> Markings: Capacitors are marked with the following information

Rated capacitance, Rated voltage, product number, name of manufacturer, UL symbol, positive terminal, negative terminal and warning marking

> Mounting Recommendations:

Cells are designed to be soldered into series or parallel strings.

Components should not be operated outside recommended limits.

Parts can be ordered without tabs.

> Additional Technical Information:

$$P_d = (0.12 \times E^2 / R_d) / M$$

$$\Delta T = DR_{th}I_c^2R_d$$

E = charge voltage (U_R)

M = capacitor weight (kg)

D = duty cycle

R_d = internal resistance (DC)

V = capacitor volume (l)

I_c = continuous current

› ΔT - duty cycle vs. operating current:

› Curves generated under free convection at 25°C ambient
