #6-32, #8-32, #10-24 and #10-32.

Gauges wire – The stripper holes can be used to accurately verify wire sizes, 16-6 AWG solid and 18-8 AWG stranded.

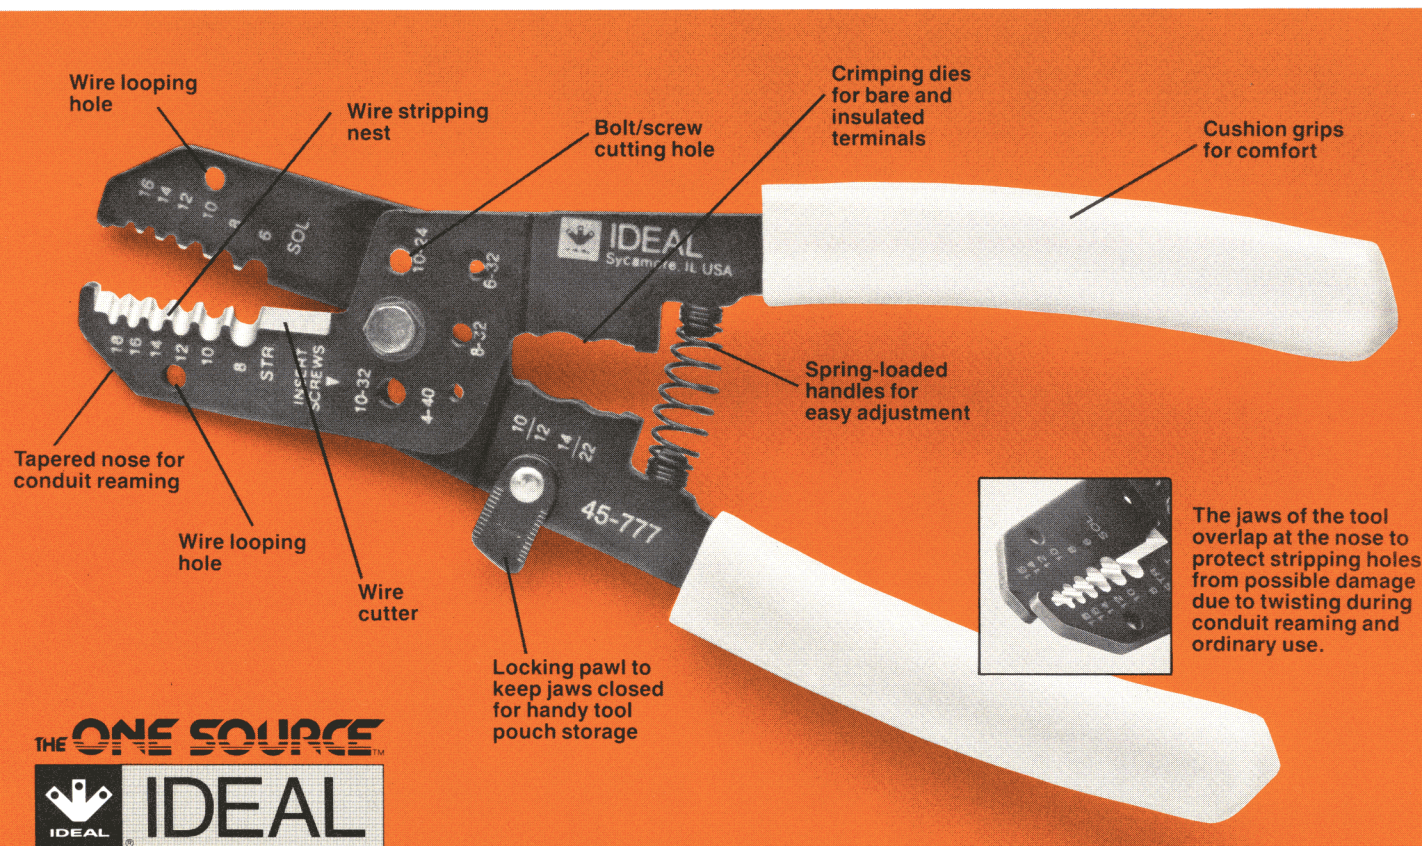

Loops wire with a comfortable grip – A hole on *each* jaw allows easy wire looping from either the front or back of the tool.

Reams conduit – The nose of the tool, when closed, can be used to remove rough burrs from the inside of conduit ends.

ORDERING INFORMATION

The 7-In-1 Stripper is available locally from your nearest Ideal stocking distributor. Nationwide and worldwide, Ideal is the One Source for over 4,000 high-quality products – an extensive line of electrical tools, supplies and equipment – designed to save you time and money.

Description	Length	Weight	Catalog No.
7-In-1 Stripper	8"	8 oz.	45-777

The jaws of the tool overlap at the nose to protect stripping holes from possible damage due to twisting during conduit reaming and ordinary use.
