

Professional moisture measurement:  
the right deep-insertion electrode for  
every application

Rev. 0210

**1. Round deep-insertion electrode  
(non-insulated)**

for moisture measurements in building and insulating materials between joints or joint intersections.

**2. Round deep-insertion electrode (insulated)**

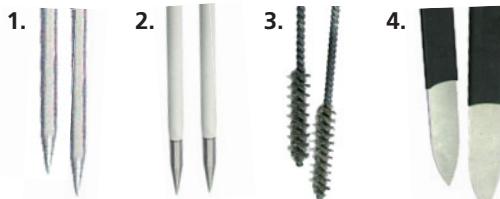

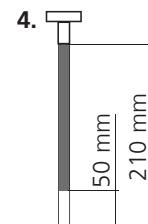

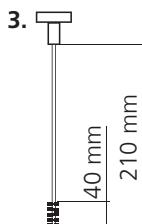

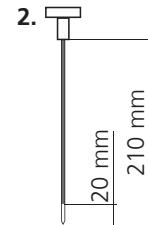

for moisture measurements in concealed material layers to assess moisture distribution in multi-layer wall or ceiling structures.

**3. Brush deep-insertion electrode**

for moisture measurement in homogeneous building material without using a contact mass. Contact is established by the brush tip.

**4. Flat deep-insertion electrode (insulated)**

for targeted moisture measurements in concealed material layers to assess moisture distribution in multi-layer wall or ceiling structures. Electrodes can be inserted through edge strips or at the wall-ceiling transition.

**Article no.: 082.026A**
