GIGABIT PERFORMANCE WITH UNMANAGED SWITCHES

New addition to the SPIDER family: The fourth generation has arrived!

- Large selection of entry-level switches
- Two full Gigabit switch versions now available
- New, larger housing with up to 10 ports
- Simple rail mounting
- Very user-friendly installation – plug & play

SIMPLY A GOOD CONNECTION

HIRSCHMANN
A Belden Company

Regarding the details in this brochure: The information/details in this publication merely contain general descriptions or performance factors which, when applied in an actual situation, do not always correspond with the described form, and may be amended by way of the further development of products. The desired performance factors shall only be deemed binding if these are expressly agreed on conclusion of the contract. Please note that some characteristics of the recommended accessory parts may differ from the appropriate product. This might limit the possible operating conditions for the entire system.

HIRSCHMANN
A Belden Company

The versatile SPIDER family now offers Gigabit performance.

Requirements and Solutions

Hirschmann developed the attractively priced SPIDER family for customers who are looking for a low-cost path to Industrial Ethernet. These simple unmanaged switches offer plug & play functionality in the lower area of the network pyramid. Fourth-generation SPIDER switches feature higher port density and Gigabit-Ethernet on all ports.

Based on a universal layout, SPIDER switches are available in a whole range of 2 – 8 (+ 2) port variations and a large selection of special versions. The choice includes Gigabit performance, an expanded temperature range between – 40° C up to + 70° C, E1 approval and optional fiber optics.

The SPIDER product family includes 21 user-friendly entry-level switches which support star or line network topologies over large distances at a sensational price per port ratio. The Hirschmann portfolio covers the entire Industrial Ethernet pyramid from the entry-level right up to the Layer 3 backbone switch with the quality and reliability that Hirschmann customers expect.

Product features

The SPIDER range offers a wide variety of connectivity options in the entry-level market segment: 2 – 8 (+ 2) ports, optional fiber optic ports and extended temperature range on all versions. The first full Gigabit switches deliver high performance at entry-level prices.

- Plug & play 10/100 Mbps Ethernet
- Auto-sensing, auto-crossing and auto-negotiation
- Expanded housing version for additional ports
- Simple, fast field installation (star and line topology)
- Excellent price/performance ratio (price per port)
- Extended temperature range: – 40° C up to + 70° C
- E1 approval from the German Federal Motor Vehicle Bureau (EEC types), 2005/83/EG Motor Vehicle Directive
- Simple rail mounting
- Industrial UL-approved circuit design
- Optical ports for SC or ST connectors and single- or multimode communications
- LED device and network status display

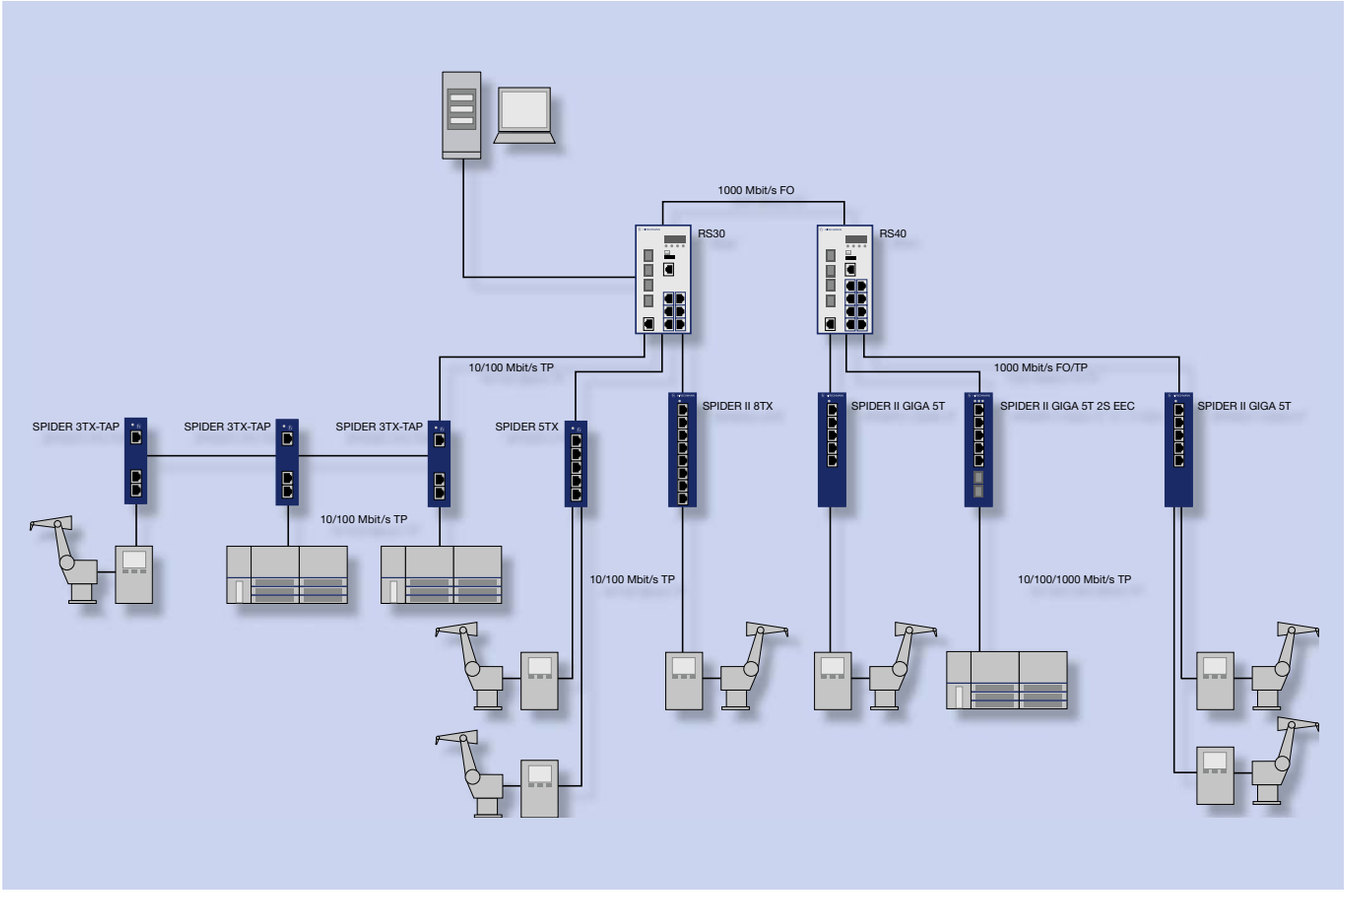
Large selection of versions:

- A total of 21 versions with 2 – 10 ports
- 100 BaseTX plus 1 100 Base FX port also available

Gigabit versions:

- 5 x 1000 BaseT (RJ 45) or
- 4 x 1000 BaseT (RJ 45)
  1 x Combo Port (RJ 45 + SFP Slot)
  1 x Fiber Uplink Port (SFP Slot)

Gigabit performance now with unmanaged switches. The new SPIDER Gigabit switches.



Applications

The SPIDER family is an attractive solution wherever simple unmanaged switches are used in a star or line topology. These entry-level switches are ideal for process and factory automation, machinery manufacturing, industrial systems, printing presses, etc. The fiber optic versions guarantee interference-free data communications over considerable distances.

Rugged design and IP30 protection ensure that these industrial switches perform flawlessly even in extreme environments. Excellent EMC immunity negates the effects of strong electrical fields. Good resistance to shock, vibration and temperature protects the switches in harsh industrial environments.
