

| Parameter              | Rating | Units                                |
|------------------------|--------|--------------------------------------|
| Blocking Voltage       | 60     | V <sub>P</sub>                       |
| Load Current           | 75     | mA <sub>rms</sub> / mA <sub>DC</sub> |
| On-Resistance (max)    | 10     | Ω                                    |
| LED Current to operate | 0.5    | mA                                   |

## Features

- Designed for EN50130-4 Compliant Security Systems
- 1500V<sub>rms</sub> Input/Output Isolation
- Only 0.5mA of LED Current Required to Operate
- Small 4-Pin SOP Package
- TTL/CMOS Compatible Input
- No Moving Parts
- High Reliability
- Arc-Free With No Snubbing Circuits
- No EMI/RFI Generation
- Immune to Radiated EM Fields
- SMD Pick & Place, Wave Solderable
- Tape & Reel Version Available

## Applications

- Security
  - Passive Infrared Detectors (PIR)
  - Data Signalling
  - Sensor Circuitry
- Instrumentation
  - Multiplexers
  - Data Acquisition
  - Electronic Switching
  - I/O Subsystems
- Meters (Watt-Hour, Water, Gas)
- Medical Equipment—Patient/Equipment Isolation
- Aerospace
- Industrial Controls

## Description

The CPC1006N is a miniature single-pole, normally open (1-Form-A) solid state relay in a 4-pin SOP package that employs optically coupled MOSFET technology to provide 1500V<sub>rms</sub> of input to output isolation.

The relay outputs are constructed with efficient MOSFET switches and photovoltaic die that use IXYS Integrated Circuits Division's patented OptoMOS architecture while the input, a highly efficient GaAlAs infrared LED, provides the optically coupled control.

Using IXYS Integrated Circuits Division's state of the art double-molded vertical construction packaging to produce one of the world's smallest relays, the CPC1006N offers board space savings of at least 20% over the competitor's larger 4-pin SOP relay.

## Approvals

- UL Recognized Component: File E76270
- CSA Certified Component: Certificate 1175739
- EN/IEC 60950-1 Certified Component: TUV Certificate B 09 07 49410 004

## Ordering Information

| Part #     | Description           |
|------------|-----------------------|
| CPC1006N   | 4-Pin SOP (100/tube)  |
| CPC1006NTR | 4-Pin SOP (2000/reel) |

## Pin Configuration

## Switching Characteristics of Normally Open Devices

### Absolute Maximum Ratings @ 25°C

| Parameter                            | Ratings     | Units            |
|--------------------------------------|-------------|------------------|
| Blocking Voltage                     | 60          | V <sub>P</sub>   |
| Reverse Input Voltage                | 5           | V                |
| Input Control Current<br>Peak (10ms) | 50          | mA               |
|                                      | 1           | A                |
| Input Power Dissipation              | 70          | mW               |
| Total Power Dissipation <sup>1</sup> | 400         | mW               |
| Isolation Voltage Input to Output    | 1500        | V <sub>rms</sub> |
| ESD Rating, Human Body Model         | 4           | kV               |
| Operational Temperature              | -40 to +85  | °C               |
| Storage Temperature                  | -40 to +125 | °C               |

<sup>1</sup> Derate linearly 3.33 mW / °C

*Absolute Maximum Ratings are stress ratings. Stresses in excess of these ratings can cause permanent damage to the device. Functional operation of the device at conditions beyond those indicated in the operational sections of this data sheet is not implied.*

### Electrical Characteristics @ 25°C

## Manufacturing Information

### Moisture Sensitivity

 All plastic encapsulated semiconductor packages are susceptible to moisture ingress. IXYS Integrated Circuits Division classified all of its plastic encapsulated devices for moisture sensitivity according to the latest version of the joint industry standard, **IPC/JEDEC J-STD-020**, in force at the time of product evaluation. We test all of our products to the maximum conditions set forth in the standard, and guarantee proper operation of our devices when handled according to the limitations and information in that standard as well as to any limitations set forth in the information or standards referenced below.

Failure to adhere to the warnings or limitations as established by the listed specifications could result in reduced product performance, reduction of operable life, and/or reduction of overall reliability.

This product carries a **Moisture Sensitivity Level (MSL) rating** as shown below, and should be handled according to the requirements of the latest version of the joint industry standard **IPC/JEDEC J-STD-033**.

| Device   | Moisture Sensitivity Level (MSL) Rating |
|----------|---|
| CPC1006N | MSL 3                                   |

### ESD Sensitivity

This product is **ESD Sensitive**, and should be handled according to the industry standard **JESD-625**.

### Reflow Profile

This product has a maximum body temperature and time rating as shown below. All other guidelines of **J-STD-020** must be observed.

| Device   | Maximum Temperature x Time |
|----------|----------------------------|
| CPC1006N | 260°C for 30 seconds       |

### Board Wash

IXYS Integrated Circuits Division recommends the use of no-clean flux formulations. However, board washing to remove flux residue is acceptable. Since IXYS Integrated Circuits Division employs the use of silicone coating as an optical waveguide in many of its optically isolated products, the use of a short drying bake could be necessary if a wash is used after solder reflow processes. Chlorine- or Fluorine-based solvents or fluxes should not be used. Cleaning methods that employ ultrasonic energy should not be used.
