NOTES

1. Packing direction

Relays are packed in a tube with the orientation stripe (PIN NO. 1) toward the green stopper.

2. Automatic mounting

To maintain the internal function of the relay, the chucking pressure should not exceed the values below.
Chucking pressure* in the direction A:
4.9 N {500 gf} or less

Chucking pressure* in the direction B:
9.8 N {1 kgf} or less
Chucking pressure* in the direction C:
9.8 N {1 kgf} or less
Please chuck the  portion.
Avoid chucking the center of the relay. In addition, excessive chucking pressure to the pinpoint of the relay should be avoided.

*Value of chucking pressure is shown by the value of weight pressed on the portion (4 mm .157 inch dia.).

3. Soldering

Preheat according to the following conditions.

Temperature	100°C 212°F or less
Time	Within 1 minute

Soldering should be done at 250°C 482°F within 5 s.

For Cautions for Use, see Relay Technical Information (Page 48 to 76).
