ME-GPIB Cable - Robust, Light, EMV Compliant

- Tested GPIB/IEEE488 bus quality cable for EMV compliant, low noise connectivity.
- High noise-immunity with multiple shielding.
- Reliable transmission with twisted-pair lines.
- Robust and light with high quality piggy-back connectors with aluminum housing.
- Multiple length available from 0.5 to 20 m.
- For flexible use available with
 - standard connectors ①.
 - cable access at a 30° angle ②.
 - straight cable access on one side (similar to D-sub connector types) ③.

Helps you to access GPIB connectors which are difficult to reach with standard connectors, for example interface boards in PC slots or measurement instruments in a rack cabinet.

*twisted-pair
