## Q2

Low Forward Voltage Drop :  $V_{F(3)}=0.98V(\text{typ.})$

Fast Reverse Recovery Time :  $t_{rr}=1.6ns(\text{typ.})$

Low Total Capacitance :  $C_T=0.5pF(\text{typ.})$

Note: Using continuously under heavy loads (e.g. the application of high temperature/current/voltage and the significant change in temperature, etc.) may cause this product to decrease in the reliability significantly even if the operating conditions (i.e. operating temperature/current/voltage, etc.) are within the absolute maximum ratings.

Please design the appropriate reliability upon reviewing the Toshiba Semiconductor Reliability Handbook ("Handling Precautions"/"Derating Concept and Methods") and individual reliability data (i.e. reliability test report and estimated failure rate, etc).
