

## High Temperature Fire Wall Connectors EN2997 / ESC Qualified

## Presentation

**MIL-DTL-83723 was designed to be a high temperature, high vibration withstanding connector, but had some important drawbacks:**

- Uncertain bottoming,
- Risk of unlocking under vibration,
- No torque specification,
- No scoop proof versions.

**To improve on these drawbacks, EN2997 standard includes:**

- 360° teeth enable additional backshell positions,
- Improved shielding resistance due to shell to shell bottoming,
- Additional barriers to leakage.
- Self locking mechanism on every plug allows a higher resistance to vibration,

**SOURIAU enhanced the standard definition with some additional features:**

- Thermoplastic material achieves a better insulation resistance and a high resistance to standard fire tests,
- Qualified as per EN2997 for both stainless steel and aluminum versions,

**SOURIAU** has one of the widest ranges on the market.

**SOURIAU made these improvements to give our customers the best choice for procuring high performance connectors.**

## Typical applications

Power & Actuation

External lighting

Landing gear

Fuel Management

Sensors

Engines

## Features & Benefits

### FIRE WALL

#### High Temperature Connector

Resist up to 260°C (500°F).  
Flame test per EN 2591.

### SALT SPRAY

#### Excellent Corrosion Performances

Up to 500 hours salt spray.

### HIGH VIB

#### Upgraded Vibration Performances

Self locking coupling mechanism to resist the highest vibration encountered.

### EMI RFI

#### EMI & Lightning Resistance

Protection of the signal thanks to:

- . EMI grounding ring
- . Shell to shell bottoming
- . 360° rear accessory teeth

### EN2997 ESC

#### Qualified Product

Qualified per ASD Cert EN2997 and ESC Standards.  
MIL-83723 Series III based design, including additional features, to respond to today's aircraft's harshest needs.

## Product overview

### Scoop Proof

See page 24

- ▶ For blind mate connection.
- ▶ ESC11 qualified.

### Integrated Backshell

See page 28

- ▶ For weight saving solutions.
- ▶ ESC15 and ESC16 qualified.

### Standard version

See page 16

### Quadrax & Power Contacts

See page 33

- ▶ Quadrax contacts for high speed ethernet network.
- ▶ Power contacts for high power current under temperature and vibration constraints.
- ▶ ABS qualified solution.

### Hermetic version

See page 36

- ▶ For hermetic interface or space constrained application.
- ▶ Leak rate  $< 10^{-7}$  atm.cm<sup>3</sup>/s.
- ▶ Solder cup & PC Tail contacts.

## Available configurations

| T° class          | Salt spray | Shell material & plating    | Integrated backshell | Scoop proof | Clinch nuts | Hermetic | High vibration                                | Plug with RFI screening ring                | Plug without screening ring                               | Square flange receptacle         | Jam nut receptacle               | Solder mount receptacle |      |       |

## Description

- Stainless steel screw coupling connector derived from MIL-C-83723 & designed for use in harsh aviation environments:
  - . high vibration resistance
  - . high temperature resistance (up to 260°C)
  - . Fireproof (1100°C)
- Qualified to EN2997 standard and to ESC10 standard
- Large array of crimp contacts, EN3155 and ESC30 qualified:
  - . size 12, 16 & 20 standard contacts
  - . size 12, 16 & 20 thermocouple contacts for temperature measurement
- Fuel immersion version available

## Technical features

### Mechanical

- **Shell:**
  - . aluminum alloy (class R, W and A)
  - . stainless steel (class K and E)
- **Plating:**
  - . nickel (class R)
  - . olive green cadmium (class W)
  - . black anodized (class A)
  - . passivated (class K and E)
- **Grommet and seal:**
  - . silicone elastomer
- **Insulator:**
  - . thermoplastic
- **Contact body:**
  - . copper alloy
- **Contact plating:**
  - . gold over nickel
- **Contact retention:**
  - . size 20: 90 N
  - . size 16: 110 N
  - . size 12: 130 N
- **Mating cycles:**
  - . 250 mating cycles (class R, W and A)
  - . 500 mating cycles (class K and E)
- **Shock:**
  - . 300 m/s<sup>2</sup> (30g) during 3 ms
- **Vibration:**
  - . random 5 Hz to 2000 Hz at 1G<sup>2</sup>/Hz (2 x 8 hours)

