Clear tubing for use with the 2-part labelling system. The tubing acts as both the carrier and protector for the label.

Tubing is available in various sizes depending on the diameter of the cable, whatever the size, it still takes the same label. Additionally, the tubing and matching labels are available in three sizes; 20mm, 30mm and 50mm. The longer the label, the more characters that can be printed.

TIP TIME INTO PROFIT®

Because of this special design it is possible to slide the blank tubing onto the wire prior to termination. The label can then be inserted at any time during or after termination.

TIP - TIME INTO PROFIT BROCHURE

HOW IT WORKS

STEP 1

Slide the tubing onto the cable/wire

STEP 2

Print the label using our Labacus® Innovator Software

STEP 3

Insert label into tubing

STEP 4

Pull the tail through the tubing

STEP 5

Tear/cut off tail

Silver Fox always choose the very best and durable materials from which to make our labels. We then test the final printed labels, for a variety of different extreme conditions, all at independently approved external test laboratories (unless otherwise noted). We are not able to anticipate every set of conditions, so always suggest that a user should also satisfy themselves as to the suitability of our labels for their particular environment. This datasheet supersedes any previous information/datasheet released.
