

CRC AQUA PAINT MARKER

Ref. : 30009

1. GENERAL DESCRIPTION

CRC Aqua Paint Marker is an environmentally preferred temporary marking paint based on specially designed resins allowing the use of up to 35 % water in the paint without sacrificing the typical product properties.

2. FEATURES

- High amount of water, minimal solvent content.
- Fast drying, considering the high water level.
- Perfectly visible and bright colors.
- Thixotropic, for easy application on vertical and overhead surfaces.
- 360°valve for use in all positions.
- Excellent coverage, even on dark porous substrates.
- Color and visibility remaining for an extended period of time:
 - Fluorescent for at least one month.
 - Color fading to disappearing after +/- 6 months, depending substrate and weather conditions.
- Good adhesion on different substrates.
- No aromatics.
- No lead or other heavy metals.
- Although being water based, markings resist temperatures below zero.
- Despite the high water content, the **CRC Aqua Paint Marker** can be applied on humid surfaces.
- The well known specially designed applicator cap allowing the application with one finger.
- Special paint rheology eliminating the need for prolonged shaking before use.

3. APPLICATIONS

- Fulfills the needs for temporary markings in the following applications:
- Public engineering: highway & road construction, dams, railways, bridges.
- Topographic indications. Oil drilling. Mining.
- Installations of electric, telephone, water and gas supplies; cables for telecommunication.
- Harbours, airports.
- Agriculture.
- Police and civil protection.

CRC AQUA PAINT MARKER

Ref. : 30009

- Army.
- Sport events. Official and public events.
- Markings for geological studies.
- Construction: private and official buildings.
- Industries in general.
- All situations where a temporary signalization with high visibility is needed.
- Surfaces on which the **CRC Aqua Paint Marker** can be used on: Asphalt, concrete, sand, natural & artificial stone, wood, metals, plastics

4. DIRECTIONS

- Before use, shake the aerosol well during at least 15 seconds after one can hear the mixing ball moving freely.
- No need to purge the valve after use.
- Do not apply on energized equipment.
- Only use in well ventilated areas.

A safety data sheet (MSDS) according to EC Regulation N°1907/2006 Art.31 and amendments is available for all CRC products.

5. TYPICAL PRODUCT DATA (without propellant)

Binder type	:	novel type of polymer
Water content	:	up to 35% on paint
Color	:	5 fluorescent colors (red, green, yellow, blue, orange)
	:	White
Dry to touch	:	5 - 10 minutes (*)
Totally dry	:	25 - 35 minutes (*)
Dry coat weight (1 pass)	:	25 micron
Application conditions		
Minimum ambient temperature	:	+ 8 °C
Substrate temperature	:	+ 5 °C till +50°C
Maximum relative humidity	:	85%

(*) depending ambient conditions
