Product Description

The LCP-1250A4FS from DELTA ELECTRONIC is a hot pluggable 3.3V Small Form-Factor transceiver module designed expressly for high-speed bi-directional communication applications that require rates of up to 1.25 Gbit/sec. It is compliant with the Gigabit Ethernet standards, as well as the SFP Multisource Agreement.

The LCP-1250A4FS transceivers provide with the LC receptacle that is compatible with the industry standard LC connector. The transceiver is also compatible with industry standard RFT connector and cage.

The transmitter section of LCP-1250A4FS consists of an 850 nm Vertical Cavity Surface Emitting Laser (VCSEL) in an optical subassembly(OSA) while the receiver consists of a GaAs PIN photodiode mounted together with a transimpedance preamplifier. The post-amplifier of the LCP-1250A4FS also includes a Signal Detect circuit which provides a TTL logic-high output when an unusable optical signal level is detected.

The LCP-1250A4FS transceiver is a Class 1 eye safety product. The optical power levels, under normal operation, are at eye safe level.
