**Easy peasy**

I am most happy with the crucial software I used to find the type of memory I have in my notebook computer. I simply ran the executable and was given many choices for memory options...

Comments about *Crucial: 1GB 200-pin SODIMM DDR2 PC2-5300*:

With this 7 year old computer , memory was not a problem until "things" started adding up and using almost every last MB. Now with this new memory added, it's like a brand new PC! The only glitch was: I was sent memory for a laptop when I had ordered desktop. But this was resolved after a prolonged call and exchange for the correct memory.

Comments about *Crucial: 1GB 200-pin SODIMM DDR2 PC2-5300*:

This Crucial memory upgrade, transformed my older Dell laptop computer immediatly. It was one third the cost of the same chip at Dell. It also arrived in less than a week, using standard shipping. I'll be ordering another one very soon. Thank you so much Crucial.