### Electrical

- **Dielectric withstanding:**

| Altitude  | Service I |
|-----------|-----------|
| Sea level | 1500 Vrms |
| 15 000 m  | 600 Vrms  |
| 21 000 m  | 400 Vrms  |
| 33 000 m  | 200 Vrms  |
- **Contact resistance:**
  - . initial contact resistance at ambient temperature as per EN 2997 and EN3155

| Contact size  | 20  | 16  | 12  |
|---------------|-----|-----|-----|
| Resistance mΩ | 7.3 | 3.8 | 3.5 |
- **Insulation resistance:**
  - . 5000 MΩ at 500 Vdc
- **Max current rating per contact:**

| Contact size | 20  | 16 | 12 |
|--------------|-----|----|----|
| Rating (A)   | 7.3 | 13 | 23 |
- **Electrical continuity:**
  - . 5 mΩ max with RFI shielding
  - . 60 mΩ without RFI shielding
- **Shielding:**
  - . to 100 MHz at 1 GHz attenuation 65 dB
- **Lightning strike (3K & 3E classes):**
  - . 15A according D0160, wave 5A

### Environmental

- **Operating temperature:**
  - . class W: -65° to +175°C (-149° to +347°F)
  - . class R, A and K: -65° to +200°C (-149° to +392°F)
  - . class E: -65° to +260°C (-149° to +500°F)
  - . fuel tank long term immersion version specification 22 limited to +105°C max
- **Leakage:**
  - . as per 2591-312:
    - Method B differential pressure: 100kPa
    - Maximum leakage flow: 16x10<sup>-6</sup> m<sup>3</sup>/h
- **Salt spray:**
  - . 48 hours (class R)
  - . 500 hours (class W, K, E and A)
- **Resistance to fluids:**
  - . MIL-H 5606 - SKYDROL 500 B4 - LD4 - JP5 - MIL-L 7870A - MIL-L 23699 - MIL-L 7808 - MIL-C 25769 - MIL-A 8243
- **Fire resistance:**
  - . as per EN 2591-318:
    - 6 min under a 1100°C flame without electrical perturbation, plus 14 min with no flame propagation (ES class)

### Fuel resistance

- **Standard version:**
  - . as per EN2997
- **Long term immersion (specification 22):**
  - . as per PrEN3645 3 cycles of 96 hours in fuel

## Ordering information

## Minimum space between square flange or jam nut receptacles

| Shell size            | 8     | 10    | 12    | 14    | 16    | 18    | 20    | 22    | 24    | 28    |
|-----------------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| Y min<br>(norm value) | 31.70 | 34.90 | 39.60 | 41.25 | 44.45 | 47.35 | 51.90 | 54.10 | 57.25 | 65.25 |

$$X \text{ min} = Y/2 (\text{connector one}) + Y/2 (\text{connector two})$$

Example of minimum space between a connector size 8 and a connector size 14:  
 $X \text{ min} = 31.70/2 + 41.25/2 = 36.475 \text{ mm}$

## Orientation

## Description

- Stainless steel screw coupling connector designed for use in aviation engine harsh environments:
  - . high vibration resistant
  - . high temperature resistant (260° C)
  - . fire proof (1100° C)
- Scoop proof design to enable blind mating.
- Qualified to ESC11 standard, and per PrEN4067 standard project.
- Fully interchangeable and intermateable with ESC16 / 8536 connectors (integrated backshell version).
- Large array of crimp contact:
  - . standard size 16 and 20 contacts
  - . thermocouple size 16 and 20 contacts
- Fuel tank version available upon request.

## Technical features

### Mechanical

- **Shell:**
  - . Passivated stainless steel.
- **Grommet and seal:**
  - . Silicone elastomer.
- **Insulator:**
  - . Thermoplastic.
- **Contact body:**
  - . Copper alloy.
- **Contact plating:**
  - . Gold over nickel.
- **Contact retention:**
  - . Size 20: 90 N
  - . Size 16: 110 N
- **Mating cycles:**
  - . 500 mating / unmating operations.
- **Vibration & shock:**
  - . According to JES290-083: 41 grms (2 x 8 hours)

### Electrical

- **Dielectric withstanding:**

| Altitude  | Service I |
|-----------|-----------|
| Sea level | 1500 Vrms |
| 15 000 m  | 600 Vrms  |
| 21 000 m  | 400 Vrms  |
| 33 000 m  | 200 Vrms  |
- **Insulation Resistance:**
  - . 5000 MΩ under 500 Vdc.
- **Max current rating per contact:**

| Contact size | 20  | 16 |
|--------------|-----|----|
| Rating (A)   | 7.5 | 13 |
- **Contact resistance:**
  - . initial contact resistance at ambient temperature as per EN 2997 and EN315

| Contact size  | 20  | 16  | 12  |
|---------------|-----|-----|-----|
| Resistance mΩ | 7.3 | 3.8 | 3.5 |
- **Electrical continuity:**
  - . 5mΩ with RFI shielding (6SE class).
- **Shielding:**
  - . to 100 MHz at 1 GHz attenuation 65 dB.

