L = low range [f_L to 10 f_L]

M = mid range [10 f_L to $f_U/2$]

U = upper range [$f_U/2$ to f_U]

NOTES:

- ✦ When only specification for M range given, specification applies to entire frequency range.
- ✦ At low range frequency band (f_L to 10 f_L), linearly derate maximum input power by 13 dB.
- Denotes 75 Ohm model, for coax connector models 75 Ohm BNC connectors are standard.
- * VSWR typical 1.1:1 over total range of frequency, max 1.2:1 for low and upper range, max 1.15:1 for mid range.
- A. General Quality Control Procedures, Environmental Specifications, Hi-Rel and MIL description are given in General Information (Section 0).
- B. Connector types and case mounted options, case finishes are given in section 0, see "Case styles & Outline Drawings".
- C. Prices and specifications subject to change without notice.
- 1. Absolute maximum power, voltage and current ratings:
 - 1a. Matched power rating,
 - Model PSC-2-11 0.5 Watt
 - All other models 1 Watt
 - 1b. Internal load dissipation, 0.125 Watt
