

## Easy Wire/Re-Wireable Break-In Adaptor and line Jack

506-0266

506-0278 - Line Jack

506-0266 Internal

These products contain an integral IDC snap down block with the colour codes of the wires printed on top, which makes them easy to wire and re-wire without the need for an IDC tool. They have been designed to accept CW1308 telephone cable (round, solid conductor, 2 pair, 4-core). They are particularly useful when installing a fixed-point telephone extension socket for equipment such as digital **satellite receivers**, computer modems etc., or indeed making up specific length extension leads.

- Easy to wire, only a screwdriver needed to remove the lid and cutters to prepare the lead (instructions included)
- Can be re-wired numerous times, centre 4 pins connected (2, 3, 4 and 5)
- Cable securely clamped by fitting the lid

**Break-In Adaptor:** BT 431A plug to 2 x BT 431A sockets (doubler)  
**Line Jack Unit:** 1 x BT431A BT socket. Supplied with a double-sided adhesive block for surface mounting.

For suitable CW1308 cable see the Cable section of this Catalogue

Supplied in packs of 5
