

PRECISION PROBES & SETS

Moody Tools' Precision Probes are designed to maintain sharpness and offer dozens of uses, including as soldering accessories and parts positioners.

These very popular dental-style probes come in two sizes, 10mil. and 25mil., and two configurations, single-ended and double-ended (next page).

All probe tips are Stainless Steel with needle sharp points, and all of the handles are hex-shaped to ensure grip and prevent rolling.

Packed in clear tubes.

Individual Precision Probes	10 mil. Stock No.	25 mil. Stock No.	25 mil. Stock No.
