TK-2202/3202

VHF/UHF FM Portable Radios

The excellent design of Kenwood's compact TK-2202/3202 portables guarantees superior ergonomics. Pick one up and you'll immediately appreciate how easy it is to use. Power is yours to enjoy too as they're equipped with priority scan, built-in VOX and a voice scrambler. You also get reassuring performance in all operating conditions, thanks to MIL-STD 810 & IP54/55 weatherproofing. Indoors or out, rain or shine, the well-built TK-2202/3202 portables set a new benchmark for rugged yet user-friendly operation.

COMPACT DESIGN

Compact enough to carry anywhere with ease, this smart new radio has a distinctively ergonomic form that's handy to hold and operate. What's more, the radio complete with the KNB-45L battery pack weighs only 280 grams.

OPERATING EASE

The rotary and key controls on the TK-2202/3202 have been designed to provide the user with positive detent feedback and voice-announcement even if carried and operated undercover or in a pocket.

8 CHANNELS

The TK-2202/3202 provides plenty of capacity for multiple channels or radio systems.

VOX READY

The TK-2202/3202 offers convenient hands-free operation with a compatible headset. The TK-2202/3202 internal VOX (voice-operated transmission) circuitry provides automatic PTT and a 10-level sensitivity adjustment for different ambient noise levels via software.

SIGNALLING

Encoder/Decoder function uses QT/DQT to segregate talk groups, so users only hear calls from their own group.

ENHANCED KENWOOD AUDIO

The TK-2202/3202 provides loud clear audio even in noisy environments.

ROBUST & RELIABLE

The TK-2202/3202 is built to survive the hard knocks, drops and all weather environments of its users. It meets or exceeds the stringent IP54/55 dust and water intrusion standards and the MIL-STD 810 C, D, E & F environmental standards including the demanding "blowing rain" test.

*MIL-STD/IPXX compatibility requires use of the terminal cover supplied with the SP-Mic.

BUILT-IN VOICE INVERSION SCRAMBLER

The built-in voice inversion scrambler provides basic protection against casual eavesdropping.

SCAN

Multi channel call monitoring can be customized with delete/add scan. Priority Scan automatically checks a primary channel for activity while receiving a call on a non-priority channel. Convenience features such as Priority-channel Stop Tone, Temporary Delete and Revert Channel facilitate user-friendly operation and eliminate confusion.
