R5/6/9/10/11/12 Depend on SerDes chip used and desired line termination (50 Ω Strip line)

Value of R5/6/9/10/11/12 may vary as long as proper 50 Ω termination to VEE, it depends on SerDes chip used and desired line termination. Reset depends on the power OFF and then ON. For good EMI performance the power supply filter is required. Use short tracks from the inductor L1/2 to the module VccTx/VccRx. This recommended circuit uses 3.3V power supply and SerDes Chip using 3.3 / 5 V power supply.
