EMV-SCHUTZGITTER / EMC FAN GUARDS

EMV-Schutzgitter für Lüftergrößen 80x80 bis 119x119mm. Diese Schutzgitter bestehen aus metallisiertem Kunststoff, silberfarben, und einem Metallnetz. Damit wird eine hohe EMV-Filterwirkung bei Frequenzen zwischen 1MHz und 1GHz bei niedrigen Kosten erreicht. Das Metallnetz muß einen direkten elektrischen Kontakt zur metallischen Oberfläche des Gerätegehäuses haben.

EMC fan guards for fans 80x80 up to 119x119mm. The guards are made from silver covered plastic and include a metal-wire net. This allows the shielding against electromagnetic waves in a range between 1MHz and 1GHz at low cost. The metal-wire net must have direct contact with the metallic surface of the device housing.

EMV+STAUBSCHUTZ / EMC+DUST PROTECTION

EMV-Schutzgitter für Lüftergrößen 80x80 bis 119x119mm. Diese Schutzgitter bestehen aus 3 Teilen: Der äußere Rahmen, die Staubfiltermatte und das EMV-Gitter aus metallisiertem Kunststoff, silberfarben, und einem Metallnetz. Damit wird eine hohe EMV-Filterwirkung bei Frequenzen zwischen 1MHz und 1GHz bei niedrigen Kosten erreicht. Das Metallnetz muß einen direkten elektrischen Kontakt zur metallischen Oberfläche des Gerätegehäuses haben.

DUST-FILTERS THREE-PART

The plastic filter of the LFG series offers an IP45 level of protection, according to publication IEC592. Its components are the fan guard, the clip-on lid and the filter blanket. When the filter blanket is saturated with dust, it can be vacuum cleaned or washed with water and detergent and used again.

We recommend regular cleanups, depending on the dust contamination in the environment to avoid a decrease in performance.
