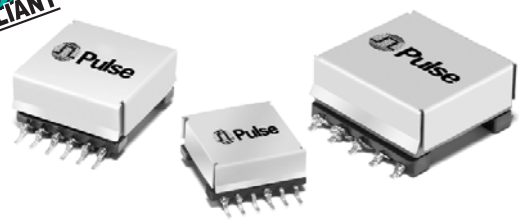
HIGH FREQUENCY CONVENTIONAL WOUND MAGNETICS

EFD Platforms - EFD15, EFD20 and EFD25

Pulse® A TECHNITROL COMPANY

RoHS COMPLIANT



- Transformers and Inductors
- **Power:** 30W to 180W
- **Three Different Platforms:** THT and SMT
- **Low Profile Platforms:** 8.4mm to 13.5mm
- Custom designs available

Electrical Specifications @ 25°C — Operating Temperature -40°C to 125°C

Notes:

1. The temperature of the component (ambient plus temperature rise) must be within the stated operating temperature range.
2. The above transformers and inductors have been tested and approved by Pulse's power IC partners and are sited in the appropriate datasheet or evaluation board documentation at these companies. To determine which IC and IC partners are matched with the above Pulse part numbers please consult the IC Cross Reference on the Pulse website.
3. The rated current as listed is either 85% of the saturation current or the heating current whichever is lower.
4. The saturation current is the current which causes the inductance to drop by 20% at 25°C. This current is determined by placing the component in the specified ambient environment and applying a short duration pulse current (to eliminate self-heating effects) to the component.
5. The heating current is the dc current which causes the temperature of the part to increase by approximately 40°C.
6. Add '**T**' suffix to the part number for Tape & Reel version (ie: PB2041**T**).
7. RoHS compliant parts are being introduced. Please contact Pulse for RoHS compliant part availability. If available, order part by adding the suffix "**NL**" to the part number (i.e. PB2041 becomes PB2041**NL** and PB2041T becomes PB2041**NL**T).
