CONSTRUCTION
MOUNTING &
CONNECTION

Mounting: From either face using four .146" (3.7 mm) holes
Weight: 14 ounces (390g) except 4105GX
Housing: Metal with plastic impeller

Connection: Terminals two flat pins: .110" x .02" (2.8 x .5 mm)
Options: Hall Effect monitor

Alarm signal /17

- Alarm signal for speed monitoring.
- Signal output via open collector.
- The fan emits a high continuous signal during trouble-free operation within the permissible voltage range.
- Low signal when speed limit is not reached.
- After elimination of fault, the fan returns to its desired speed; the alarm signal reverts to high.

Alarm signal-data	Alarm output-voltage $U_{A,Low}$	Condition:	Condition: $I_{Sink} =$	Alarm output-voltage $U_{A,High}$	Condition:	Condition: I_{Source}	Alarm operating-voltage $U_{A,max}$	Max. permissible Sink current	Alarm delay time t_2	Condition:	Speed limit n_G	Fan description

4184 N /17 X	≤0.4	$n < n_G$	2	60	$n > n_G$	0	≤60	20	≤15	*	1500 ± 100	48

Attention: With these fan specials, deviations as regards temperature range, voltage range and power consumption are possible compared with standard fans.

Electrical connection

All voltages measured to ground.
 External load resistance R_a from U_A to U_{BA} required.
 With VARIOFANS with external temperature sensor for controlling the motor speed, the NTC sensor is not included in the scope of delivery.
 Temperature sensor LZ 370, see Accessories.

t_2 = Alarm signal suppression during start-up
 * $n < n_G$ by braking or blocking.

Available on request:

- With integrated signal latching for subsequent recognition of short-time faults.
- Alarm circuit open collector or TTL.
- Galvanically isolated for maximum device safety;
Defects in the power circuit do not affect the alarm circuit.