### Environmental

- **Temperature range:**
  - . - 65°C +260°C
- **Leakage:**
  - . as per 2591-312: Method B differential pressure: 100kPa
  - Maximum leakage flow: 16x10<sup>-6</sup> m³/h
- **Salt Spray:**
  - . 500 hours.
- **Fire resistance:**
  - . as per EN 2591-318: 6 min under a 1100°C flame without electrical perturbation, plus 14 min with no flame propagation (ES class).
- **Resistance to fluids:**
  - . MIL-H 5606 - SKYDROL 500 B4 - LD4 - JP5 - MIL-L 7870A - MIL-L 23699 - MIL- L 7808 - MIL-C 25769 - MIL-A 8243

| 16           | 0.53     | 0.59   |

Note: All dimensions are in millimeters (mm)

## Description

- Stainless steel screw coupling connector designed for use in aviation engine harsh environments:
  - High vibration resistance
  - High temperature resistance 200°C / 260°C
  - Fire proof 1100°C
- Integrated backshell for compact and light weight applications, with the possibility to have a full scoop proof connection (8536 Series / ESC16 Series).
- Qualified to ESC15 (8535 Series) and ESC16 (8536 Series) standard, and per the new EN2997 issue.
- Fully interchangeable:
  - 8535 Series with BACC 63 CM-CN, EN2997 & ESC10 connectors
  - 8536 Series with ESC11 connectors
- 8535 Series intermateable with BACC 63 CM-CN
- Large array of crimp contacts: (same as for 8533 Series)
  - Standard size 12, 16 and 20 contacts
  - Thermocouple size 12, 16 and 20 contacts

## Technical features

### Mechanical

- **Shell:** Passivated stainless steel.
- **Grommet and seal:** Silicone elastomer.
- **Insulator:** Thermoplastic.
- **Contact body:** Copper Alloy.
- **Contact plating:** Gold Over Nickel.
- **Contact retention:**
  - . Size 20: 90 N
  - . Size 16: 110 N
  - . Size 12: 130 N
- **Mating cycles:** 500 coupling operation.
- **Vibration & shock:**
  - . According to JES290-083: 41 grms, 2x 8 hours (ES class)
  - . According to JES290-102: 35 grms, 60 hours (KV class)
  - . According to EN2591: 5Hz to 2000Hz at 1G<sup>2</sup>/Hz (2x8 hours)

### Electrical

- **Dielectric withstanding:**

| Altitude   | Service   |
|------------|-----------|
| Alt ground | 1500 Vrms |
| 15 000 m   | 600 Vrms  |
| 21 000 m   | 400 Vrms  |
| 33 000 m   | 200 Vrms  |
- **Insulation Resistance:** 5000 MΩ at 500 Vdc.
- **Max current rating per contact:**
  - . Size 20: 7.5 A
  - . Size 16: 13 A
  - . Size 12: 23 A
- **Contact resistance:**
  - . initial contact resistance at ambient temperature as per EN 2997 and EN315

| Contact size  | 20  | 16  | 12  |
|---------------|-----|-----|-----|
| Resistance mΩ | 7.3 | 3.8 | 3.5 |
- **Electrical continuity:** 5mΩ with RFI shielding.
- **Shielding:** to 100 MHz at 1 GHz attenuation 65 dB.

