

EXTERNAL SOUNDER

External Bus Sirens SEB/SEFB SAFETAL

Only compatible with SAFETAL Bus controls.

Designed to alert with audible and visual signals (SEFB version with flash).

Different alarm sounds used to indicate incidents, such as:

Intrusion, auto-protection and bus fault alarms.

In the event of intrusion alarm, self-protection or bus rupture, the siren sounds for 90 seconds if the fault is no longer present, or 4 cycles of 90 seconds if the fault is ongoing.

Supply:	6 V 2.8 A battery supplied
Tamper protection for opening and removal	
Standby consumption = 4 mA	
Charging consumption = 16.5 mA	
Sound output at 1m:	109 dB(A) +/-2 dB
Protection index:	IP43– IK06
Operating temperature:	-25°C / +70°C
Dimensions:	277 x 188 x 100 mm
Enclosure:	ABS-PC
Weight with battery:	2500 g
Intrusion modulation:	1400 to 1600 Hz
