CURVES

Coil Temperature Rise

Notes:

1. All values, unless otherwise specified, are measured at ambient temperature of 23°C.
2. Standard contact material AgCdO, other contact materials for special applications upon request.
3. For maximum service life, remove tape before putting relays into service after immersion cleaning process.
4. AC coil resistance for reference only.
5. Electrical ratings of AC coil type are 66.7% of those of DC coil type as listed in contact data table.
