SmartWire-DT Panel Wiring Solution

System Overview

Product Description

The SmartWire-DT system uses a continuous green flat cable located in the control cabinet to connect motor starters, pushbutton actuators, and indicator lights. It eliminates the need for most of the conventional point-to-point control wiring—and even integrates 24 Vdc control power for contactor coils on the eight conductor flat cable. The start of the SmartWire-DT system is a gateway—it establishes the connection to standard programmable logic controller (PLC) fieldbuses, such as EtherNet/IP, Modbus TCP, PROFIBUS-DP and CANopen. Because SmartWire-DT directly integrates the input/output (I/O) level in the switching devices, no conventional PLC I/O modules are needed—instead communication enabled modules are attached to standard Eaton motor control components. Thus, the PLC in the control cabinet simply consists of a central processing unit (CPU) module.

Typical faults such as loose connections and miswired terminations are eliminated using the flat cable and the specialized connectors. Furthermore, each SmartWire-DT enabled device has individual diagnostic LEDs built in, which reduce commissioning time and troubleshooting in the field.

Nodes on the SmartWire-DT network are automatically assigned addresses on the gateway with the push of a button—assigning addresses in the order that the nodes are connected. The system employs time monitoring and a watchdog timeout using the established target configuration as a reference—safely monitoring the integrity of the control scheme. SmartWire-DT has a maximum network length of 2000 ft, can be extended to pushbutton control stations outside of the control cabinet, and can connect up to 99 nodes per gateway. A software program called SWD-Assist enables the layout, planning, and system configuration of a SmartWire-DT network.

Features

- Connects directly to standard XTCE contactors, XTRE control relays, and M22 pilot devices
- Supports EtherNet/IP, Modbus TCP, PROFIBUS-DP and CANopen fieldbuses
- Supports up to 99 nodes on Ethernet and CANopen, and 58 nodes on PROFIBUS-DP
- Automatically assigns addresses to SmartWire-DT nodes
- Integrates and supplies 24 Vdc power to contactor and relay coils over the network
- Includes diagnostic bi-color LEDs on each node connection

System Components

Product Description

The start of the SmartWire-DT system is a gateway module. The gateway connects as a node to a programmable logic controller (PLC) fieldbus. The PLC used must have a fieldbus polling master module or input/output (I/O) scanner card so that the gateway can connect as a node on the fieldbus network. SmartWire-DT can connect to EtherNet/IP, Modbus TCP, PROFIBUS-DP and CANopen fieldbuses. To plan and lay out a SmartWire-DT network, a MS Windows compatible software program called SWD-Assist is available as a free download from the Eaton website. The SWD-Assist configuration software will calculate the control power requirements needed and generate a bill of materials of all the required components.

Gateway Modules

Gateway modules connect the SmartWire-DT system to the PLC. They are connected as nodes to the existing PLC fieldbus and are the start of the SmartWire-DT connection system. Gateways are available with Ethernet, PROFIBUS-DP and CANopen protocols.

Powerfeed Modules

Powerfeed modules feed auxiliary 24 Vdc power and/or 15 Vdc network power into the SmartWire-DT flat cable. The auxiliary 24 Vdc power is needed for the power supply of contactors and the 15 Vdc network power is used for supplying power to additional SmartWire-DT nodes. Powerfeed modules are also used to create zone control or groups of devices controlled by a single Emergency Stop.

Digital and Analog I/O Modules

Digital and analog I/O modules are connected as nodes on the SmartWire-DT network and allow standard or generic devices to be connected to the SmartWire-DT system. They can be connected anywhere along the flat cable network and can therefore be positioned in the control panel to help reduce the I/O wiring.

Contactor Modules

Contactor modules fit into standard XT contactors and control relays directly on top, in place of a top mounted auxiliary contact block. The modules fit all XTCE size B and C frame contactors and XTRE control relays.

Pilot Device Modules

Pilot device modules fit into standard M22 pilot devices in both front mount and base mount configurations. Single and double contact modules with and without LEDs are available to meet a wide variety of control circuit requirements.

Flat and Round Cables

The flat cable is an 8 AWG 24 conductor cable that is flexible, durable, and rated for 600V so that it can be placed in the panel wiring duct along with 480V or 600V power conductors. It has two prominent features: (a) arrows indicating the front of the cable and the direction away from the gateway and (b) black edging indicating the polarity of the flat cable, the 15 Vdc wire and the reference mark for installing the device plugs and flat plugs.

The round cable has 4 AWG 20 and 4 AWG 24 wires and is 300V rated. It is used outside the control panel to connect peripherals such as pushbutton control stations to the SmartWire-DT network. Cable adapters are available to transition a flat cable to a round cable connection and IP67 type connectors are available to provide quick-disconnect cable connections on the round cable.

Other System Accessories

Other accessories for the SmartWire-DT system include connectors, jumpers, bushings, plugs, and sockets, flat to round cable adapters and crimping tools.