### Environmental

- **Temperature range:** - 60°C +260°C
- **Leakage as per 2591-312:**
  - Method B differential pressure: 100kPa
  - Maximum leakage flow: 16x10<sup>-6</sup> m<sup>3</sup>/h
- **Salt Spray:** 500 hours.
- **Fire resistance as per EN 2591-318:**
  - 6 min under a 1100°C flame without electrical perturbation, plus 14 min with no flame propagation (ES class).
- **Resistance to fluids:**
  - MIL-H 5606 - SKYDROL 500 B4 - LD4 - JP5 - MIL-L 7870A - MIL-L 23699 - MIL- L 7808 - MIL-C 25769 - MIL-A 8243

## Mass of crimp contacts

| Contact size | Mass (g) |        |
|--------------|----------|--------|
|              | Pin      | Socket |
| 20           | 0.24     | 0.29   |
| 16           | 0.53     | 0.59   |
| 12           | 1.15     | 1.28   |

## Description

- The utmost solution to combine high vibrations, high temperatures and high power supply: up to 80 Amps continuous rating at 260°C ambient temperature with a 20% space-savings compared with other solutions.
- Two contact sizes - size 6 and size 4 - as well as the ability to use quadrax contacts in size 6 cavity layouts.
- Standard strain relief backshell or spacer accessory to adapt any specific backshell.
- Airbus ABS 1340-1343, 1426-1427, 1452 qualified.
- Grounded insert option for optimized quadrax performance.
- Electro mechanical actuator power supply, alternator, starter applications.

## Technical features

### Mechanical

- **Shell:**
  - . nickel plated aluminum (R class),
  - . passivated stainless steel (E & K classes).
- **Grommet and seal:**
  - . silicone elastomer.
- **Insulator:**
  - . thermoplastic.
- **Contact body:**
  - . copper alloy.
- **Contact plating:**
  - . gold over nickel.
- **Contact retention:**
  - . size 4: 200N      . size 8: 130N
  - . size 6: 156N
- **Endurance:**
  - . 500 mating cycles (E & K classes),
  - . 250 mating cycles (R class).
- **Vibration & shock:**
  - . according to EN 2997.

### Electrical

- **Dielectric withstanding:**

| Altitude  | Service I |
|-----------|-----------|
| Sea level | 1500 Vrms |
| 15 000 m  | 600 Vrms  |
| 21 000 m  | 400 Vrms  |
| 33 000 m  | 200 Vrms  |
- **Insulation resistance:**
  - . 5000 MΩ under 500 Vdc.
- **Max current rating per contact:**

Quadrax: 4 size 24 inner contacts in a size 8 outer contact.

| Contact size | 6  | 4  |
|--------------|----|----|
| Rating (A)   | 60 | 80 |
- **Contact resistance:**
  - . Initial < 0.4 mΩ.
- **Electrical continuity:**
  - . 5mΩ with RFI shielding.
- **Shielding:**
  - . to 100 MHz at 1 GHz attenuation 65 dB.

### Environmental

- **Temperature range:**
  - . -60°C +200°C R & K classes,
  - . -60°C +260°C E class & #6 contact only.
- **Leakage:**
  - . as per 2591-312:
  - Method B differential pressure: 100kPa
  - Maximum leakage flow: 16x10<sup>-6</sup> m<sup>3</sup>/h
- **Salt spray:**
  - . 48 hours (R class),
  - . 500 hours (E & K classes).
- **Fire resistance:**
  - . as per EN 2591-318:
  - 6 min under a 1100°C flame without electrical perturbation, plus 14 min with no flame propagation (ES class).
- **Resistance to fluids:**
  - . MIL-H 5606 - SKYDROL 500 B4 - LD4 - JP5 - MIL-L 7870A - MIL-L 23699 - MIL- L 7808 - MIL-C 25769 - MIL-A 8243

Note: All dimensions are in millimeters (mm)

## Description

- Screw coupling connector
- EN2997 and ESC10 qualified connector
- High temperature and high vibration resistance
- Glass sealed hermetic:
  - . high hermeticity performance
  - . compact low profile
- Various mounting styles:
  - . compact solder mount receptacle
  - . easy to install square flange receptacle
  - . easy to replace jam nut receptacle
- Fully interchangeable with MIL 83723 hermetic connectors
- Special fuel tank versions
- 230V qualified versions where higher voltage is used to reduce cable weight

## Technical features

### Mechanical

- **Shell:**
  - . Passivated Stainless steel
- **Seals:**
  - . Silicone elastomer
- **Contact:**
  - . Ferrous alloy
- **Contact plating:**
  - . Gold
- **Shock:**
  - . 300 m/s<sup>2</sup> (30g) during 3 ms
- **Endurance:**
  - . 500 mating/unmating operations
- **Vibration:**
  - . Random 5 Hz to 2000 Hz at 1G<sup>2</sup>/Hz (2 x 8 hours)

