INTRODUCTION

The SEM1610 is the new generation DIN rail mounted temperature transmitter from Status Instruments. It has been designed to accept most common process and temperature sensor inputs and provide the user with a standard two wire (4 to 20) mA output signal. Isolation is provided between input and output and all temperature ranges are linear to temperature.

Designed for ease of use, our latest USB interface is fitted for quick and easy configuration. Just connect a standard USB cable between the SEM1610 and your PC. Using our free configuration software, your PC will automatically upload the existing configuration data and guide you through any changes you wish to make. To further help save time, the SEM1610 does not need to be wired to a power supply during the configuration process, it is powered via the USB interface from your PC. The following parameters are configurable :-

INPUT TYPE	LOW RANGE	HIGH RANGE	UNITS	BURNOUT	USER TRIM
PT100	Input @ 4 mA	Input @ 20 mA	°F, °C	Up/Scale Down/Scale	On , Off
T/C K, J, E, N, T, R, S			°F, °C	Up/Scale Down/Scale	
mV			mV	Up/Scale Down/Scale	
mA			mA		

The SEM1610 is also provided with user push button trim, allowing trim adjustments at both 4 mA and 20 mA. The user trim function can be locked during configuration if not required. The range led indicates out of range input during normal operation, during user trim it is used to indicate the stage of trim.
