

1. Product Overview.

The Interchangeable line lens consists of a moulded acrylic multi rod lens element fitted with in an 11mm diameter lens holder with an M9 thread section for mounting. The lens produces a line with typical full fan angle of 60 degree with a 5mm by 1.5mm input beam. The intensity distribution is gaussian in the width and homogeneous in the line. The homogeneous line produces a high uniformity line at shorter working distances, however due to the effects of divergence the uniformity levels will decrease over longer working distance. An M9 threaded section allows the lens assembly to simply screw into any laser module with a M9 thread for lens assembly and a suitable focal length collimator.

The lens assembly will fit into both VM range and Gated Cameo "A" Lens model listed below and turn the output beam into the listed pattern.

Farnell Part Number	Description
5002-45-000	Versatile Module 635nm 1mW TTL
5002-46-000	Versatile Module 635nm 3mW TTL
5002-47-000	Versatile Module 650nm 1mW TTL
5002-48-000	Versatile Module 650nm 3mW TTL
1266-01-000	Gated Cameo 635nm 0.8mW A Lens
1266-02-000	Gated Cameo 635nm 3mW A Lens
1266-03-000	Gated Cameo 650nm 0.8mW A Lens
1266-04-000	Gated Cameo 650nm 3mW A Lens

2. Specification.

Lens Material	Acrylic
Lens Type	Moulded Multi Rod
Exit Aperture	5mm
A/R Coated	No
Typical Input Beam Size	5 by 1.5mm
Typical Fan Angle	60°
Typical Transmission Loss (650nm)	≤25%

3. Diagram.

Interchangeable Line Lens (60° Fan Angle)