### Electrical

- **Max current rating per contact:**

| Contact size | 20 | 16 | 12 | 6  | 4  |
|--------------|----|----|----|----|----|
| Rating (A)   | 5  | 10 | 17 | 46 | 60 |

- **Dielectric withstanding voltage:**

| Altitude  | Service I |
|-----------|-----------|
| Sea level | 1500 Vrms |
| 15 000 m  | 600 Vrms  |
| 21 000 m  | 400 Vrms  |
| 33 000 m  | 200 Vrms  |

- **Contact resistance at rated current:**
  - . Maximum initial contact resistance at ambient temperature

| Contact size  | 20 | 16  | 12 | 6 | 4 |
|---------------|----|-----|----|---|---|
| Resistance mΩ | 12 | 8.5 | 5  | 2 | 2 |

### Environmental

- **Operating temperature:**
  - . Class Y : -65°C to 200°C
  - . Class YE : -65°C to 260°C cyclic
- **Hermeticity:**
  - . Leak rate <10<sup>-7</sup> atm.cm<sup>3</sup>/s (helium gas test)
- **Damp heat:**
  - . As per EN 2997 and NFL 54143: 10 cycles of 24h
- **Salt spray:**
  - . 500 hours
- **Resistance to fluids:**
  - . MIL-H 5606 - SKYDROL 500 B4 - LD4 - JP5 - MIL-L 7870A - MIL-L 23699 - MIL-L 7808 - MIL-C 25769 - MIL-A 8243
- **Fuel immersion version:**
  - . 105°C max
  - . As per PrEN3645

## Introduction

- SOURIAU's fire wall contacts offer covers a wide range of performances within the scope of high temperatures and high vibrations constraints.
- Each type has been qualified and validated by either major qualification organizations or major aerospace manufacturers:
  - Size 12, 16 & 20 signal contacts: EN3155 and ESC30 qualified
  - Size 12, 16 & 20 thermocouple contacts: EN3155 and ESC30 qualified
- SOURIAU also provides any tool or accessory necessary for harnessing (crimping tool, insertion and extraction tool,...) or for test benches (dummy receptacles,...)

## Signal & power contacts

### Crimp contacts 175°C and 200°C

## Filler plugs

These filler plugs are installed at the rear of unwired contacts to maintain connector sealing.

| Contact size | Part numbers | Colors |
|--------------|--------------|--------|
| 20           | 8522-389A    | red    |
| 16           | 8522-390A    | blue   |
| 12           | 8522-391A    | yellow |
| 6            | 8522-2253    | white  |
| 4            | 8533-8253    | blue   |

Note: All dimensions are in millimeters (mm)

## Wiring instruction

### Cable preparation and wire stripping

| Size                                  | Contact | 20  |    | 16  |    |    | 12 |
|---------------------------------------|---------|-----|----|-----|----|----|----|
|                                       | Barrel  | 20  | 18 | 16  | 14 | 28 | 12 |
| Stripped length of cable mm $\pm 0.5$ |         | 4.5 |    | 6.8 |    |    |    |

### Insertion of wire in contact barrel

When inserting the stripped wire into the contact barrel check that no strands are left outside and that the wire is visible through the wire inspection hole in the barrel.

Important:

- Slide any accessories over wire strands before carrying out the following operations.
- Contacts are inserted and extracted from the rear of the connector.

### Insertion of the contacts

1 - Engage the crimp cable / contact assembly into the longitudinal slot of the plastic tool (colored tip). Slide the tool down the cable until the tip of the tool abuts the contact retention shoulder.

2 - Introduce the contact into the required contact cavity in the insulator, pushing tool axially, until the contact snaps into position in clip.

3 - Withdraw the tool from rear. Check that contact is firmly locked by pulling wire gently. When connector is fully loaded, check the position of contact tips. They should all be in the same plane.  
Note: For larger sizes of cable which are stiff enough, manual insertion without tool is preferable.

### Extraction of the contacts

1 - Engage the appropriate cable into the longitudinal slot of the tool with the white tip towards connector.

2 - Slide the tool down towards the contact. Insert the tool in the insulator until it abuts the contact shoulder.

3 - Holding the tool-contact and cable assembly together, remove them simultaneously.