Product Selection

Gateway Module

Gateway Modules

Gateway modules connect the SmartWire-DT system to the programmable logic controller (PLC). They are connected as nodes to the existing PLC fieldbus and are the start of the SmartWire-DT connection system.

Description	Pkg. Qty.	Catalog Number
Ethernet Gateway Connection to EtherNet/IP or Modbus TCP Automatic baud rate detection 10/100 Mbps Address set with DIP switch or DHCP Two RJ45 sockets Connection of up to 99 SmartWire-DT nodes	1	EU5C-SWD-EIP-MODTCP
PROFIBUS-DP Gateway Automatic baud rate detection from 9.6 Kbps to 12 Mbps Address range 1–126 9-pole SUB-D socket Connection of up to 58 SmartWire-DT modes	1	EU5C-SWD-DP
CANopen Gateway Automatic baud rate detection from 10 Kbps to 1 Mbps Address range 1–32 9-pole SUB-D socket Connection of up to 99 SmartWire-DT modes	1	EU5C-SWD-CAN

Powerfeed Module

Powerfeed Modules

Powerfeed modules feed auxiliary 24 Vdc power and/or 15 Vdc network power into the SmartWire-DT flat cable. The auxiliary 24 Vdc power is needed for the power supply of contactors and the 15 Vdc network power is used for supplying power to additional SmartWire-DT nodes. Powerfeed modules are also used to create zone control or groups of devices controlled by a single Emergency Stop.

Description	Pkg. Qty.	Catalog Number
Powerfeed module 1 (for 24 Vdc auxiliary power)	1	EU5C-SWD-PF1-1
Powerfeed module 2 (for 24 Vdc auxiliary power and 15 Vdc network power)	1	EU5C-SWD-PF2-1

Digital I/O Module

Digital I/O Modules

Digital input/output (I/O) modules are connected as nodes on the SmartWire-DT network and allow standard or generic devices to be connected to the SmartWire-DT system. They can be connected anywhere along the flat cable network and can therefore be positioned in the control panel to help reduce the I/O wiring.

Description	Pkg. Qty.	Catalog Number
Digital module with 8 digital inputs 24 Vdc	1	EU5E-SWD-8DX
Digital module with 4 digital inputs 24 Vdc three-wire connections	1	EU5E-SWD-4DX
Digital module with 8 digital outputs 24 Vdc 10.5A	1	EU5E-SWD-X8D
Digital module with 4 digital inputs 24 Vdc and 4 transistor outputs 24 Vdc/0.5A	1	EU5E-SWD-4D4D
Digital module with 4 digital inputs 24 Vdc and 2 relay outputs 250 Vac	1	EU5E-SWD-4D2R

Analog I/O Module

Analog I/O Modules

Analog input/output (I/O) modules are connected as nodes on the SmartWire-DT network and allow standard or generic devices to be connected to the SmartWire-DT system. They can be connected anywhere along the flat cable network and can therefore be positioned in the control panel to help reduce the I/O wiring.

Description	Pkg. Qty.	Catalog Number
Analog module with 4 analog inputs 0–10V or 0–20 mA	1	EU5E-SWD-4AX
Analog module with 2 analog inputs 0–10V or 0–20 mA and 2 analog outputs 0–10V or 0–20 mA	1	EU5E-SWD-2A2A
RTD module with 4 temperature inputs PT100, PT1000 or Ni1000	1	EU5E-SWD-4PT

Accessories

System Accessories

Accessories for the SmartWire-DT system includes cables, connectors, jumpers, bushings, plugs, sockets, flat to round cable adapters, and crimping tools.

	Description	Length	Pkg. Qty.	Catalog Number
Flat Cable, 8 AWG 24, 600V				
Flat Cable 	For SmartWire-DT network inside the control panel	328.1 ft (100m)	1	SWD4-100LF8-24
	Complete with flat plugs SWD4-8MF2 installed at both ends	9.8 ft (3m)	1	SWD4-3LF8-24-2S
		16.4 ft (5m)	1	SWD4-5LF8-24-2S

System Controllers

XV Series HMI-PLC with SmartWire-DT**Product Description**

The XV HMI-PLC controller with SmartWire-DT™ master is a powerful combination of logic, visualization and connectivity to motor control devices. It is ideal for small to mid-range PLC applications where integrated logic and visualization is advantageous and/or where remote administration is critical. The SmartWire-DT master can accept 99 nodes on a 2000 foot-long network.

Features

- Built-in SmartWire-DT master for 99 nodes
- Brilliant image display with 65,536 colors
- High resolution resistive touch TFT displays
- 3.5 in, 5.7 in or 7 in widescreen displays in robust plastic housings and bezels, or
- 5.7 in, 8.4 in or 10.4 in displays in high-end aluminum front bezels and metal housings
- Ethernet and RS485 serial ports on all models
- PROFIBUS-DP or CANopen master on all models larger than 3.5 in
- Programmable with IEC 61131-3 compliant XSoft-CoDeSys software
- Easy connection direct to motor control components or I/O modules on SmartWire-DT flat cable

Standards and Certifications

- CE
- UL
- cUL
- RoHS

Note: For product selection of XV Series HMI-PLCs with SmartWire-DT, see Tab 4 in this volume.

