We improved the design of our SurePunch to make it more efficient and even more comfortable to use. The SurePunch Pro™ is the **FIRST AND ONLY** punchdown tool to have a detachable light making it easy to work in dark cabinets and buildings without power. Gone are the days of holding a flashlight in your teeth as you work!

Other improvements include a shorter handle and a spring mechanism requiring less hand force to actuate. We kept the soft, rubber-embedded handle that cushions your hand as you terminate the wires.

Blades are available to terminate and cut telephone and data cable into a variety of termination panels including: 66, 88, 108, 109, 110, BIX™ and Krone™ LSA bifurcated terminals.

Paladin's SurePunch Pro™ features:

- Detachable light with long-life LED specially designed to focus the light on the panel work area
- Luminous intensity of the LED is 2200 mcd
- Finger grips and non-slip cushioned handle for comfort
- Multi-use spudger that can be used as a screwdriver or an IDC contact insertion tool
- Hook to feed wires through holes
- Pick to separate bonded twisted pair cables or to strip insulation and cut wire
- Adjustable HI/LO spring compression for all cable types
- For 28-22 solid or stranded wire and cable
- Blades twist and lock into place and accepts other manufacturers' twist-and-lock style blades
- Latch cover blade storage area in end of handle
- 10-year limited warranty on tool
- One-year limited warranty on blades and light