## Insertion and extraction tools

### Insertion and extraction of wired contacts

| Contact size | Part numbers | Material | Color          |
|--------------|--------------|----------|----------------|
| 20           | M81969/14-11 | Plastic  | white / red    |
| 16           | M81969/14-03 | Plastic  | white / blue   |
| 12           | M81969/14-04 | Plastic  | white / yellow |
| 6            | M81969/14-06 | Plastic  | red            |

## Product range extension

### 230V Connector

**The use of higher voltage to reduce cable weight has lead to the development of double voltage in un-pressurized connectors.**

**Robust design and materials:**

- . ensuring that in un-pressurized areas no partial discharge will weaken the connector.
- . each production batch is tested to ensure performance to this high level.

**No possible mismatch:**

- . specific T and V clocking to avoid mating with a non 230V qualified counterpart.

**Flexible offering:**

- . available in standard watertight as well as in hermetic connectors.
- . available in composite and stainless steel shells.

See «8533 Series 230V Connector» product news on [www.souriau.com](http://www.souriau.com)

### Fire Resistant Seal

**Secured cable routing thanks to a fire stop design. Ideal for engine & APU (Auxiliary Power Unit) for aircrafts applications.**

**Fire resistant:**

- . Ceramic insulator to enable 1100°C during 20 min.

**High temperature:**

- . Perfect resistance at up to 260°C.
- . Adapted to power cable.

**Excellent vibration withstanding:**

- . Avoid cable movement under vibrations.

**Space saving compare to bulkhead connectors:**

See «Bulkhead Feedthrough Solutions» catalog on [www.souriau.com](http://www.souriau.com)

## Product range extension

### Power Contacts for PCB

**Firewall connector for power supply, adapted to PCB solutions.**

**Safe & Quick Avoid soldering of contacts:**

- . No heat applied: no risk of damaging the connector.
- . Quicker fit in the equipment.

**Robust:**

- . True mechanical link between PCB and contacts: no additional double flange needed. Power contacts are attached directly to the board with screws for an optimized connection.
- . Available in size 6 contact (Ø4.6mm) & size 4 contact (Ø5.74mm).

**Compact:**

- . Tapped contacts for direct and small sized connections, especially compared to standard lugs.

See «EN2997 Series Power Contacts for PCB» product news on [www.souriau.com](http://www.souriau.com)

### Customizable Shunted Plug

**Acting like a "car key", this device is modeling a code sequence that the engine calculator reads to authorize the starting.**

**Coding:**

- . Coding is done with contacts.
- . Some are bi-stable contacts: to open or close a circuit.

**SOURIAU advantage:**

- . Our technology provides excellent contacts retention, preventing any unexpected code change during operation.

**Range:**

- . This product is based on MIL-STD-38999 Series III derivate or EN2997 derivate.
- . Aluminum or stainless steel materials are available.

**Accessories:**

- . This connector can be delivered with a rear cap that protects the coding.

## Product range extension

### Hermetic Connector with Removable Contacts

#### Extension of the fuel immersion range.

##### High hermeticity performance:

- . Glass to metal sealing: leakage of less than  $10^{-9}$  atm.cm<sup>3</sup>/s.

##### Removable crimp contacts:

- . A technology combining crimp contacts with glass beads
- . RoHS: no lead used.
- . Long lifetime: superior to solder cup contacts in kerosene immersion.
- . Easy MRO: contact replacement.

##### Long term fuel immersion materials:

- . Performances guaranteed for minimum 90,000 hours in fuel immersion.

##### Wide Availability:

- . EN3646 (Airbus Qualified Products).
- . EN2997, EN3645, MIL-DTL-38999.

See «MIL-DTL-38999, EN3646, EN2997 Fuel Tank Connector» product news on [www.souriau.com](http://www.souriau.com)

### Filtered Connector

#### Protection of sensitive electronic components inside the equipment against any EMI or lightning interference as well as protection of signal integrity.

##### Signal Integrity principles - EMI/RFI Filter:

- . Protection of sensitive electronic components inside equipment.
- . Signal integrity (incoming data noise free / prevents noise exiting the equipment).

##### Space/weight/time saving:

- . Less electronics inside the equipment.
- . Filtered receptacles are generally standard length.

##### Excellent performance/reliability adapted to Mil-aero environments:

- . Insertion loss (attenuation) to -80dB at critical frequencies.
- . Filter ideally positioned at system entry point.
- . Tested as per MIL-STD-220.

**A complete solution:** Optional TVS functionality, Hermetic version available, 100 % ITAR free solution if required.