Contactor Modules**Contactor Modules****Product Description**

Contactor modules fit onto standard XT contactors and control relays directly on top, in place of a top mounted auxiliary contact block. The modules fit all XTCE size B and C frame contactors and XTRE control relays.

These modules facilitate direct connection to the SmartWire-DT flat cable and eliminate the traditional point-to-point wiring to the PLC input and output modules as well as wiring to the contactor coils.

Features

- Integrated 24 Vdc coil power on network and plug-in modules
- Integrated switch position polling
- Integrated mechanical switch position display
- Integrated feedback circuit to PLC
- Built-in diagnostic bi-color LEDs on each module
- Connection to SmartWire-DT flat cable via quick disconnect device plugs

Contactor Modules

Contactor Modules ^{①②③}

SmartWire-DT module for attachment to XTCE007–XTCE032 contactors and XTRE control relays.
One module is required per contactor.

Description	Pkg. Qty.	Catalog Number
Two digital inputs for voltage-free contacts. One electrical interlock for the surface mounting of reversing combinations. Messages: Switch status contactor, status of the digital inputs 1 and 2. Commands: Contactor actuation.	5	DIL-SWD-32-001
Two digital inputs for voltage-free contacts. One electrical interlock for the surface mounting of reversing combinations. 1-0-A switch for manual or automatic operation. Messages: Contactor switching position, status of the digital inputs 1 and 2, 1-0-A switch position. Commands: Contactor actuation.	5	DIL-SWD-32-002

PKE Contactor Module

PKE Contactor Module

SmartWire-DT module for connection of XTPE manual motor controllers.
One module is required per contactor and XTPE manual motor protector.

Description	Pkg. Qty.	Catalog Number
Connecting cable between module and XTPE trip block included as standard. One electrical interlock for the surface mounting of reversing starters. 1-0-A switch for manual or automatic operation. Selectable overload relay function for connecting the contactor on overload. Messages: Switch position contactor/PKE/1-0-A switch Motor current in % Thermal motor image in % Trip-indicating auxiliary contact (Overload, Short-circuit,...) Set value of overload releases Set value Verification time (CLASS), Part no. Trip block. Commands: Contactor actuation, activation of overload relay function (ZMR)	4	PKE-SWD-32

Design Note

The number of motor starters or XTCE contactors that can be connected is dependent upon the power consumption of the contactor coils. To increase the number of SmartWire-DT modules that can be connected. Powerfeed modules can be used.

24 Vdc		XTCE007	XTCE009	XTCE012	XTCE015	XTCE018	XTCE025	XTCE032
Pick-up power	W	3	3	4.5	4.5	12	12	12
Sealing power	W	3	3	4.5	4.5	0.5	0.5	0.5

Notes

- ① Take account of the maximum current consumption of the contactor coils per SmartWire-DT line.
- ② A2 connections must not be linked.
- ③ Connection terminals for electrical interlocking are not suitable for safety technology.

Connections						
Plug		8-pole	8-pole	8-pole	8-pole	8-pole
Plug connectors		M22-SWD-I_LP	SWD4-8SF2-5	M22-SWD-I_LP	SWD4-8SF2-5	M22-SWD-I_LP
Number of insertion cycles		≥50	≥50	≥50	≥50	≥50
Current consumption (15V SWD supply)		See Page V7-T9-33	See Page V7-T9-33	See Page V7-T9-33	See Page V7-T9-33	See Page V7-T9-33
Function Element						
Contacts		1 contact	2 contacts	2 contacts	2 contacts	2 contacts
Lifespan mechanical/electrical (operations)		1 x 10 ⁶	1 x 10 ⁶	1 x 10 ⁶	1 x 10 ⁶	1 x 10 ⁶
LED display		Yes	No	No	Yes	Yes
Diagnostics		Yes	Yes	Yes	Yes	Yes
Mounting		Base mount	Front mount	Base mount	Front mount	Base mount

Current Consumption Ratings**Power Consumption/Current Consumption
24 Vdc Control Voltage U_{AUX}**

Description	Unit	DIL-SWD-32-__
Pick-Up Power		
For XTCE007–XTCE009	W	3
For XTCE012–XTCE015	W	4,5
For XTCE018–XTCE032	W	12
Pick-Up Current		
For XTCE007–XTCE009	mA	125
For XTCE012–XTCE015	mA	188
For XTCE018–XTCE032	mA	500
Holding Power		
For XTCE007–XTCE009	W	3
For XTCE012–XTCE015	W	4,5
For XTCE018–XTCE032	W	0,5
Holding Current		
For XTCE007–XTCE009	mA	125
For XTCE012–XTCE015	mA	188
For XTCE018–XTCE032	mA	21

Current Consumption 15 Vdc Supply Voltage
