

ESD Antistatic Safe Brush

Features:

- Conductive handle with conductive nylon bristles
- Resistivity 10^4 . 10^6 Ohms
- Suitable for both abrasion and residue removal
- The handle is made of conductive plastic (10^4 . 10^6 Ohms) and the bristles are made of dissipative plastic (10^8 . 10^{10} Ohms)
- Removes dirt and dust on PCBs or other sensitive components.
- Brushes minimise static charge generation and dissipates ESD charges to the ground when held by a grounded personnel
