

LOW-NOISE, HIGH-SPEED, 450 mA CURRENT FEEDBACK AMPLIFIERS

FEATURES

- **Low Noise**
 - 2.9 pA/√Hz Noninverting Current Noise
 - 10.8 pA/√Hz Inverting Current Noise
 - 2.2 nV/√Hz Voltage Noise
- **High Output Current, 450 mA**
- **High Speed**
 - 128 MHz, –3 dB BW($R_L = 50\ \Omega$, $R_F = 470\ \Omega$)
 - 1550 V/μs Slew Rate ($G = 2$, $R_L = 50\ \Omega$)
- **Wide Output Swing**
 - 26 V_{PP} Output Voltage, $R_L = 50\ \Omega$
- **Low Distortion**
 - –80 dBc (1 MHz, 2 V_{PP}, $G = 2$)
- **Low Power Shutdown Mode (THS3125)**
 - 370-μA Shutdown Supply Current
- **Standard SOIC, SOIC PowerPAD™, and TSSOP PowerPAD Package**

- **Line Drivers**
- **Motor Drivers**
- **Piezo Drivers**

DESCRIPTION

The THS3122/5 are low-noise, high-speed current feedback amplifiers, with high output current drive. This makes them ideal for any application that requires low distortion over a wide frequency with heavy loads. The THS3122/5 can drive four serially terminated video lines while maintaining a differential gain error less than 0.03%.

The high output drive capability of the THS3122/5 enables the devices to drive 50-Ω loads with low distortion over a wide range of output voltages:

- 80 –dBc THD at 2 V_{PP}
- 75 –dBc THD at 8 V_{PP}

The THS3122/5 can operate from ±5 V to ±15 V supply voltages while drawing as little as 7.2 mA of supply current per channel. They offer a low power shutdown mode, reducing the supply current to only 370 μA. The THS3122/5 are packaged in a standard SOIC, SOIC PowerPAD™, and TSSOP PowerPAD packages.

APPLICATIONS

- **Video Distribution**
- **Instrumentation**

VOLTAGE NOISE AND CURRENT NOISE

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

PowerPAD is a trademark of Texas Instruments.

PRODUCTION DATA information is current as of publication date. Products conform to specifications per the terms of Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

AVAILABLE OPTIONS

T _A	PACKAGED DEVICE				EVALUATION MODULES
	SOIC-8 (D)	SOIC-8 PowerPAD (DDA)	SOIC-14 (D)	TSSOP-14 (PWP)	
0°C to 70°C	THS3122CD	THS3122CDDA	THS3125CD	THS3125CPWP	THS3122EVM
–40°C to 85°C	THS3122ID	THS3122IDDA	THS3125ID	THS3125IPWP	THS3125EVM

absolute maximum ratings over operating free-air temperature (unless otherwise noted)†

Supply voltage, V _{CC+} to V _{CC–}	33 V
Input voltage	± V _{CC}
Output current (see Note 1)	275 mA
Differential input voltage	± 4 V
Maximum junction temperature	150°C
Total power dissipation at (or below) 25°C free-air temperature	See Dissipation Ratings Table
Operating free-air temperature, T _A : Commercial	0°C to 70°C
Industrial	–40°C to 85°C
Storage temperature, T _{stg} : Commercial	–65°C to 125°C
Industrial	–65°C to 125°C
Lead temperature 1,6 mm (1/16 inch) from case for 10 seconds	300°C

† Stresses beyond those listed under “absolute maximum ratings” may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under “recommended operating conditions” is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

NOTE 1: The THS3122 and THS3125 may incorporate a PowerPAD™ on the underside of the chip. This acts as a heatsink and must be connected to a thermally dissipating plane for proper power dissipation. Failure to do so may result in exceeding the maximum junction temperature which could permanently damage the device. See TI Technical Brief SLMA002 for more information about utilizing the PowerPAD™ thermally enhanced package.

DISSIPATION RATING TABLE

PACKAGE	θ _{JA}	T _A = 25°C POWER RATING
D-8	95°C/W‡	1.32 W
DDA	67°C/W	1.87 W
D-14	66.6°C/W‡	1.88 W
PWP	37.5°C/W	3.3 W

‡ This data was taken using the JEDEC proposed high-K test PCB. For the JEDEC low-K test PCB, the θ_{JA} is 168°C/W for the D-8 package and 122.3°C/W for the D-14 package.

recommended operating conditions

		MIN	NOM	MAX	UNIT
Supply voltage, V _{CC+} to V _{CC–}	Dual supply	±5		±15	V
	Single supply	10		30	
Operating free-air temperature, T _A	C-suffix	0		70	°C
	I-suffix	–40		85	
Shutdown pin input levels, relative to the GND pin	High level (device shutdown)	2			V
	Low level (device active)			0.8	

electrical characteristics over recommended operating free-air temperature range, $T_A = 25^\circ\text{C}$,
 $V_{CC} = \pm 15\text{ V}$, $R_F = 750\ \Omega$, $R_L = 100\ \Omega$ (unless otherwise noted)

dynamic performance

PARAMETER		TEST CONDITIONS			MIN	TYP	MAX	UNIT
BW	Small-signal bandwidth (−3 dB)	R _L = 50 Ω	R _F = 50 Ω, G = 1	V _{CC} = ±5 V	138		MHz

⁽¹⁾ The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

⁽²⁾ Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS) or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

⁽³⁾ MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

PLASTIC SMALL-OUTLINE PACKAGE

4040047-2/F 07/2004

- NOTES: A. All linear dimensions are in inches (millimeters).
B. This drawing is subject to change without notice.
C. Body dimensions do not include mold flash or protrusion not to exceed 0.006 (0,15).
D. Falls within JEDEC MS-012 variation AA.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.
